

"As a cook, I'm a fine bricklayer"

"SURE THING," I said. "YOU STAY in bed. AND I'LL cook breakfast." SO MY wife agreed. SHE'D TRY it once. AND THE fruit was fine. AND THE coffee—well. SPEAKING roughly. IT WAS fair. BUT WHEN I tackled. FOUR MILK griddle cakes. SOMETHING WENT wrong. THEY LOOKED easy. FLOUR, SODA, and salt. FOUR MILK, one egg. MIX, DROP, cook, flop. BUT SOMETHING went wrong. SO I stacked the cakes. UNDER MY window.

TO MASSACRE. THAT TENOR cut next door. AND I asked my wife. WHY CAKES go wrong. SHE SAID, "It's like THE CIGARETTES you smoke. JUST THINK it over." AND FIRST I said. "THEY SATISFY." BUT SAW that wasn't it. THE NEXT guess landed. "THE BLEND can't be copied." AND I gotta admit. THERE'S SOMETHING in. THIS TALK of knowin' how.

KNOWING HOW is everything in blending cigarette tobaccos. The Chesterfield recipe calls for the choicest Turkish and Domestic tobaccos, expertly blended in the exclusive, can't-be-copied way—our own secret. We do "know how"—and that's why Chesterfields "satisfy."

CRYING NEED OF PLAYGROUND HERE

Community Owes the Children a Place of Recreation and Amusement.

MISS SCHORI GIVES IDEA

Head of Children's Work in Chautauqua Tells of Advantages to Children from Supervised Play—Informal Work Here.

"I most certainly do believe in a play grounds for children. I think that no town of any size should be without a playground and a means of supervised play for their children. Any community owes the children that much so those of tomorrow who have the care of the business men of today on their hands, shall learn some of the first rules of the business world, and learn them in such a manner that they will never forget. We people who love children and who have made it our life work to teach them to begin first on the rules of fair play and we believe as much as we believe anything that if they are taught fair play in their childhood games that they will use fair play when they exchange the base ball and mitt for the tools of a trade or profession.

Miss Schori also thinks in addition to providing merely a place for the children to play, that they should be given supervised amusements. "You are then sure that they are playing the correct games, playing them as they should be played, and are not outdoing their strength, the last being much more important than many people think.

Roseburg has plenty of playground facilities, plenty of people to support it, and above all, plenty of lovely children. It seems to be the most crying need I know of, not only in Roseburg, but in many other of the towns. Many say that even if you can afford a playground you cannot afford some competent person to take charge of it and oversee the children. Then why not arrange for different people in the city to oversee the playground certain days of each week. If each have one day they will not be overburdened but will enjoy the work. When I go into towns with the Chautauqua, I notice at once a difference in the children at those places that have established playgrounds, and those that have not. They are more developed, both physically and mentally, and play up to the "Marquis of Queensbury" rules.

The play which Miss Schori is giving the children during the seven days that she is here is very informal. They play volley ball, dodge ball, base ball, have contest and folk dances, and a great deal of time just "catch." Although in towns of this size she usually has between 60 and 100 children, at the present time in Roseburg there are only about 40. She is anxious that more come and promises them all a good time. Miss Schori is a graduate of Cornell college, and has studied the systems of many large playgrounds. She is also an expert in physical education work of all kinds. At the end of the seven days she will have an exhibition, but it will in no way be a pageant.

NOTICE OF SALE OF GOVERNMENT TIMBER

General Land Office, Washington, D. C. July 3, 1920.—Notice is hereby given that subject to the conditions and limitations of the Act of June 9, 1916 (39 Stat., 218), and the instructions of the Secretary of the Interior of September 15, 1917, the timber on the following lands will be sold August 23, 1920, at 10 o'clock a. m., at public auction at the United States land office at Roseburg, Oregon, to the highest bidder at not less than the appraised value as shown by this notice, sale to be subject to the approval of the Secretary of the Interior. The purchase price with an additional sum of one-fifth of one per cent thereof, being commissions allowed, must be deposited at time of sale, money to be returned if sale is not approved, otherwise patent will issue for the timber which must be removed within ten years. Bids will be received from citizens of the United States, associations of such citizens and corporations organized under the laws of the United States or any state, territory or district thereof only. Upon application of a qualified purchaser, the timber on any legal subdivision will be offered separately before being included in any offer of a larger unit. (Signed) CLAY TALLMAN, Commissioner, General Land Office.

OH, DEAR! MY BACK!

Merciful Heavens, how my back hurts in the morning! It's all due to an over-abundance of that poison called uric acid. The kidneys are not able to get rid of it. Such conditions you can readily overcome, and prolong life by taking "Anuric" (anti-uric-acid). This can be obtained at almost any drug store, in tablet form.

When your kidneys get sluggish and clog, you suffer from backache, sick-headache, dizzy spells, or twinges and pains of lumbago, rheumatism or gout; or sleep is disturbed two or three times a night, get Dr. Pierce's Anuric, it will put new life into your kidneys and your entire system. Send Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., ten cents for trial package.

SAN FRANCISCO, CALIF.—"I have used Dr. Pierce's remedies in my family for fifteen years and have found on every occasion that they gave satisfactory results. Recently I was troubled with my kidneys and my back constantly pained me. I took three packages of Dr. Pierce's Anuric Tablets which removed all pain and cleared up conditions. I advise every one to give Dr. Pierce's remedies a fair trial."—Mas. E. EVE, 422 Brannon Street.

She will exemplify her way of supervising play ground work and the children will have a contest game.

Conklin Offers Prize to Youngsters

Chester Conklin, who plays at the Antlers Theatre Wednesday evening at the head of a large company from his Hollywood studio, is one of the oldest stars in point of service in the picture business. He started his career with the old Keystone Studios, the same that gave such stars as Charlie Chaplin, "Fatty" Arbuckle, and Mable Normand their critical. Conklin is acknowledged the most critical of the critics to be the equal of any of these. He says that if he were producing for himself right now, he would hate to pay the salaries of such a cast as Chaplin, Arbuckle, Normand and himself. However at the time he broke into pictures, the above mentioned stars appeared in every picture turned out at the Key-

stone studios. There was no such a thing in those days as a comedy star. They all worked side by side, and all dressed in the same sized rooms. Now the star must have a bungalow all to him or herself and many other things before they can get their artistic temperament to work.

Conklin is best known in the character of "Walrus", which character he originated for pictures. He says the inspiration came to him when he was working for the Barnes circus in the long long ago. He noticed that the people gave the walrus a wide berth, and, as he himself is so modest, he adopted the character for the screen. He claims to be the only movie star that has never been photographed without his make up. He has been recognized twice in 8 years, and he promises to the first boy or girl in Roseburg who recognizes him, the replica of his famous "Walrus" monstache, which he will send as soon as he reaches Los Angeles.

After the performance at the Antlers, Conklin will hold a reception in the lobby, at which he hopes to meet and shake hands with every one in the audience. This will be Mr. Conklin's only appearance in Roseburg in real life, so be sure and avail yourself of the opportunity to meet him on that occasion.

Mrs. Selma Childs, of Brownsville is visiting in this city with her daughter, Miss Mabel Childs, of the Hat Shop. Mrs. Childs will remain in the city for several weeks.

Italians Flock to United States

NEW YORK, July 26.—Hoffman Island, detention station of the New York quarantine service now has an average transient population of more than 1,000 a day, due to the inbound rush of Italian immigrants.

In addition, the five doctors attached to the station have given up all thoughts of a vacation and are working, one of the quarantine officials said, to the limit of human endurance in vaccinating, fumigating and inspecting prospective citizens and their families.

The reason for the unusual call for the services of the Hoffman Island station is said to be a misunderstanding on the part of the Italian officials and the steamship companies respecting United States Public Health regulations. Travellers from the districts where typhus carrying is supposed to be "de-loused" examined and certified as "clean" before they board their ship.

These regulations are not being pelled to take a bath from the tops and therefore the delousing and fumigating must be done before the traveller is landed. The expense of the work is charged to the steamship companies.

During the last week more than a half dozen ships have arrived from ports where typhus carrying suspects could be taken on board. All of these ships have been detained in quarantine while the steerage passengers, numbering from one to two thousand on each ship, were taken off on barges, landed at Hoffman Island and detained from 24 to 48 hours.

During the detention they are compelled to take a bath from the tops of their heads to the soles of their feet. Their clothing, baggage and effects are then put through a bath of live steam. From Hoffman Island arrivals are taken to Ellis Island for examination by immigration authorities as to their qualifications.

Movie Machines To Aid Educators

WASHINGTON, July 26.—A "movie" machine in every public school to aid in the education of the children of the country is the aim of the Visual Education Association, which has opened headquarters here.

Charles F. Hunt, secretary of the association, says congress will be asked to appropriate funds to cooperate with the states in carrying out the program, the expense being borne equally by the federal and state governments.

While estimating the ultimate cost at \$19,500,000, Mr. Smith anticipated that this sum would be needed.

LETTERS FROM THE PEOPLE

OBJECTS TO SANITARIUM. Wilbur, Ore., July 16, 1920. Editor News-Review: I think it is wrong for the people throughout the country here to allow them to build that sanitarium and hospital at Winchester. We all know that consumption is a very bad and contagious disease, and to think of having a sanitarium full of these people where the city of Roseburg gets their water supply seems outrageous to me. They intend to build these hospitals above the dam and above the wagon bridge on the flat at Winchester, and we all know that the surplus water from this flat all drains into the river above the dam where the city gets its water supply. Just think of a number of consumptives spitting around over the ground and all the water from this ground is drained in above where you get your drinking water. Do you people who have to use this water think this is right to allow a thing like that? I certainly do not.

OBJECTS TO SANITARIUM.

The people who are to build these hospitals put up a very nice talk and promise to run their sewers to the river about one-fourth mile below Winchester. This may sound all right to some, but what about the ground around those buildings? It all drains towards a small creek which flows into the river above the sewer plant at Winchester. And these consumptives spitting all over his ground and having it drain into the water supply does not sound good to me. Consumption is contagious, and it is not right to have a lot of such people mixing with other people. Think of them sitting around public buildings and in the stores, spitting on the floor and on the porches around where well people gather. The germs from consumption live for months in damp or cool places and people who are around these places and breathing these germs are running chances of getting the disease. Some are bound to get it, and when you get it once it is almost impossible to get cured. I know of places where they treat these consumptives that the disease gets so bad that the germs get all through the air and ground, and even the birds, chickens and animals get the disease. Just imagine them having such a resort where the city gets its water supply. This country is too damp for consumptives, anyway. All doctors will tell you that the germs live much longer in damp

climate and that the disease is much harder to cure than in a dry climate. I think the people and doctors should get together and stop them from building such an institution at Winchester. According to my way of thinking, it would be an outrage to allow them to build there or anywhere else around where those consumptives could mix with healthy people. You may wonder of what interest it is to me to knock the sanitarium this way. It is just this: I am doing it for the health and safety of the public, and also that I have a deal on for a place where I will have to use the city water. But the deal is off if that sanitarium goes, for I will not live near such an institution. I hope you will print this letter and that the people will wake up and put a stop to this menace before it is too late. J. W. ALLISON, Wilbur, Oregon.

Dr. Albert Louis Banks of Boston, and Miss Florence Aiken of this city left last evening on the five o'clock train for San Francisco, where they will visit with Dr. Banks' mother, Mrs. Mary Banks, who is also a foster aunt of Miss Aiken. They expect to return to this city Friday night.
