

RECONSTRUCTION

The true spirit of the hour is to create the largest opportunity possible to earn a daily wage.

We are spending and are willing to spend millions for the relief of unemployment.

The Umpqua Fishermen's Protective Association and all the business interests of the lower Umpqua are united in a demand from their fellow citizens of Douglas County, not for any undue advantage; not for an appropriation involving a burden on others; but simply for the same opportunity to live and develop a great country industry that is enjoyed on the Rogue and Columbia rivers.

Something has been said about the commercial fishing on the upper river being just as important as that on the lower river. This is a joke. It is only true in the sense that insofar as the right to fish is concerned, that right is as important as it is anywhere. But commercial fishing is not and cannot be done to any considerable extent on the upper river. It never has and never can amount to an industry of any size.

It is a notorious fact that thousands of fine salmon are annually wasted, without either spawning or being taken for sport or commercial purposes. Early in the summer the salmon racks at the hatchery become filled and are closed, so as to prevent any more from either entering the racks or going on up the river to the natural spawning grounds. They are held immediately below the racks, where there are no spawning grounds, and where by law they cannot be taken by any means. They die and rot in the water by the thousands. This unscientific arrangement not only is a great economic waste, but greatly pollutes the water which the people of Roseburg use. It will sooner or later have to be remedied purely on sanitary grounds, if nothing else.

There is but one thing that prevents it from being worse, and that is, that the amount of salmon fry which is yearly returned to the Umpqua River from the hatchery is limited to a small fraction of the number of eggs taken. Should a just proportion of the fry be planted in the river as was the intention, the number of dead fish would be so increased that the water would be unusable.

The small and crude apparatus for fishing used on the upper river does not and never can, by reason of the restricted area in which they are allowed to fish absorb the great surplus that goes to waste.

It is a mistaken assumption that the lower river fishermen catch, or can possibly catch, all, or any considerable amount of the salmon during the open season.

A just and sane plan for the use and development of the fishing industry demands that the same opportunity for taking salmon commercially prevail on the Umpqua as prevails on the Rogue and Columbia. That the amount of salmon in the Umpqua be increased by return to the river a larger proportion of the salmon fry taken in our own hatchery. And that the few local anglers cease their obstruction to the proper and legitimate use and enjoyment of the stream and the building up of a great commercial industry. Joining together and helping to increase the run of salmon for the use and benefit of all, instead of keeping down the amount of salmon to its present limits and jealously wrangling over what we have.

Umpqua Fishermen's Protective Association

LAND IS GOING UP.

If you intend to buy a farm now is your chance. Here are a few of our bargains:

REGULAR SERVICE BEING RESUMED

Word was received here today that the Southern Pacific Co. has again resumed regular service on the branch roads between Tillamook and Cochran and Powers and Marshfield. For the past week these roads have been blocked by high water, snow, slides and other mishaps so that it was necessary to declare all schedules inactive and no trains have been running between these points. The roads have now been cleared, however, and trains have taken up their regular runs. A number of local people having been planning trips to these points have been unable to make the visit on account of the condition of the roads.

NATION WIDE CRISIS.

NEW YORK, Jan. 27.—A nationwide labor crisis is involving the industries engaged in the manufacture of silk and cotton goods, and unless employers concede the eight hour day demanded by employees, Feb. 3, will probably usher in trouble on a vast scale. Woolen goods manufacturers are also involved to a certain extent in the impending trouble.

BOLSHEWIKI ORGANIZATION.

TACOMA, Jan. 27.—A mass meeting to organize a soldiers, sailors and workmen council here was held last night. Some returned soldiers in uniform and many strikers attended last night. Some returned soldiers in uniform and many strikers attended the meeting. Another meeting will be held for the same purpose next Sunday.

GEOMETRY RATIFICATION.

WASHINGTON, Jan. 27.—Thirty-six states have certified to the state department their ratification of the prohibition amendment.

WASHINGTON, Jan. 27.—

Just how many men will be held for duty in the overseas service will be determined by the president, General March declared, but more Americans have already been designated for return home than was originally proposed by Field Marshal Foch, who indicated ten divisions as American contribution. There are still about 785,000 men in camps in the United States and all will be demobilized within a month excepting those returned for overseas duty. Up to Saturday 400,000 men have returned from overseas duty.

AN OLD RECIPE TO DARKEN HAIR

Sage Tea and Sulphur Turns Gray, Faded Hair Dark and Glossy.

Almost everyone knows that Sage Tea and Sulphur, properly compounded, brings back the natural color and lustre to the hair when faded, streaked or gray. Years ago the only way to get this mixture was to make it at home, which is messy and troublesome.

Nowadays we simply ask at any drug store for "Wyeth's Sage and Sulphur Compound." You will get a large bottle of this old time recipe improved by the addition of other ingredients for about 50 cents. Everybody uses this preparation now, because no one can possibly tell that you darkened your hair, as it does it so naturally and evenly. You dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears, and after another application or two, your hair becomes beautifully dark, thick and glossy and you look years younger. Wyeth's Sage and Sulphur Compound is a delightful toilet requisite. It is not intended for the cure, mitigation or prevention of disease.

PRUNING.

Have your fruit or ornamental trees, vines or bush pruned by a man with practical experience; write LOUIS H. BERGOLD

DRESS WARM AND KEEP FEET DRY

Tells Rheumatism Sufferers to Take Salts and Get Rid of Uric Acid.

Rheumatism is no respecter of age, sex, color or rank. If not the most dangerous of human afflictions it is one of the most painful. Those subject to rheumatism should eat less meat, dress as warmly as possible, avoid any undue exposure and, above all, drink lots of pure water.

Rheumatism is caused by uric acid which is generated in the bowels and absorbed into the blood. It is the function of the kidneys to filter this acid from the blood and cast it out in the urine; the pores of the skin are also a means of freeing the blood of this impurity. In damp and chilly, cold weather the skin pores are closed thus forcing the kidneys to do double work, they become weak and sluggish and fail to eliminate this uric acid which keeps accumulating and circulating through the system, eventually settling in the joints and muscles causing stiffness, soreness and pain called rheumatism.

At the first twinge of rheumatism get from any pharmacy about four ounces of Jad Salts; put a tablespoonful in a glass of water and drink before breakfast eating morning for a week. This is said to eliminate uric acid by stimulating the kidneys to normal action, thus ridding the blood of these impurities.

Jad Salts is inexpensive, harmless and is made from the acid of grapes and lemon juice, combined with lithia and is used with excellent results by thousands of folks who are subject to rheumatism. Here you have a pleasant, effervescent lithia-water drink which overcomes uric acid and is beneficial to your kidneys as well.

A MAN IS WHAT HE FEEDS ON
