### SPENDING ORGY ON DECLINE.

CHICAGO, Aug. 4.—Evidence is accumulating that the wild spending orgy is over and the public is getting back to normal conditions as rapidly as possible. Sales by the mail order houses have always been considered an accurate barometer of business, more especially as it applies to the country at large. The monthly comparative statement of sales by one of the greatest mail order houses shows that the peak in buying was reached last February. The decline was not so marked in March, but in April the sales dropped. May showed a still more startling decrease and June showed \$11,000,000 under January. July displayed a gain, but the sales were still nearly thirteen millions less than in January and more than a million dollars under the corresponding month in 1919.

The story of stolen moonshine and the fight which resulted in Glendale recently is told as follows in the Glendale News: The "Lealand booze bunch" were through Glendale the last of the week, it is reported. Anyway on Sunday evening we not only had moonlight, but we had "moonshine" in evidence, in fact we had it by the wheelbarrow load on our main street. It was of the flaking brand and several fights and drunken rows disgraced our sidewalks throughout. Apparently Glendale has no officers to enforce law and order.

### HOME SURVEY IS MADE.

BOZEMAN, Mont., July 5.—About 15.5 per cent of all city women order their domestic supplies over the telephone, and about 10.5 per cent of them pay cash for their groceries, according to an investigation recently conducted by Miss Vera Harris, a member of the graduating class of Montana State College, among women of southern Montana. Sixty-three per cent of farm women who replied to questionnaires sent out pay cash for their groceries, they reported. Miss Harris discovered that 18.6 per cent of city women have budgets, and that 14 per cent of farm women thus keep account of their expenditures. Seventy-one per cent of city women pay attention to brands and makes in buying supplies. It was ascertained, compared to 55.7 per cent of farm women.

**Back From Crater Lake**—Warren Burt and wife and V. N. Fields and wife returned yesterday from Crater Lake, where they have been enjoying the past few days. The trip was made in Mr. Fields' car. They state that several thousand people have visited Crater Lake thus far this season.

**Strange Freak Here**—A strange freak in the shape of a fourteen year old boy who has never walked, moved, or spoken since he was born, and who neither can hear or see, spent the night in this city and left this morning for California. The strange child is being taken to California by relatives in the hope that the change of climate will enable him to use some of his faculties.

**Medford Estimates Fruit Crop**—Estimates of the 1920 fruit crop in the Medford district of the Rogue river valley have been made public. The estimate being placed at 1200 cars. Of this total it is expected there will be 700 cars of pears and 500 cars of apples. An effort is already being made to register help for the picking season, as the lack of labor for this purpose was a menace last year, and shows little tendency to improve this year.

## Home Brewer Gets 30 Days in Jail

MEDFORD, Aug. 6.—Tom Murphy, principal in the Front street shooting affray last Monday evening was found guilty of infringement of the bone dry law in Justice Taylor's court yesterday afternoon and was given 30 days in jail and \$100 fine. Two dozen bottles of hooch, a wash boiler half filled with sour mash and several gallon jugs containing home brew were offered in evidence. Murphy's only defense was that he cooked the combination of corn and hops for the benefit of his stomach. Judge Taylor decided any stomach that could stand the evidence offered was not in a very serious condition. As Murphy was in jail anyway on the "attempt to kill" charge, now awaiting the October term of court, the sentence does not materially effect his future plans.

Electricity—The Vital Energy of Your Automobile, is produced by a little mechanical device called a generator. It causes a chemical action to take place in your storage battery. This chemical action in turn produces electricity which cranks your car, ignites your gas, sounds your horn and illuminates your lights. Life and service from your battery depends upon the mechanical and electrical condition of your generator. Regular care and inspection is important. Why not have this done at the time your battery is tested? It may save you money and much inconvenience later on. See W. B. Brown at the Auto Electric Station, cor. Oak & Pine Sts. Phone 134.
