SEPTEMBER 3, 1908.

Mr. Harriman evidently likes Oregon better than ever, as he is making a good long stay this time. Since his attention is directed our way we trust he will build a few more railroads in this state, not overlooking the line to Coos Bay.

Talk, alone, will not build good roads—that requires concerted and persistent effort. To be effective that effort will require the application of labor and expense, but the results will bring multiplied returns to any community, if properly directed.

With the new Commercial Club headquarters, 50x100 feet, well under way; the new permanent exhibit building at the depot almost completed; the framework for a big three-story hospital building in place and the work going right ahead, residence building and many other substantial improvements, Roseburg is surely coming to the front rapidly. Douglas county is all doing well.

A number of years ago The Review advised Douglas county people to "plant pears." In several localities the advice was heeded, with the result that thousands of dollars annually are now brought here from abroad in payment for the crops. Again we are urging people to plant orchards, but now no one particular variety of fruit is favored. Apples, pears, cherries, peaches, etc., as well as prunes, will bring splendid returns to the growers. Douglas county orchards are yielding annual crops bringing from \$100 to \$500 per acre. This money from abroad is helping materially toward increasing the wealth of the county. What we should have, and what we are destined to get before long, is orchards covering several thousand acres more of choice Douglas county soil. The opportunities here are unexcelled anywhere and enterprising people are beginning to take hold of them in a substantial way. Again we say, prepare to plant an orchard. Do not delay. Begin now.

**RIDDLE NEWS.**

Miss Evelyn Cornutt, Mrs. Elizabeth Hildebrand and Noah Cornutt, Jr., are visiting at Doe Creek this week.

Miss Essie Martin and Pearl Dyer, of Grants Pass, are in Riddle visiting relatives and friends.

Mrs. Mollie Maynor and Joseph Scott, her brother, are visiting Mrs. W. Q. Brown.

Our S. P. agent, Mr. Boyd, and family will soon move to Oakland, Or., to live. Mr. Boyd having been transferred to that place.

Mrs. O. V. Logsdon and two children and Grandma Logsdon start on Thursday for Chilwood, Or., to visit Mrs. Lily Trapp, a daughter of Grandma Logsdon.

Miss Blanche E. Riddle goes to Medford Saturday to begin her school work the following Monday, for the coming year.

Mrs. Geo. W. Riddle and daughter, Miss Addie Stewart, are spending the week in Portland.

The prune growers are all busy preparing the dryers to take care of the crop, which will be ready for drying in about two weeks.

Mrs. Maude Grant entertained a number of her friends at progressive Salmagundi Saturday evening. Frazer McDonald won the first prize.

Geo. K. Quine, with his pack of hounds, has returned from Pelican Bay, where he has been with E. H. Harriman, the railway magnate, and party for the past three weeks. One bear and lots of other game were captured during the hunt. Mr. Quine speaks very highly of the Harriman family and surely enjoyed his stay with them.

**PIANOS FOR EVERYBODY.**

No Pocketbook Too Small to Own One Now.

Used upright pianos as low as \$50.00. Slightly used pianos at \$140.00 and \$160.00. New pianos fully warranted for Ten years \$220.

New Pianos For Rent. After six months you can buy the piano and what you have paid in rent will apply as part of purchase price.

We have a few second hand organs taken in exchange for pianos which have been put in first class condition. We will accept any reasonable figure if taken at once as we must clean up our floor for the second car load of 17 Bush and Lane Pianos that will arrive about Sept. 5th.

**Bargain Hunters, Here's A Chance.** Start the youngsters in music now on one of these bargain instruments with the privilege of turning it back to us within a year at full purchase price on a better instrument.

**BURR'S MUSIC HOUSE**

**Sick Headache.**

This disease is caused by a derangement of the stomach. Take a dose of Chamberlain's Stomach and Liver Tablets to correct this disorder and the sick headache will disappear. For sale by Hamilton Drug Co.

**HINTS FOR FARMERS**

**Weeds That Sheep Eat.**  
 The Minnesota station gives the analysis of weeds which sheep eat readily and their protein contents compared with alfalfa, clover and timothy hay. It will be a surprise to many to see how high in protein these weeds are, and it suggests the reason sheep flourish on them, worthless as they are otherwise. Here are the analyses: Lambs' quarters, 25.91 protein, 54.64 carbohydrates, 1.96 fat; purslane, 26.13 protein, 53.70 carbohydrates, 2.9 fat; pigweed, 26.54 protein, 62.86 carbohydrates, 1.36 fat; dandelion, 24.64 protein, 58.95 carbohydrates, 2.70 fat; cutnip, 22.25 protein, 63.07 carbohydrates, 2.66 fat; goldenrod, 11.03 protein, 76.83 carbohydrates, 4.85 fat; mustard, 15.75 protein, 75.50 carbohydrates, 1.55 fat; quack grass, 11.27 protein, 79.12 carbohydrates, 1.96 fat; alfalfa, 20 protein, 40.61 carbohydrates, 2.46 fat; clover, 13.35 protein, 52.28 carbohydrates, 3.45 fat; timothy hay, 8.75 protein, 41.76 carbohydrates, 2.16 fat.

**Soiling Crops.**  
 A mixture of Kaffir corn and cowpeas at the Pennsylvania station produced the largest yield of green substance per acre, was relished by the cows and was entirely satisfactory from the standpoint of milk production. Alfalfa produced the largest yield of air dry substance per acre, and the cows seemed to hold up better in milk production when on alfalfa than on any other crops tested. Oats and peas proved satisfactory as a soiling crop. Rye produced the earliest crop and gave a large yield of dry substance per acre, but under average conditions it ripens too quickly to be most satisfactory. The different forage crops tested seemed to have little, if any, effect upon the composition of the milk.—American Cultivator.

**Plans For New Dairy Barns.**  
 For the past two or three years the dairy division of the department of agriculture has been making an investigation of all the principal dairy barns in the United States and a study of the best methods of construction, with reference to convenience, cheapness in feeding and hauling of stock, sanitation, etc. The result is that the division has a large number of plans suitable for building barns and stables of varying costs, so that any one contemplating building a barn can obtain, by simply corresponding with the chief of the division, a set of building plans which will probably just about meet his needs.

**Horse Sense.**  
 Turning the work teams out to pasture at night is better than keeping them shut up in a close, poorly ventilated stable.

Every farmer must have horses. Why not have the best, then, and make a nice little profit on the side from the colts?

The time to sell the colt is when a good price is offered. It's good policy to have him ready to attract the good price, though.

Begin to handle the little fellow when he is very young if you would keep him from getting wild. Be judicious about it, though, at all times.

**Hog Notes.**  
 The hog with large bones is rapidly growing in favor.

Very frequently the feeding amounts to more than the prodigee.

Dipping hogs is no longer a tedious job. The modern tank simplifies it.

An average litter of seven or eight pigs will be pretty nearly sure profit.

A good way to save high priced corn is to provide good alfalfa pasture.

The man who never has dipped his hogs is the man who objects to it most.

A good boar will do a great deal to put the hog end of your farming upon solid footing.—Kimball's Dairy Farmer.

**Silage For Beef.**  
 Everywhere the feeding of silage to dairy cattle and beef cattle, horses and hogs is attracting each year more and more attention. The Ohio experiment station has recently completed a test in which it was established that corn silage under the conditions of the experiment had a value of \$1.03 per ton in feeding for beef. In view of this, let any one not feeding silage consider what he is losing when an acre of corn makes ten to fifteen tons of silage.

**Green Food For Poultry.**  
 The value of green food for poultry lies in the aid it renders the digestion of other foods and in the effect of distending or adding bulk to the ration, besides affording various and valuable nutrients, particularly protein, which food constituent is indispensable in the growth of any animal. Protein is the element of food which produces bone and muscle, and any growing animal in order to thrive must have the required amount.

**Mashes For Poultry.**  
 The feeding of mashes to poultry is not looked upon with so much favor at the present time as formerly, says the Farmers Advocate. However, if mashes are to be fed, skim milk or buttermilk will make a valuable addition to the mash. Milk in any form is a valuable source of protein, and the birds should be fed as liberally as possible of milk and its products.

**A Poultry Hint.**  
 Do not waste too much time trying to cure foris afflicted with some disease that you do not understand. Better kill them at once unless they are valuable exhibition specimens. Keep your fowls clean and dry and there will not be much danger from disease.

**of Use For Over Thirty Years CASTORIA**

Exact Copy of Wrapper.

**ANOTHER PAPER RAILROAD.**

SALEM, Or., Sept. 2.—Articles of incorporation have been filed with the Secretary of State for the Rogue River & Oregon Southern Railway Company, with a capital stock of \$1,000,000. The company proposes to construct a railway from Grants Pass to Waldo, in the southern part of Josephine county, tapping a rich territory.

The incorporators of record are H. B. Haddenburg, Glenville A. Collins and O. S. Blanchard, all of Grants Pass. An office will be maintained at Grants Pass, but the principal office will be at Seattle.

The road would traverse the Rogue River valley and tap large timber holdings in the Siskiyou mountains.

**Do You Open Your Mouth?**

Like a young bird and gulp down whatever food or medicine may be offered you? Or, do you want to know something of the composition and character of that which you take into your stomach whether as food or medicine?

Most intelligent and sensible people nowadays insist on knowing what they employ whether as food or as medicine. Dr. Pierce believes they have a perfect right to insist upon such knowledge. So he publishes, in greatest and on each bottle wrapper, what his medicines are made of and what they are good for. This he feels he can well afford to do because the more the ingredients of which his medicines are made are studied and understood the more will their superior curative virtues be appreciated.

For the cure of woman's peculiar weaknesses, irregularities and derangements, giving rise to frequent headaches, back-ache, dragging-down pain or distress in lower abdominal or pelvic region, accompanied, oftentimes, with a debilitating, pelvic, catarrhal drain and kindred symptoms of weakness. Dr. Pierce's Favorite Prescription is a most efficient remedy. It is equally effective in curing painful periods, in giving strength to nursing mothers and in preparing the system of the expectant mother for baby's coming, thus rendering childbirth safe and comparatively painless. The "Favorite Prescription" is a most potent, strengthening tonic to the general system and to the organs distinctly feminine in particular. It is also a soothing and invigorating remedy in cases of nervous exhaustion, nervous prostration, neuralgia, hysteria, spasms, chorea or St. Vitus's dance, and other distressing nervous symptoms attendant upon functional and organic diseases of the delicate feminine organs.

A host of medical authorities of all the several schools of practice, recommend each of the several ingredients of which "Favorite Prescription" is made for the cure of the diseases for which it is claimed to be a cure. You may read what they say for yourself by sending a postal card request for a free booklet of extracts from the leading authorities, to Dr. J. C. Mullein, Hotel and Surgical Institute, Buffalo, N. Y., and it will come to you by return mail.

Review printing always the best.

**GOOD ROAD SUGGESTION.**

Why County Fairs Offer Good Openings For Starting Reform.

One of the most practical suggestions yet offered for the creation of sentiment for good roads is that put forward as follows in the Metropolitan Magazine:

"The county fair offers a peculiarly good opening for starting reform. Here are gathered the brains and brawn of the community—intellect, it is true, on diversion and recreation, but equally diversion to the material benefits to be derived from the numerous meetings where a free interchange of ideas is insured. Secure some good speakers; make it known by circular or through the columns of the county and town papers that the good roads problem at the next county fair is to be discussed by local talent and by men trained in the actual field work of this important business. There will be no difficult task in securing interested audiences, and it will be the exception if results are not manifested either in the change of feeling or in the organization of a reform movement. Meetings of boards of trade, granges, both state and local; educational conventions, chambers of commerce and such functions are also good starting points for effective work in the good roads movement."

Public spirited thinkers whose minds can transcend the needs of the immediate present, says the Atlanta Constitution, are impressed with the wisdom of pushing the propaganda for good roads side by side with that for better transportation facilities by rail or water.

What will it avail to double track trunk systems and construct more individual lines and deepen navigable rivers if we make access to them along the country roads difficult, slow and expensive?

The county fair is an established institution in Georgia. It is a great degree as the other popular meetings to which reference is made in the foregoing excerpt.

If the importance of good roads is made a topic of discussion at such gatherings and at such state wide assemblies as that comprised in the Atlanta Interstate fair the substantial progress legitimately expected hardly lends itself to computation.

**PREVENTIVE OF DUST.**

Calcium Chloride Tried on a Road in Washington.

Officials of the agricultural department have made experiments with the use of calcium chloride as a dust preventive, and the tests were attended with great success. A stretch of road in the city of Washington was selected for the trial, and in preparation for the treatment all dust and dirt were scraped from the surface of the roadway. A solution was prepared by mixing 300 pounds of commercial calcium chloride granular, containing 75 per cent calcium chloride and 25 per cent moisture, with 300 gallons of water in an ordinary street sprinkler, care being taken to agitate the liquid thoroughly before applying it to insure a uniform solution. It was then applied from one sprinkling head, the sprinkler passing slowly back and forth over the road to facilitate the complete absorption of the solution.

Each application consisted of 600 gallons over an area of 1,282 square yards, or 0.58 gallons per square yard. A marked improvement in the condition of the road was noted at once, and after the second treatment it was necessary to repeat the operation only at isolated spots. The use of the water wagon, which had before made regular trips over the road, was abandoned as unnecessary. The texture of the road surface was completely changed after the application of the calcium chloride. Before treatment traveling was excessive in spots, and the whole surface seemed loosely knit together. After the second application this condition changed, and the road surface became smooth, compact and resilient.

**Oiled Macadam as Rain Defier.**

During a long continued period of wet weather at Kansas city and vicinity the merits and disadvantages of different roads were strongly emphasized. The dirt roads, though fairly good in favorable weather, were all most impassable in many places. But the macadam roads that had been oiled were in excellent condition. After the oil has penetrated the macadam no amount of water can affect the firmness of the paving. The rock roads have heretofore been extremely dusty in dry weather and sloppy and ratty in wet spells. Since oil has been applied to the surface they remain practically the same regardless of the state of the weather.

**Quick Road Work.**

Bright and early one morning twenty-two farmers living south of Trenton, N. J., undertook the task of putting a quarter mile stretch of road in a passable condition. It was as determined a set of men as ever assembled for a purpose. Every man was a volunteer and gave his service freely. Their work was admirably accomplished, and a road that was fraught with danger for travelers was in a single day transformed into one that may now be used for heavy drayage as well as for pleasure. The number of loads of clinders hauled during the day by the farmers amounted to over 200.

**Dust Layer.**

Water gas tar makes a satisfactory dust layer when used in moderate quantities on roads already in fairly good condition. It can be applied to good advantage with an ordinary sprinkling cart.

**NEWPORT**  
 YAQUINA BAY  
**Oregon's Matchless Beach Resort**  
 The place to go for perfect rest and every conceivable form of healthful and delightful recreation.

**ITS FACILITIES ARE COMPLETE**—Best of food and an abundance of it. Fresh water from springs. All modern necessities, such as telegraph, telephone, and markets freshly provided every day. Fuel in abundance. Cottages partly furnished or unfurnished to be had cheaply. Strict municipal sanitary regulations.

**NEWPORT** is reached by way of the Southern Pacific to Albany or Corvallis, thence Corvallis and Eastern R. R. Train service daily and the trip a pleasure throughout.

 General Passenger Agent, Portland.

**How to Get Strong.**

P. J. Daly, of 1247 West Congress St., Chicago, tells of a way to become strong. He says: "My mother, who is old and was very feeble, is deriving so much benefit from Electric Bitters that I felt it my duty to tell those who need a tonic and strengthening medicine about it. In my mother's case a marked gain in flesh has resulted, insomnia has been overcome,

**September Pacific Monthly Containing Martin Eden is here-**

This wonderful story is the greatest of Jack London's great novels. It is written as a thinly veiled story of this great author's life.

Don't miss the first installment of this story. Published exclusively in the Pacific Monthly. It contains many other interesting articles this month.
