

I. W. W. AGITATOR HANGED BY MONTANA VIGILANTES

FRANK LITTLE FOUND HANGING TO BRIDGE

Body Identified and Cut Down By the Chief of Police.

WORK SIX MASKED MEN

Some Believe Little Was Detective—Took Active Part in Labor Troubles in Arizona a Few Weeks Ago.

(By Associated Press.) BUTTE, Mont., Aug. 1.—Strenuous days of the early sixties in Montana were vividly brought to mind this morning when it became known that effective work of the vigilantes of a half century ago had been duplicated during the night, and the city was thrown into intense excitement when the body of Frank Little, a member of the executive board of the Industrial Workers of the World, was discovered hanging to a railroad trestle just outside of town. Investigation developed the fact that six masked men took Little from his room some time before dawn...

Little recently addressed a communication to Governor Campbell, of Arizona, writing from Salt Lake City, protesting against the wholesale deportation of I. W. W. miners from Idaho. The dead man is believed by very many throughout the mining regions of the Rocky mountain slope to have been one of D. W. Haywood's chief lieutenants. The victim of last night's tragedy was a lame man, and it is said that his abductors half carried him to the machine which bore him to the place of execution. He evidently had been dragged from bed, and without being given time to dress was hurried to the scene of his death.

CECIL BLACK MISSES HIS CREAM AND SUGAR

Mrs. S. J. Black, of 428 Pitzer street, received a letter from her son, Cecil, who left with the hospital corps and is now stationed at Fort Stevens. Among other things Cecil says he likes army life and is well contented with his present location, but that he prefers "sugar and cream" in his coffee. According to Mr. Black, the boys had a splendid trip going down and are at present very busy with camp routine.

NEWLYWEDS CANNOT ESCAPE DRAFT LAW

Hasty marriages made since July 20, the date of the army draft drawing, in an effort to escape conscription, through the claim of a depend-

ent wife, will not be considered ground for discharge unless the wife is actually dependent on the husband's daily labor.

Prompted by reports from many cities of marriage license bureaus being besieged by men included in the first draft call, Provost Marshal-General Crowder has ruled that "marriage is not of itself a valid ground for making claim for discharge."

EXTRA CAUTION AGAINST FOREST FIRES URGED

(By Associated Press.) PORTLAND, Or., Aug. 1.—Extra caution against forest fires is urged by E. A. Beals, district forecaster of the weather bureau in a bulletin issued at San Francisco July 31. "Pressure conditions favorable for a spell of about two days of rising temperature with moderate westerly winds shifting to northerly, which will increase fire hazard," reads the bulletin.

Large Number of Merchants Attend Lecture Last Evening.

PICTURES DISPLAYED

And Some Good, Sound, Wholesome Advice Liberated for the Benefit of the Every Day Business Man.

A large crowd of merchants and interested citizens gathered at the Palace theatre last evening to enjoy the excellent lecture and three reels of pictures, "The Trouble of a Merchant and How to Stop Them."

The film was released by the Esanay Company at a cost of \$30,000 and clearly shows how a grocer through lax methods in business is brought to the verge of bankruptcy. The direct causes of failure were shown as the picture progresses, picturing the inefficient clerks and slovenly arranged goods. At a critical moment when all hopes had flown for success, Mr. Merchant decides to purchase a National cash register and re-arrange an up-to-date business system and as a consequence he finds himself rapidly advancing in the business world, toward prosperity.

(By Associated Press.) WASHINGTON, Aug. 1.—The senate today adopted a resolution providing for submission to the several states of a federal amendment to the prohibition constitution. Vote on the resolution stood 65 to 29.

FINE STAND OF WHEAT GROWN ON DIXON FARM

Rafe Dixon was exhibiting a sample of Big Club wheat in the city this afternoon that was particularly fine. The seed was sown on slashing burned ground in the fall, and demonstrates what may be done here with wheat where proper care is taken.

average him probably 40 bushels to the acre. This wheat is remarkable in that it stood out properly during the growing period. Wheat growers understand this term, but to the uninitiated it is Greek. Stooling means that from one kernel of wheat a great many stalks will spring up, each bearing a head of wheat. In the case at hand, one kernel has produced 37 stalks and as many heads of nice plump wheat, while the other has 11. This condition is what produces profitable yields, and makes wheat growing remunerative. These samples may be seen in The News office windows.
