IGNEOUS ROCKS.

Igneous is derived from the Latin word ignis, meaning fire, and igneous rocks are those which geologists say were produced from the action of heat. Igneous rocks are divided into two great groups, volcanic and plutonic. The volcanic, as the name implies, are those brought to the surface by volcanic action, while the plutonic are those which have solidified below the surface of the earth and have been exposed by wearing away of the strata above them.
