MAKING A WILL.

If You Draw Up Your Own, Stick to the Most Simple Terms.

"If the people," said a lawyer, "who for whatever reason prefer to draw wills without resorting to legal advice would keep just one thing in mind a lot of trouble would be saved. It is nothing save insistence on simplicity. Simplicity is the main thing to make a will effective, and apparently it is the one thing that the will makers forget about. High sounding words and half remembered law phrases come to their minds, and into the documents these verbal extravagances go. There appears to be a popular impression that, for example, to say 'I give and bequeath' is a stronger way of saying 'I give.' Again, take the matter of directions. Here a desire to be explicit frequently results in contradictions, and the longer a sentence in a will is the more likelihood there is of its being open to misinterpretation.

"No will should be drawn without at least a couple of drafts having been made of it, each one being gone over carefully with the idea of simplifying and clarifying it. Give the time to it that the importance of the action demands. Know what you want to do and study out the best way of expressing yourself. Don't put off making a will. I'm superstitious enough to consider that tempting fate. And when a will is drawn remember that it has no legal binding unless the signature is witnessed by two persons, who must themselves witness the document in the presence of the testator and each other."—New York Press.

A BROKEN CUP.

The Way a Queen Saved an Old Servant From Dismissal.

A charming story is told of the former queen regent of Holland, the mother of Queen Wilhelmina. The old king had bought a fine service of Sevres porcelain for the use of the royal family, and he gave orders that any servant who should break any piece of it should be punished by being instantly dismissed. One day a man who had been many years in the royal household confessed to the young queen that he had broken one of these Sevres cups. Queen Emma spoke comfortingly to him and suggested that he should mend the cup. That, said the man, would be useless, for the king would surely notice the cracks. Nevertheless the queen told him to mend the cup as neatly as possible and to be sure to give it to her that afternoon at tea time, when the king would be present. Tea time came, and the queen, after drinking from the mended cup, suddenly rose and let it fall to the floor. It was smashed to atoms.

"Think of me as one of the most awkward of your majesty's servants," she said humbly. "I have broken one of your precious Sevres cups. You must dismiss me at once. I don't deserve to be retained in your service." The arbitrary old king was highly amused at her demure manner and considered the matter a good joke. He never knew the true story of the broken cup.

Chess and War.

The origin of chess is shrouded in mystery. There is little doubt, however, that its birthplace was in India and that it is an offspring of a game called chaturanga, which is mentioned in oriental literature as in use fully 200 years before the Christian era. From India chess spread into Persia and thence into Arabia, and ultimately the Arabs took it into Spain and the rest of western Europe. The game was in all probability invented for the purpose of illustrating the art of war. The Arab legend upon this point is that it was devised for the instruction of a young despot by his father, a learned Brahman, to teach him that a king notwithstanding his power was dependent for safety upon his subjects. The Greek historians credit the invention of the game to Palamedes, who, they claim, devised it to beguile the tedium of the siege of Troy during the Trojan war.

The Slippery Pronoun.

Many are the circumlocutions which have been devised by civilized races in order to avoid the bluntness of direct address. In fact, it may be said that at the moment when a nation standardizes its language it begins to have trouble with its pronouns.

"Thou" has of course become obsolete except in prayer, although it flourishes colloquially in the north of England. The second person plural is substituted. In parts of the south "you all" is heard, a further step toward refined elusiveness.

In France and Germany "thou" has been retained in familiar or semicontemptuous speech. In Spain and Italy, on the other hand, the third person is substituted habitually in place of it.—Harper's Weekly.

Touched.

Mrs. Homespun—The comic papers say you fellows never work. Weary Watties—Y-yes'm; de comic papers also say dat mother-in-laws is a nuisance when everybody knows dat dey are de most sweetest an' angelic uv mortals, an'— Mrs. Homespun—You poor, dear man! Come right in this minute. I will broil a chicken for you.—Judge.

Sorry.

Mamma—Here come your father. See how cross you've made him. Now go and tell him you're sorry. Tommy—Say, pop, I'm sorry you're so blamed cross.—Philadelphia Press.

An Unfortunate Misunderstanding.

"I had to leave my last situation because the missus said they were going to lead the simple life, and they wouldn't want any servants about the place."—Punch.
