TRIBUTE IS PAID TO THOMAS A. TOWNSEND.

Editor Chas. H. Fisher, of the Salem Journal, but formerly of this city, pays the following deserved tribute to Thomas A. Townsend, formerly of Roseburg, who died a few days ago:

"The death of Thomas A. Townsend in the officers' training camp at Eugene was a distinct shock to this community. To the editor of the Capital Journal it seemed like a personal loss. We had watched this boy's career from the time he carried papers on the Roseburg Review; saw him work his way through the state university and win the highest recognition from his fellow students because he deserved it, and noticed with pride his steady advancement in the field of business. Those who knew Tom Townsend best are brought to realize the awful price the Nation is paying to preserve its menaced honor and its cherished institutions of liberty."

STAGGERING FIGURES.

One of the seven organizations doing welfare work for the soldiers overseas shipped to the men over there during the period from July, 1917, to August, 1918, 1,259,156 cans of fruit; 14,150,000 packages of chewing gum; 848,785,592 cigarettes; 162,824 pounds of cocoa; 10,227,725 pounds of sugar; 318,79,020 tubes of tooth paste; 318,79,020 pounds of flour; 2,557,481 packages of tobacco; 22,358,700 cigars, and 1,665,120 cases of condensed milk. These figures show the need of raising funds to maintain the work of the welfare organizations which serve to keep the morale of the allied armies at its highest point.

NEW DISEASE REPORTED AFFECTING POTATO CROP.

There has apparently a new and very destructive disease appeared amongst the potatoes in the Northwest. The disease is known as the potato wart and is described as follows:

"The wart is a disease attacking the tubers and also the stems, causing irregular, warty outgrowths, beginning in the tender tissues near the eyes and enlarging until the entire potato may be changed into a black and worthless mass. The young plants are whitish or greenish, suggesting a cauliflower head. In the present outbreak the disease manifests itself in a very severe form, though in a limited area, practically destroying the whole crop in many of the gardens affected."

This disease has made its appearance in several parts of the United States and it is very important that its appearance be reported promptly so that vigorous means may be taken to have it demolished. All potato growers are urged to be on the lookout for this disease and report anything that may have the appearance of same to the county agent's office.

SPANISH INFLUENZA RAPIDLY SPREADING

Persons Weak and Run-down Easy Victims—Fortify Yourself Against It By Taking Tanlac.

According to late reports issued by state and Federal health authorities the Spanish influenza epidemic is rapidly spreading to all parts of the country, and it now seems that practically every state in the Union will be seriously affected before it runs its course.

It has not only become a great and terrifying menace to the public health, but unless checked it is apt to seriously affect the progress of war work in all its various departments. Already the Shipping Board has announced that ten per cent of its workers had been affected.

The disease has made its greatest progress in the East, where it has claimed its victims by the thousands. Reports from other sections, however, are equally alarming; and both civil and military authorities have warned the public to take every precaution to prevent its further spread. In many cities schools, churches and theaters have been closed and public gatherings of all kinds forbidden.

Medical authorities agree that people who are weak and run-down are the earliest victims of the influenza epidemic. If you find yourself tired, weak and losing flesh, or if you are in a generally run-down condition, or if you catch cold easily this warning should be heeded promptly. You are really in great danger, because the germ of this disease is very catching and you are apt to fall an easy victim if you come in contact with the germs. People who are well and strong are not likely to contract the disease, because they are able to throw it off. The common-sense way to keep from taking it is to fortify the system against attack by building up the constitution.

In other words to use the old adage, "An ounce of prevention is worth a pound of cure." And if you are in a sub-normal condition the proper thing to do is to begin immediately to build up your powers of resistance. To accomplish this, nothing on earth will strengthen you and build you up like Tanlac, the powerful reconstruction tonic, which contains the very elements needed by the system to give you fighting strength and ward off the influenza germ.

First of all, Tanlac begins its action by creating a good, healthy appetite for wholesome, nourishing food, and assists every organ of the body to perform its natural functions, thus helping to build up health and strength in the natural way.
