THAW A BANKRUPT.

PITTSBURG, Aug. 7.—Harry K. Thaw has declared himself a bankrupt, and Roger O'Mara, a Pittsburg detective, has been appointed receiver for his estate.

This action on the part of Thaw is taken by the wise ones here as meaning that he will fight the efforts of the lawyers, alienists and doctors who helped him during his trial...

Thaw's income is \$33,000 per annum. It is doubtful if any of this can be touched by the creditors on account of a technicality in the father's will.

AFTER FREE DELIVERY.

Grants Pass Making Progress With Postal Department.

A Grants Pass newspaper says: Postmaster Donnell the first of the week received a letter from the department at Washington, D. C., in reply to his formal application for free mail delivery for Grants Pass, stating that the matter had been referred to an inspector, upon whose report the department would take prompt action.

An inspector may be here any day now to look over the city as well as the condition of the streets, sidewalks, the manner in which the streets are lighted and as to how the houses are numbered. The inspector will then make his report to the department and if favorable, and there is no reason to doubt that it will be, an examination for carriers called and soon thereafter free delivery inaugurated.

COPPER PRODUCTION IN 1907.

The smelter production of copper in the United States in 1907, according to L. C. Graton, of the United States Geological Survey, was 888,996,491 pounds. From the record figures of 1906 this is a decrease of 48,809,191 pounds, or 5.6 per cent, the largest actual decrease ever recorded and the largest relative decrease since the American copper industry became important. This is the first time since 1901 that the annual production has been smaller than that of the preceding year, and the first time since 1872, that it has been smaller than that of the second year preceding.

The total given above is made up of the fine copper content of blister produced and of the smelter output of ingot and anode copper from Michigan. Of this quantity, approximately 10,075,948 pounds in blister were produced in foreign smelters from domestic materials exported. In addition to the domestic materials handled, smelters in this country turned out as blister 64,145,448 pounds from foreign ores, concentrates and matte. Domestic blister containing 42,350,963 pounds was exported unrefined, while blister from foreign sources containing approximately 183,530,132 pounds fine copper was imported for refining in this country.

The greatest decreases in smelter output are shown by the returns from the three states that rank the highest. Montana's production, which was 294,701,252 pounds in 1906, was but 224,263,789 pounds in 1907, and the state yielded first place to its rival, Arizona, whose production, however, showed a decrease of nearly 6,000,000 pounds from 262,566,103 pounds in 1906 to 256,778,437 pounds in 1907. Michigan still holds third place with its production decreased from 229,695,730 pounds in 1906 to 219,131,505 pounds in 1907. Decreased production is also shown by the returns from Alaska, Oregon, Washington and North Carolina.

SURROUNDED BY FIRE.

Grants Pass Having a Hard Battle With the Flames.

GRANTS PASS, Or., Aug. 7.—This city is surrounded by fire on every side. On Monday, a fire escaped from the Chaussee place, just outside the city limits, and has been burning over the hills in a most spectacular manner. Today it re-sented itself and swept around the south hill slope in a menacing manner and threatened to burn up the farm houses of Morris, Seville and Morrison and other ranchers on the north and east side of the county road in that vicinity. The buildings were saved by back firing, and the damage was not great outside of fences and a few out-buildings. This morning a number of citizens volunteered to go out and do what seemed best and by noon the number had been increased to 100. In several instances, in its rapid stride of destruction, the fire leaped among places and shot skyward 200 feet, illuminating at night the whole town. By hard work the L. O. O. F. cemetery has been saved and it is thought that Jones Creek valley is out of danger. The heaviest damage is to wood and fences. About 50 men are stationed to-night along the northern part of the city limits to prevent the fire creeping into the suburbs.

May Test Riding Order.

SAN FRANCISCO, Aug. 8.—If the vested statement made here by an army officer today may be considered authority, a general strike will soon be made against the new riding tests ordered by Roosevelt to test the efficiency of high army officers. It is asserted that the order lacks proper legal foundation and that all orders for the "good of the service" should originate in congress.

The sores on the horse were explained by it having been improperly shod and constantly interfering with itself.
