"Get the Habit!" The Crescent Theatre. DTF  
The famous Russian story of "Michael Strogoff" at The Crescent today and Saturday.  
Grants Pass Observer: Tuesday morning surveyors began making the preliminary survey for the electric road from here to the Illinois Valley and from now on a force of men will be kept in the field. That this railroad will be built is now practically an assured fact and Mr. Collins, the chief engineer, states that the people need not be a bit worried about the road as he intends to build it. He is going at it though he meant business and is asking no odds of anyone. Real estate men who have hesitated about listing lands in the Illinois valley owing to the distance from market are now going into the field and listing not only agricultural and fruit lands but also timber, and arrangements are being made to take options on some of the mining claims in that locality. The Illinois Valley is going to have a boom and one that will last.

He says that the heavy frosts and grasshoppers have ruined all vegetation and crops in that portion of Idaho.—Non-panell.

### Over Thirty-five Years.

In 1872 there was a great deal of diarrhoea and cholera infantum. It was at this time that Chamberlains Colic, Cholera and Diarrhoea Remedy was first brought into use. It proved more successful than any other remedy or treatment, and has for thirty-five years maintained that record. From a small beginning its sale and use has extended to every part of the United States and to many foreign countries. Nine druggists out of ten will recommend it when their opinion is asked, although they have other medicines that pay them a greater profit. It can always be depended upon, even in the most severe and dangerous cases. For sale by Hamilton Drug Co.

### USING OREGON TIMBER

WASHINGTON, July 31.—The \$1,450,000 dry dock for the Mare Island navy yard, now in course of construction at Vallejo, Calif., will be completed in January.  
Francis B. Smith, constructing engineer for the contractors, was in Washington this week conferring with officials of the navy department. The new dock will be of concrete throughout, and Smith talks interestingly of the difficulties which the contractors have encountered: "In the foundation of the dock," he said, "we used 12,260 piles of Oregon fir, driven 40 feet under water into from 20 to 40 feet of earth. Upon that foundation we built a concrete dock—but only after repeated failures."
