The old, reliable poison oak remedy: Marsters'. Guaranteed to cure Cheapest accident insurance—Dr. Thomas' Electric Oil. Stops the pain and heals the wound. All druggists sell it.

### TWO LOVES.

May Loring was a winsome brunette of eighteen when she taught in the mountain village of Greendale.

Harry Hayford was a young man of untarnished reputation. His honest blue eyes excited envy in the bosom of many a lass, and even May Loring's proud heart thrilled with admiration when his rich baritone filled the church as he led the village choir.

But May had other ideals. She longed to be a real heroine in one of life's wild dramas. She cared for Harry more than she dared admit, but tried to assure herself that she was only flirting with him. Harry, on the other hand, became deeply in love. As they sailed in the moonlight or rode through the shady woods on Sunday afternoons he talked incessantly of happy days to come. May allowed him to talk as he would. She thought it romantic to hear him thus converse.

Summer waned. Soon came the time for May to return to her home. Harry's length grew disturbed. May had hardly intimated that she cared for him, and of late he had sometimes thought her cold. What could she mean? He must know, for soon they must separate, and, oh, would they part forever? By chance they did not meet until the day prior to May's departure. May's cheerful loveliness soon dispelled Harry's apprehensions, and they wandered through the wild-wood to have their farewell talk. Coming to a shady dell, May sat down upon a knoll, while Harry reclined at her feet.

For the moment May's heart somewhat relented when she realized how infatuated Harry had become. Her lips trembled, and her eyes drooped. Harry of course noticed the change. He interpreted it to mean more than it did and passionately exclaimed: "May, oh, May, you care for me! Tell me before we part that you love me; that you'll be mine!"

May's countenance changed, and there was silence. Did he guess that in her mind was that handsome stranger she had met in vacation? Whatever were his thoughts, he remained silent. Like a statue he now stood, gazing upon her downcast face.

May's cheek was pallid, but her voice was cold and decisive as at length she replied: "Your wishes are exorbitant indeed. I never can love you."

Again a moment he stood proudly and then turned aside, saying: "Then, Miss Loring, we must part."

She saw him disappear among the trees. The following day they both left the village, she for her village home, he for another clime.

Mr. Sidney, with whom May had become enamored the vacation before, resumed his attentions as soon as May reached the village. With his easy manner, elegant address and jaunty style he was May's ideal. Yet, after all, there was something about him that she repulsed. Despite her efforts to dispel thoughts of Harry her imagination oftentimes turned to him. Now that he was gone she felt his loss. She often secretly longed to look into his old eyes and then for the moment dislaid the restless demeanor of Mr. Sidney. But still the latter fascinated her, and she implicitly trusted him.

Thus a few months passed, and too soon Mr. Sidney was summoned, as he said, to his home. It was then that May learned that he had fished her; that all his charming pretenses had been false. Her tear stained eyes read the paragraphs where his marriage with another was announced.

Pain seldom comes singly. May was scarcely calmed when a message came that cut her still more deeply. Harry Hayford, the report read, and it had every proof, had died in an explosion in a mine.

Poor May's last hope vanished. Thoughts of the past were painful, and to evade them she destroyed every reminiscence. Removing to another place, she took up the duties of preceptress.

Twelve years passed, bringing little change. May's laughing black eyes became serious, but they were gentle and tender. The children adored her. Her friends admired her and came to her for counsel and advice. Felicity apparently was hers.

At last the illness of her mother recalled her to her native town. She entered it with aching heart. But, ah, she knew not fortune! It happened that one afternoon she was invited to the home of a friend. During a short interval that she was left alone she took up a case of photographs. As she looked at them her eyes fell on one that made her heart bound and flutter. Old memories were brought vividly back, and, without resisting the impulse, she pressed the photo again and again to her lips.

"May!"

She could not believe that she heard, and terror seized her. The voice so strangely familiar now seemed weird and unearthly.

Gaining courage, she looked up. Dazed beyond measure, she felt her brain confuse. Fainting, she fell into Harry Hayford's arms.

When she recovered of course there was an explanation. It was another Harry Hayford that had been killed.

May, the schoolmistress, would be schoolteacher no more.

For a Sprained Ankle.

A sprained ankle may be cured in about one-third the time usually required, by applying Chamberlain's Liniment freely, and giving it absolute rest. For sale by Hamilton Drug Co.

### BAD BLOOD

"Before I began using Cascarets, I had a bad complexion, pimples on my face, and my food was not digested as it should have been. Now I am entirely well, and the pimples have all disappeared from my face. I can truthfully say that Cascarets are just as advertised. I have taken only two boxes of them." Clarence H. Griffin, Sheridan, Ind.

**CALIFORNIA FIG SYRUP CO.**  
 by whom it is manufactured, printed on the front of every package.  
 SOLD BY ALL LEADING DRUGGISTS.  
 one size only, regular price 50¢ per bottle.

#### Fit and Poultry.

The most expensating and one of the hardest enemies the poultryman has to combat is rats. At times they become very bold and not only attack the chickens at night, but venture forth in broad daylight. Several methods have been tried, and some are very successful. Poison, traps and dogs are the most effective, but each has its drawbacks.

To poison is probably one of the most effective methods in killing the rodents, but care has to be exercised when placing it out, as other animals are liable to get it. A few grains of strychnine placed on a piece of toasted cheese or bread is one of the best. By placing it in the middle of a small drainpipe danger of other animals getting it may be avoided.—Arkansas Experiment Station.

#### A Traveling Man's Experience.

"I must tell you my experience on an eastbound O. R. & N. R. train from Pendleton to La Grande, Ore.," writes Sam A. Garber, a well known traveling man. "I was in the smoking department with some other traveling men when one of them went out into the coach and came back and said: 'There is a woman sick unto death in the car.' I at once got up and went out. I found her very ill with cramp colic; her hands and arms were drawn up so you could not straighten them, and with a death-like look on her face. Two or three ladies were working with her and giving her whiskey. I went to my suit case and got my bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy (I never travel without it), ran to the water tank, put a double dose of the medicine in the glass, poured some water into it and stirred it with a pencil; then I had quite a time to get the ladies to let me give it to her, but I succeeded. I could at once see the effect and I worked with her, rubbing her hands, and in twenty minutes I gave her another dose. By this time we were almost into La Grande, where I was to leave and went out. I found her very ill with cramp colic; her hands and arms were drawn up so you could not straighten them, and with a death-like look on her face. Two or three ladies were working with her and giving her whiskey. I went to my suit case and got my bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy (I never travel without it), ran to the water tank, put a double dose of the medicine in the glass, poured some water into it and stirred it with a pencil; then I had quite a time to get the ladies to let me give it to her, but I succeeded. I went to my suit case and got my bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy (I never travel without it), ran to the water tank, put a double dose of the medicine in the glass, poured some water into it and stirred it with a pencil; then I had quite a time to get the ladies to let me give it to her, but I succeeded. I could at once see the effect and I worked with her, rubbing her hands, and in twenty minutes I gave her another dose. By this time we were almost into La Grande, where I was to leave and went out. I found her very ill with cramp colic; her hands and arms were drawn up so you could not straighten them, and with a death-like look on her face. Two or three ladies were working with her and giving her whiskey. I went to my suit case and got my bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy (I never travel without it), ran to the water tank, put a double dose of the medicine in the glass, poured some water into it and stirred it with a pencil; then I had quite a time to get the ladies to let me give it to her, but I succeeded.
