Thanks to Manager Lacey of the Palace for another fine full Sunday night and week-end concert. The Philby Pelz concert trio is something worth while in the music line. Piano, violin, cornet and tuba are heard in highly pleasing solo and ensemble numbers. It is not one of those concert companies that, to draw an audience, play under the auspices of such-and-such an organization, and then waste the patience of the listeners by a monotonous sameness of classics, unrelieved by something light. The Pelz trio are not only artists, but they are practical and really entertaining. The higher standard numbers are rendered with consummate ease and skill, and a popular air in fact, as if it were your own. In rendered here and there in an encore. The program of the two Sunday nights was just such a program as Roseburg audiences like, and the audience did not hesitate to tell Manager Lacey so as it filed out of the theater. The trio will be heard again tonight, in addition to the regular full of "moving" features, the second of Bud Rickel's series of Mutt and Jeff cartoons in the regular Pathe Weekly.

Riddle Trueman, Friday evening Bert Moore and his sister, Rhel Moore, had a narrow escape from drowning in the Umpqua River near Hart Creek, while trying to ford the stream when the water was at a dangerous stage, and they escaped by a narrow margin and in an exhausted condition. They drove into the river in a hurry and when in midstream the rig was overturned by the current. The team broke loose from the rig and landed on an island. The rig again drifted toward the bank, but her heavy weight was soon waterlogged and a rescuing boat soon when her brother seized her and managed to reach the bank with her. A brother of the two, Andrew Moore, reached the scene on horseback when the two were struggling in the water, and because they could not save themselves, plunged his horse into the river with a view to getting up the rig, but the horse refused to, so, with the boat finding to be secured on the bank, in the bed of the stream, threw the horse off his feet and Andrew was now forced to swim for his life, and he barely reached the bank, having exhausted the saddle horse, saved himself from the down the stream.

Fred Bateman was in from Cleveland today, bringing in the skin of a large cougar which he killed in the Coast Range mountains. The hide measured nearly 8 1/2 feet. The animal was treed by J. F. Culver's dogs which Mr. Bateman has out there. This is the fourth cougar which Mr. Bateman has killed with the use of these dogs. Mr. Cougar dined on a full dinner of deer meat, as Bateman discovered upon skinning him, and his tardy death means that deer will not now be so scarce in the region where he was wont to roam for his prey. The hide is hanging in front of Culver & Company's hardware store.

ROSEBURG DRUGGIST MAKES A STATEMENT.

We always advise people who have stomach or bowel trouble to see a doctor. But to those who do not wish to do this we will say: try the mixture of simple buckthorn bark, glycerine, etc., known as Adler-Lika. This simple new remedy is so powerful that JUST A SINGLE DOSE usually relieves sour stomach, gas on the stomach, and constipation QUICKLY. People who try Adler-Lika are surprised at its QUICK action. The Car That Made The Hit At The Seattle Auto Show

HERE'S the ANSWER to EVERY DEMAND THAT IS MADE OF AN AUTOMOBILE

You will soon be deciding which car you will buy for the season of 1913. You want the best, no matter what price you pay. You want a car that will hold up for years to come. You want a car that has permanent features, not temporary ones.

Here's the Answer—The new 1913 Mighty Michigan "40." Examine it closely, critically, minutely. Note the size and strength of the vital parts. Note the size of brake drums, strength of frame, size of axles and of the driving parts.

Want a Safe Car—The Mighty Michigan "40" is built to average 50 per cent over capacity. All the parts are made of heavy material, giving you big margins of safety.

Here's One Thing You Should Insist Upon—Four forward speeds, not the usual three. In Europe, 318 of the highest priced cars.

The New Michigan "40" has center control and left side drive. That's what you want, so when driving you are free to pass cars.

The Self Starting Problem is answered in the Mighty Michigan "40." No more reliable starter has been made, none so simple, so easy to operate, so light in weight. An accurate record has been kept of fifty thousand cars, and in not one case did the electric starter we use, and in Not One Case did the starter fail.

Up to You—We have made a car that embodies every demand you can make of a car. We have given you three hundred of the features. There are others we have not mentioned; we want to Show them to you, not Tell you of them.

Features in An Automobile are largely a question of cost. Light parts, small tires, three speeds, etc., are due to economy only. Cars—short and narrow are built that way because size adds to cost. When you inspect the Mighty Michigan "40" you will find the wheel base 118 inches, the rear cushion, on the inside, 50 inches wide.

And Yet With These Features—every one a permanent one—the Mighty Michigan "40" fully equipped will cost you \$1800.00. Find, if you can, any car that offers nearly so much for this money.
