RECENT WARM SPELL DAMAGED FALL WHEAT; RAINS WERE BENEFIT

Exhausted by a summer of the long continuance in Oregon, for the week ending June 20, 1916, as reported by the local office of the weather bureau at Salem, Oregon, the weather was, whether you would like to say so or not, a relief.

It was a relief, whether you would like to say so or not, a relief. It was a relief, whether you would like to say so or not, a relief.

GAMBLING IS LIKED

Soldiers Wager on Their Chances of Recovery

OTHER FORMS OF GAMBLING

Some Soldiers Have Offered to Bet That They Will Live Through the War Regardless of How Long it Lasts

TRIPPLE, June 16.—(By mail.)—Every man is born a gambler. Some succeed in winning the contest, others lose. Some win and then gamble again, while the rest are at all the time betting with death.

I have just been told of a young soldier who volunteered to the last moment class. He is badly wounded and in a hospital far from Verdun, but they say he tries to get with his hands on his fingers of recovery, he agreeing to take either side of the wager.

formed as that the day before, West lake had stopped out 25 bags of grain, 100 tons and a bear for market.

The postoffice was established a few months ago and now has a daily mail service, the mail being brought across the lake from Ada station.

At the season, 2000 to 3000 people visit the owners were busy with some assistants getting ready to manufacture lumber.

They have recently purchased and have on the ground the machinery for a mill of about 5000 feet capacity. They will saw out the frame and put up the building for it at once.

The Westlake hotel, which is a most two-story building, is pleasantly situated on a point overlooking the lake. It has a dining room, a billiard room, office and ladies' parlor, it has about 20 rooms, which will be furnished with hot and cold water. The building is being nicely finished up on the inside and will be an attractive place for spending a vacation. A wide porch extends nearly around the building and from it a very fine view may be had of all parts of the lake, the surrounding hills and railroad in the distance. Only part of the rooms are furnished yet, but good accommodations are ready for a number of guests and the house is certain to become a favorite resort for those who enjoy fishing and boating or who want to breathe the cool ozone without being exposed to the strong wind on the ocean beach.

More Cream Money

More cream means more money. There's cream slipping away every day in your dairy. Thousands of scientific tests have proven beyond question that 95 per cent of all hand driven separators are turned below speed a great part of the time. Every member of the family turns the separator at a different speed. If the speed is allowed to slacken, even for a moment, your separator will lose a lot of cream.

THE NEW SHARPLES SUCTION-FEED

Separator Gets All The Cream All The Time

The bowl draws in just enough milk to insure clean skimming. You can turn fast and get through quickly because the capacity increases with the speed. Your wife or daughter may turn slower—according to their strength. The Suction-feed will always skim clean and deliver smoother cream of even thickness—not thick today and thin tomorrow.

There are no dials to watch—only one piece in the bowl, simple as a necktie ring. The supply can be only low-high. You can empty heavy pails and cans of milk without straining back of arms. Come in and see it for yourself.
