

The United States Government Cooperates

with the 7,600 member banks in maintaining the Federal Reserve Banking System for the protection of the business interests of the country. Through the Federal Reserve Board in Washington it supervises the twelve Federal Reserve banks; it appoints one-third of their directors; it deposits its funds largely with them; it guarantees the currency they issue.

This co-operation greatly increases the value of the system to us and our community.

Are you linked up with this new national system as one of our depositors? If not, you should delay no longer.
