Company, Attention!

We have been doing a nice business with oil stoves and season is still young. Have YOU considered the comfort and economy of owning one. That five gallons of coal oil at a possible cost of 25 cents will do the cooking a month for an ordinary family. Can you make a tier of wood costing \$3.50 do as much. This cut represents one style of the DETROIT VAPOR stove. A stove burning oil gas that it makes as used. Does away with wall wicks or burning rings, the burners being entire cast iron, and good for a life time. Will not ruin cooking utensils, leaves no litter of ashes or dirt about; leaves no bad odors whether in use or not. Nothing to learn that a child cannot comprehend. Remember we do ask you to take the company's guarantee, for we are here to back it up. If after a few days' trial it is not satisfactory we will take stove and cheerfully refund money. But remember our experience of a good many years with the Jewell makes us certain that you will never let it go.
