GROCERYMAN IS SLAIN.

PORTLAND, Aug. 20. — An unidentified highwayman last night shot and killed James N. Thompson, a groceryman, as Thompson was sweeping the sidewalk in front of his store at East Forty-seventh and Harison streets. Thompson, who was 65 years old, lived only long enough to tell the neighbors, who came in answer to his cries, what had transpired.

The grocer was alone at the store about 10:15 o'clock, when the crime was committed. He said that the man who attacked him drove away in an automobile. It was not known at the time whether he had robbed the store of Thompson. The victim is survived by a 15-year old daughter.

MOSQUITOS FEAST ON ARM.

CHICO, Cal., Aug. 20.—Leting a swarm of mosquitos make a meal on your arm is not the most pleasant kind of an exerience, but that is just what Lieutenant William C. Purdy of the United States public health service, in charge of the mosquito research work here, did, and a mass of red welts on his right arm testifies to the ordeal. The object if giving the mosquitos this free lunch was to obtain a number of egg-laying specimens for an experiment Purdy is conducting in the rice fields of Dr. E. B. Copeland. Purdy is attempting to discover why mosquitos breed in some rice fields and not in others. The free lunch on his arm was necessitated by the fact that the female mosquito lays eggs only after feasting on blood.

Japs Increasing Hold on Business

(By Associated Press).

SALEM, Aug. 20.—According to the report of Frank Davey, special investigator for Governor Olcott, the adult Japanese population of Oregon has not greatly increased during the past ten years, but there is an increase in the birth rate of that nationality in the state. The report credits the federal immigration authorities with the view that gon have apparently entered illegally. It is further shown that Japs are rapidly acquiring lands throughout the state. They have obtained a firm hold on business in Portland, and the investigation shows them to be controlling 90 per cent of the cheap lodging houses of that city. The report will be submitted to the congressional investigation committee.

DELIGHTFUL SURPRISE.

Has come to those having Universal Tire Filler installed in their tires to take the place of tubes and air. They now get the real enjoyment in their auto rides without having any of those disagreeable roadside tire repairs. Break away from your old ways and adopt the more economical way by having Universal Filler installed in your auto tires. It rides same as air and gives you much more mileage to your casings. If in doubt ask those that are now and have been riding on it for a long time. Hon. Judge Wonacott and wife have been riding on Universal Filler in their Franklin car for nearly six years, and would not go back to air again for anything. Universal Tire Filler is guaranteed 100,000 miles and is changed from one casing to another as they wear out.

S. F. Chinatown Losing Residents

SAN FRANCISCO, Aug. 21.—San Francisco's Chinatown, at one time perhaps the largest of any American or European city, continues to decrease in population, according to statements from the Chinese consulate and the Chinatown police squad. Before the San Francisco fire of 1906 there were over 30,000 Chinese here, it was estimated. Today Chinatown is credited with a population of between 5000 and 7000.

Chinese populations in other sections of the United States also are decreasing, according to census figures at the consulate. In 1900, they show, there were approximately 107,000 in America. In 1910 the number had decreased tot about 71,000, and in 1920 to 55,000.

Many reasons have been assigned for the decrease here. The consulate thinks restrictions on Chinese immigration have been the main cause and agrees with officials of the police squad that the ban placed on gambling in the Chinese quarter is another reason. Chinese love to gamble, the police say, and when the ban was ordered many left.

Eastern cities have called many San Francisco Chinese where they engage in the restaurant and laundry business. Chicago, it is said, has drawn heavily upon San Francisco's Oriental quarter.

Oregon Prune Market Unsettled

The following dispatch from Portland will be of interest to the prune growers of the Umpqua Valley:

The Oregon prune market is still in an unsettled condition. Opening prices have not yet been fixed by the association, but are expected very soon. There is, consequently, no selling by packers and no contracting with growers is reported. One of the independent packers announced an opening price of 14¾ cents, bulk basis, on 40-50s. This was criticised by the association as a cent too high and there matters have halted. The California association opened at 15½ cents on the same size, but it has none of these to offer. Some early contracts were made with northwestern growers on the basis of 16 cents for 30-40s, but there has been no recent buying.

The Oregon crop is doing fairly well, notwithstanding the dropping in some of the valley countries. It is thought the yield may run about 60,000,000 pounds. At the beginning of the season a crop of 80,000,000 pounds was hoped for. Last year the dried prune output of the state was 35,000,000 pounds, and two years ago 65,000,000 pounds.

Independent packers of California prunes are falling in line with the association as to prices on the 1920 crop, and one by one they are meeting the lower range announced by the big factor. Some are even feeling out buyers at slight concessions on the smaller sizes. The buyers of association assortments are taking up their contracts and some little interest in resales has developed.

Eastern buyers are not disposed to accept the statements that the old crop has been pretty well cleaned up on the coast, and there are persistent rumors, accredited to easterners who have been in California recently that there are still considrable quantities of the smaller sizes held back which may be reprocessed and sent eastward as new crop goods. The buyer is a decided bear at present and he is full of bear arguments and rumors, which adds to the unsettled condition of the whole line.

Sugar Soaring as Canning Nears

For the first time in many weeks there is now indication of a slight drop in the price of sugar in the local market, though it is not at all affected by the big drop reported in the east. Wholesale dealers here state that the report of 15-cent sugar in the east is not based upon an actual decline in refiners' prices but is probably the result of a certain group of dealers who have become panicky over the market prospects and are endeavoring to unload. The local jobbers have received no intimation of reductions in the west, and there is no promise of large reductions to the consumers in time to help out the canning season. Some of the local dealers have made a special reduction of one and a half cents on granulated sugar, and 20 cents a pound for the brown grades. As a result of the price there is only a fraction of the usual demand for sugar in Eugene and the demand for fruit cans and supplies is affected in the same proportion.—Eugene Guard.

Dorothy Orcutt left this morning for Portland to spend a week or ten days with friends and relatives.

New Hair Growth After BALDNESS
On legal affidavit, John Hart Brittain, business man, certified he this: "My head at the top and back was absolutely bald. The scalp was shiny. An expert said that he thought the hair roots were extinct, and there was no hope of my ever having a new hair growth.
"Yet now, at an age over 60, I have a luxuriant growth of soft, strong, lustrous hair! No trace of baldness. The pictures shown here are from my photographs." Mr. Brittain certified further:
INDIAN'S SECRET OF HAIR GROWTH
"At a time when I had become discouraged at trying various hair lotions, tonics, specialties' treatments, etc., I came across, in my travels, a Cherokee Indian 'medicine man' who had an elixir that he asseverated would grow my hair. Although I had but little faith, I gave it a trial. To my amazement a light fuzz soon appeared. It developed, day by day, into a healthy growth, and ere long my hair was as prolific as in my youthful days.
That I was astonished and happy to expressing my state of mind mildly. Obviously, the hair roots had not been dead, but were dormant in the scalp, awaiting the fertilizing potency of the mysterious pomade.
I negotiated for and came into possession of the principle for preparing this mysterious elixir, now called Kotalko, and later had the recipe put into practical form by a chemist.
That my own hair growth was permanent has been amply proved."
How YOU May Grow YOUR Hair
It has been proved in very many cases that hair roots did not die even when the hair fell out through dandruff, fever, alopecia areata or certain other hair or scalp disorders. Miss A. D. Otto reports: "About 8 years ago my hair began to fall out until my scalp in spots was almost entirely bald. I used everything that was recommended but was always disappointed until at last I came across Kotalko. My bald spots are being covered now; the growth is already about three inches." G. W. Mitchell reports: "I had spots completely bald, over which hair is now growing since I used Kotalko." Mrs. Matilda Maxwell reports: "The whole space of my head was as bald as the palm of my hand for about 10 years. Since using Kotalko, hair is growing all over the place that was bald." Many more splendid, convincing reports from satisfied users.
