WRITE TO THE BOYS.

Thousands of persons on the Pacific coast will remember Thomas E. Watt, a minister of the Christian church, formerly educational director of the Oakland Y. M. C. A. and later a war work secretary at Imperial Beach, and Fort Rosecrans near San Diego. He heard the call to service in overseas work of the Y. M. C. A. and left for the front. He is at Dinam Hut, Winalli Town, Winchester, England, and he writes letters to the soldiers. He makes a plea for friends at home to write letters to the boys. He says that a letter from home is the greatest agency in the world to keep the soldier in good spirits. He says that it is the only thing he has found to keep him from getting homesick. In a recent letter he says:

"Men and women of the homeland you must keep this work in your hearts. You must write your boys. We, in Y. M. C. A. war work, are willing to work day and night to save the boys and keep them in touch with the best things in life, but you must put behind us everything you have until this terrible trouble is over. The men are here. They are your own. They must be taken care of and there is only one agency that can, in any measure, do the task. That one agency is your own representative, the Y. M. C. A. Pray for all of us that we may be big enough for the job that has been given us."

Nearly all the watch signs, probably 90 out of 100, have their hands set at 8:18, but comparatively few people know why this is. It is no accident. W. K. Washburn, of New York, was painting a sign for a jeweler of that city, when the news of the assassination of Abraham Lincoln, April 14, 1865, was received in New York and the jeweler ordered the painter to paint the exact time when the fatal shot was fired, namely 8:18, and so it has continued ever since. Whenever you see a sign affixing this recall to yourself that it points to the fatal moment.

Get a little real taste of war by conserving food "till it hurts." Going without dessert for a week at a time, or eating a slice or two less of bread a day may hurt a little, but remember it's a life or a limb the boys at the front are risking. Painless patriotism won't help much. Cut down on wheat and sweets until it hurts.

It is hoped the fact that a shell from the long-range gun operating on Paris struck a religious gathering yesterday will not have any effect on the regular attendance at Easter services tomorrow. But the fellow who is looking for a good excuse to keep away from religious gatherings can now convince his wife of the "safety first" policy.

Well, we wonder what the Kaiser thinks about eating his Easter dinner in Paris, as per his pre-arranged program. Probably he will be satisfied with a lunch many miles to the rear of the western front. It's been hard "picking" for the old boy the past ten days.

America must feed her associates in this war. They are no longer able to feed themselves, and unless we come to the rescue, they are face to face with starvation. Starvation for them means defeat for us. Don't waste food. Conserve.

The human drive on the western front is still on—but think of the wedge of souls it has taken and the British lines yet uncracked.

Watch your bread box carefully. A slice gone stale is a slice wasted and one less towards that hundred million bushels of wheat we must save for our fighters and the allies.

SENATE MILITARY COMMITTEE INVESTIGATES

WASHINGTON, March 28.—Investigation into delay in the airplane program was begun, by the senate military committee today behind closed doors after days of discussion in the senate which culminated in the assertion by Senator Overman, of North Carolina, that part of the trouble was due to German spies in the Curtis plant, which has extensive government contracts.

Senator Overman asserted that it had been said there are 100,000 German spies in this country, but he believed there are 400,000.

He said he was making no charge against any employe of the Curtis plant, but asserted that some of their names sounded un-American.

Members of the committee were pledged to secrecy, and Chairman Chamberlain announced that no statement would be issued until the inquiry had been completed.

Major General George O. Squier, chief signal officer, and Colonel Deeds, of the aviation branch, were the first witnesses called. They remained with the committee nearly four hours.
