

GENERAL NEWS.

Frank West Rollins, ex-Governor of New Hampshire, pleaded guilty at New York, Friday, to the charge of conspiracy to defraud the Government of customs duties, and paid a fine of \$3500.

President Taft has told several callers he intends to stand by Secretary Ballinger, for he is convinced of Mr. Ballinger's innocence either of wrongdoing or of improper motives. The President says that he does not consider that Ballinger's accusers have made out any case against him. On top of this announcement from the White House comes the reiteration of Secretary Ballinger's purpose to hold on to his position, notwithstanding a renewal of the reports in friendly papers that he is soon to resign.

The joint convention between the United Mineworkers and the Illinois operators adjourned at Peoria, Friday, and a strike was declared by the miners. This strike affects the entire state of Illinois and will involve between 72,000 and 75,000 men, and it is said that in the miners' strike fund there is now about \$750,000, or \$10 per man. The mines already have been suspended for 50 days without this fund being drawn on, but it appears insufficient for a prolonged strike.

"Guilt of murder in the first degree" was the verdict returned Friday night at Colville, Wash., by the jury in the case of George Popoon on trial for poisoning his wife at Northport, Wash., August 29, 1905.

The 12-inch gun on the North Dakota require a smokeless powder charge of 350 pounds for a single shot. An illustration in the June Popular Mechanics shows a powder operator handling this monster charge. The projectile and powder for a single shot cost near \$1000.

DOUGLAS COUNTY NEWS. AS TOLD BY EXCHANGES.

Oakland Advance. F. A. Henderson, of Norfolk, Neb., is visiting here with his brother, J. A. Henderson. C. M. Henderson, son of F. A., came also.

W. A. Taylor left on Monday for a business trip to the Shaniko country, in Eastern Oregon.

Mr. and Mrs. W. H. Kelly have gone to London mineral springs for the relief of his rheumatism.

Mr. and Mrs. W. J. Stokes and son, Will, and Mr. and Mrs. J. M. (Stokes) Cross arrived here from Jennings, La., last week and have located in the Dr. R. E. Hunt house east of town.

Miss Lella Prim left Thursday to visit relatives at Eugene and Portland, after which she will go to her home at Jacksonville. Miss Prim made a good record in her work as teacher in the seventh and eighth grades of the Oakland school, but declined re-election.

ATTACKED WHILE ON DUTY.

Engineer of Great Northern Railway Stricken With Appendicitis.

He was immediately operated on and died shortly after. Appendicitis comes quickly—in a flash it may be upon you. If everybody knew of the discovery of a German physician, this engineer might be alive today. A German physician has discovered a simple remedy for treating appendicitis without operation, although perhaps in very rare cases, operation may still be advisable. The remedy, called Adler-ika, is composed of buckthorn bark, glycerine and other simple ingredients scientifically compounded.

Because Adler-ika COOLS the diseased parts and DRAINS OFF all impurities, which no other medicine can do, ONE DOSE instantly relieves stomach or bowel trouble. The drug store of the Red Cross Pharmacy reports large sales and wonderful results.

Almost any doctor will tell you, if your bowels do not move each day, or if you have wind or gas in your stomach or bowels, or a heavy feeling after eating, you may very likely get appendicitis. By taking Adler-ika just once each week, Appendicitis can gain no foothold.

A valuable book, showing many pictures of the curious little Appendix, and telling how Appendicitis is caused, and how you can easily guard yourself against it, can be secured free for a short time at the above drug store. You should read this book and take no chances.

CHILD'S DISCOVERY WILL FREE FATHER.

CROOKSTON, Minn., May 26.—Elbert, the 13-year-old son of Patrick J. F. Fearon, a prisoner at Fort Leavenworth, Kan., while playing in the attic of his mother's home yesterday, found five Blum papers in fact, for the supposed destruction of which his father, a former land office clerk in the Government offices here, was sentenced to 18 months' imprisonment. Fearon repeatedly told the court during the trial that he had not destroyed the papers, but was unable to tell what was done with them. On this new evidence a movement has been started to get President Taft to pardon Fearon, and Judge Morey has intimated that he will recommend clemency.

NOTICE TO THE PUBLIC.

Beginning June 1st, our terms on all credit accounts will be strictly thirty days. Interest at 10 per cent will be charged on all accounts not paid when due. All persons now owing us accounts that have been standing more than thirty days are hereby notified to settle same by June 1st. JOSEPHSON'S.

TRUTH NUMBER 11

The Stock of the California National Crude Oil Company advances to 50 cents per Share on May 28

THOSE stockholders who have purchased stock and those who are about to purchase at 40c per share, are about to realize 25 per cent on their investment already, as the stock goes to 50 cents this coming week. And this isn't the first advance either. There is no doubt in our minds that you will see this stock soaring way up in dollars soon, and when you do, we know you will wish that you had a larger block. We would advise all who can possibly do so to purchase before the end of the week and take advantage of the rise.

For making big money, there is nothing in the investment world today that will bear comparison for a moment with the opportunities afforded by California oil stocks.

Dozens and scores of these stocks are selling today for many times the prices at which they were originally placed on the market.

In the advance of the past year many of them have yielded profits of several hundred per cent to investors.

In production and earnings the oil wells have distanced the gold mines.

Thousands of people enjoying a competence today owe their good fortune to moderate investments in California oil.

By still other thousands the successes of the past will be duplicated during the present year.

Now, don't be a pessimist and say that this is impossible. Facts are facts, and if you only take the trouble to look into same you will find that this is true.

The writer came across a beautiful article some time ago entitled "The Optimist Versus the Pessimist." Read it, it won't hurt you.

The Optimist Versus The Pessimist

"The optimist lives under a clear sky, the pessimist lives in a fog. The pessimist is confused; he hardly knows where to go, what to do or how to act; the optimist is in tune with the harmonies of nature and discerns distinctly the onward path that lies before him. The pessimist hesitates, and loses both time and opportunity; the optimist makes the best use of everything now, and builds himself up, steadily and surely, until all adversity is overcome and the object in view realized. The pessimist curbs his energies and concentrates his whole attention upon failure; the optimist gives all his thought and power to the attainment of success, and arouses his faculties and forces to the highest point of efficiency. The pessimist waits for better times, and expects to keep on waiting; the optimist goes to work with the best that is at hand now, and proceeds to create better times.

"The optimist is an inspiration to everybody; the pessimist a wet blanket. The pessimist pours cold water on the fires of his own ability; the optimist adds fuel to

those fires. The pessimist links his mind to everything that is losing ground; the optimist lives, thinks and works with everything that is determined to press on. The pessimist places a damper on everything; the optimist gives life, fire and go to everything. The pessimist repels everything; the optimist attracts everything. The pessimist fights the wrong; the optimist works to increase the power of the right. The optimist is a building force. The pessimist is always an obstacle in the way of progress. The pessimist lives in a dark, soggy, unproductive world, the optimist lives in that mental sunshine that makes all things grow."

Do you realize how true all this is? Don't you appreciate that the optimist is the successful man? The optimist is the man who invests for he believes some good will come from such an investment, and as every real fortune that ever was made resulted from investment, it is optimism that makes success.

The pessimist is the man who looks with suspicion upon all investment opportunities, and while he is hemming and hawking and failing to act, an optimist grasps the opportunity, make his investment, and gets his start in life.

It required a generous supply of optimism for men to go ahead and develop what is today the greatest wealth producer in the world—California Oil Lands—but their optimism has been repaid.

Allan G. Nichols, editor of the "Oil Industry," gives a few pertinent facts in a recent issue of one of the leading daily papers, and he writes regarding this wonderful Oil Industry.

"Only a half-century old the oil industry in the United States has already exported more than \$2,000,000,000 worth of the refined material. In other words, in fifty years the total amount received for refined oil exported has been greater than the value of the entire production of gold in the United States since Columbus discovered America. Since 1866, the year in which sixty small casks were sent to France as an experimental shipment, the amount exported has been greater in value than the production of gold in the entire world for the same period. Within the memory of living man the infant has grown to a giant industry that gives employment to 70,000 men in the fields and

refineries alone, and whose annual payroll amounts to millions of dollars.

"The spring pole rig used along Oil creek has given place to modern machinery, operated by carefully trained men. The ox trains that hauled oil in barrels over roads unworthy of the name have been succeeded by thousands of miles of steel pipe line, great trains of oil tanks and the modern oil-carrying ships, whose capacity in some cases is over 80,000 barrels.

"Everything that coal has done for the East, crude oil is doing for California, and since its general use, less than ten years ago, ways and means have been devised to use crude oil in California, the same as coal is used in other parts of the United States, and the public at large have shown their appreciation of its value by the adoption of crude oil wherever fuel is needed. As a result of this a stream of gold is distributed in California to holders of California Oil Company stocks, which amounts to many millions of dollars per year."

W. W. Orchutt, one of the most prominent consulting engineers and geologists in this country, in a recent report on a California Oil Company, had the following to say about California oil lands:

"There is no place in the world where the oil measures are so amply and thoroughly saturated as in California. This makes California oil wells big producers and long-lived." He then goes on and cites incidents where even on large acreages, such as 120 acres, the production today has been as high as 90,000 barrels per acre, and the land still producing heavily.

The investor with sufficient judgment to see these great possibilities, and the optimism, which generates nerve to back this judgment, will be literally swept to fortune on this great flood of oil which flows through the proven fields of California. The optimism and courage of the pioneer oil men of California have

made them millionaires. They learned the truth of that great saying: "One good investment is worth a lifetime of labor."

What optimism and oil have done for others they will do for you, for really only the surface of the possibilities of California oil have been scraped. There are today numerous new companies just starting to develop their land, in which stock can be bought at extremely low figures. Within two years we will undoubtedly find the stock of the great majority of these companies listed on the stock exchanges, and paying the same kind of generous dividends that so many of the other companies are now paying after perhaps only two years of operation.

All this is possibly interesting reading, and we trust that truths given here will sink deep into the hearts of our readers, and that they will start on the comparatively easy road to making money by having the optimism and courage to make investment in some good California oil stock."

NOW

We have shown that you should be an optimist, at least as far as California oil is concerned. Now, you being an optimist, we will tell about one of the companies that will soon stand, if not at the head, at least very near the head of the California Oil Producing companies, and that is the California National Crude Oil Company. This company has purchased thousands of acres of land in the Coalinga Oil District, which is recognized as the largest producing oil district in California. It is selling stock for the development of the same. The par value of this stock is one dollar, and the present purchase price is 40 cents. It is only a question of a short time until the stock will be selling at par. We advise the early purchase at 40 cents. Remember this stock goes to 50 cents on the 28th of May and not a share can be bought for less after that date. Now, don't hesitate. Buy now, and do so quick.

WHAT THE KIDNEYS DO.

Their Unceasing Work Keeps Us Strong and Healthy.

All the blood in the body passes through the kidneys once every 20 minutes. The kidneys filter the blood. They work night and day. When healthy they remove about 500 grains of uric acid matter daily. When unhealthy some part of this waste matter is left in the blood. This brings on many diseases and symp-

toms—pain in the back, headache, nervousness, hot, dry skin, rheumatism, gout, gravel, disorders of the eye sight and hearing, dizziness, irregular heart, debility, drowsiness, drops, deposits in the urine, etc. But if you keep the filters right you will have no trouble with your kidneys.

George Proffman, 242 1/2 3rd Street, Roseburg, Ore., says: "It gives me pleasure to recommend Doan's Kidney Pills, for they have been used in my family with the most excellent

results. I do not think there is any preparation on the market as effective as Doan's Kidney Pills in relieving pain in the back and other symptoms of kidney trouble."

For sale by all dealers. Price 50 cents. Foster-McBarn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

Alfred Peats wall papers, the best in America, at Fisher's.

Coming to Roseburg June 9, Clinton W. Howard, the "Little Giant." Great as an entertainer, great as an instructor and sincere as the prophets of old. Portland Oregonian, September, 1905: "The climax of the Temperance Congress was reached yesterday when Mr. Howard preached in the White Temple in the morning and to a packed mass meeting that packed the Grand Theatre at 3:30 p. m. He is the most forceful advocate on the temperance platform, little in size, but a whirlwind in action. He

held the men for two hours in an address that was brilliant in thought and tremendously magnetic." dsw

The price of foodstuffs has come down at the North Side Grocery. "Three Acres and Liberty" is the author tells the possibilities of an acre. Where to find it, land, how to select, clear and cultivate it. A practical book. \$1.75 net. By mail \$1.85. at Roseburg Book Store.
