Famous Minstrels Coming Here Soon

Probably certain people have forgotten that they are minstrel fans because it has been so long since they had an opportunity to see a really first-class minstrel aggregation—however the minstrel microphone will get them when the Famous Georgia Minstrels make their flash dress parade over our main streets announcing their appearance at the Antlers theatre, Friday, August 20.

Creating of laughter, the rendering of tuneful music, charming songs, comical stunts and curious novelties, constitute the purpose of the minstrel. For this reason, time and again in the professional papers the performers and others engaged in the legitimate amusement business have been assured by the government that amusements of this character are not considered non-essential.

With the Famous Georgia Minstrels are associated some forty people, all consisting of the very cream of the negro minstrel profession, and after all the negro is the natural musician and minstrel of the human race, and during the engagement here will spring some more of their pleasing surprises.

Electricity—The Vital Energy of Your Automobile, is produced by a little mechanical device called a generator. It causes a chemical action to take place in your storage battery. This chemical action in turn produces electricity which, cranks your car, ignites your gas, sounds your horn and illuminates your lights. Life and service from your battery depends upon the mechanical and electrical condition of your generator. Regular care and inspection is important. Why not have this done at the time your battery is tested? It may save you money and much inconvenience later on. See W. R. Brown at the Auto Electric Station, cor. Oak & Pine Sts. Phone 136.

To Our Customers:--

The only way to paint economically is to FORGET GALLON PRICE and figure cost by a area cover and years of life.

SWP covers one-third more area than paints which are cheaper per gallon. It lasts twice as long without re-painting, so requires half the material and labor costs.

On that basis, SWP is the cheapest-per-gallon outside paint you could buy.

SWP is the best prepared house paint. That is why we sell it. Now is the time to consult us about your house painting.

Prepare to do it this fall before the rains fill the wood with moisture. Oil and water do not mix well and it will be better to fill cracks, crevices and exposed pores of wood with linseed oil and pigment now while water is absent.

The great problem of getting a filter to take the place of air in automobile tires has been solved by Oregon men, and makes Universal Tire Filter an Oregon product. It rides just the same as air and does not injure the car in any way, not as much as with air filled tires, because it holds the road better and does not bounce so much on rough roads.

If you know so much about this filter and what you can save by having it installed as the undersized does, you would not run on air one day longer than you actually had to. Come in and investigate.
