WINTER
and that is an

Electric Vacuum Washing Machine

The manufacturers guarantee it, and we guarantee it. The guarantee is that it must do satisfactory work. Think of this, a washing that would take you the better part of a forenoon to rub out, done in an hour or two and without any great labor on your part. Five or ten minutes for tub full of clothes. Then run them through the electrically driven wringer, fill washer again and while it is washing the second lot you have swung the wringer over the rinsing tub and put them through, then over the bluing water, put them through, and are done with the first. The second lot being ready, repeat the operation, and there has been no straining or lifting. The cost of machine is still within reach of all—\$95.00 on installments, with a discount for cash.
