WOULD HAVE WOMEN PROPOSE

Writer Asails Old Idea That She Must Wait Until She Is Sought in Marriage.

More and more it becomes evident that a great and solemn referendum is needed to settle the question: Shall women propose? This matter—it is a leap year—has been agitating men and women for more than six months. When 1920 opened, this newspaper called attention to the fact that it was a leap year and suggested and even advised women to tackle men who were hanging back, and see that they did their duty and assumed the burden of marriage. We told women to boldly propose to men and see that they gave the right answer—an affirmative. There is no person quite so much of a slacker as a sluggish bachelor, and if he possesses not the nerve to ask a woman to marry him, then it is the right of the woman to demand that he marry her and see that he does. Weak arguments have been offered against women proposing; folk say it is unwomanly, that it belittles the girl, and a lot of nonsense like that. If persons will look at the matter reasonably and realize that it is the duty of every healthy person to have a mate through life, they will understand that it is as much a woman's right to request a man to marry her as it is the man's right to put the question to her. Wherefore we repeat what we have said before, that women should do the proposing in cases where men show an inclination to hang back or are bashful. If left to a referendum we feel sure the woman's right to propose will be sanctioned.—Chicago Evening Post.

PROLIFIC BREEDER IS BEETLE

Enemy of Pine Timber Only Kept in Check by Strenuous Natural and Artificial Control.

Special study has been made of the number of all stages of the western pine beetle in 350 square feet of infested bark selected from 67 trees, which represented an average infestation within an area of approximately 30 square miles, says the American Forestry Magazine. It is shown there is a large percentage of mortality between the young and matured stages in the developing broods, but that normally an average of about 150 beetles to the square foot of bark developed to the adult, or reproductive, stage; which would be 50,000 beetles to the average infested tree, or, say 30,000 beetles to 1,000 board feet of timber. Since it requires an average of about ten beetles to the square foot to attack and kill a vigorous, healthy tree. It will be seen, says the American Forestry Magazine, which is campaigning for a national forest policy, that all the pine timber of the western forests would soon be destroyed were it not for natural and artificial control.

Goodyear Tires for Small Cars Are Popular Because Economical

There is nothing but disappointment in buying cheaply made tires that are announced as wonderful bargains at a few dollars each and then fail after brief terms of service.

Get exceptional mileage at exceedingly low cost in Goodyear Tires, of the 30x3, 30x3½ and 31x4-inch sizes, built of Goodyear-selected materials and with Goodyear skill and care.

Due to their precise manufacture in the world's largest tire factory devoted to these sizes, their quality is most economically produced and therefore most economically employed.

If you own a Ford, Chevrolet, Maxwell, Dorr or other car taking these sizes, go to your nearest Service Station for Goodyear Tires; ride farther and fare better.

30 x 3½ Goodyear Double-Cure Fabric, All-Weather Tread \$23.50

30 x 3½ Goodyear Single-Cure Fabric, Anti-Skid Tread \$21.50

Goodyear Heavy Tourist Tubes cost no more than the price you are asked to pay for tubes of less merit—why risk costly casings when such sure protection is available? 30x3½ size \$4.50 in waterproof bag

Now about that top for your truck this fall. Cocklewas & Harbor, 229 Oak street.

DESERT HERO KNOWN TO FEW

Dog That, With Its Master, Was Savior of Many Lives, Well Cared For in Its Old Age.

Rufus, the dog hero of the desert, who has saved many lives, is ending his declining days in a dog sanatorium at Pasadena, Cal., where he is well cared for. The end of the dog is not far off, says Our Dumb Animals in a recent issue. He is spent and feeble after his many long and weary journeys over the burning and blinding sands with his pioneer master. He will no doubt soon fall asleep.

Lou Westcott Beck and Rufus were intrepid pioneers in a life-saving project that received scanty support and tardy recognition. Together they fared forth on their mission of mercy, Beck carrying signboards and cans of paint, Rufus laden with saddlebags of restoratives and poison antidote. While the man set up the guideposts, or painted the water signs, the dog succored many a prospector who otherwise would have died miserably from delirium of thirst or the venom of snake bites.

The work of these two great benefactors is over. Beck died in July, 1917, and since then the government has appropriated one hundred thousand dollars to carry on the project that he and his devoted dog started.

Rufus will be well provided for by a veterinarian who was a personal friend of Beck's. The old dog's years of hardships, of life-saving service on the desolate wastes, are not without their reward. His many friends who used to see him on the streets and pat him with approval as he started out on his desert trips will not forget him in his old age.

Candles on Toast!

An adult Eskimo is capable of consuming twenty pounds of fish and oil daily. A Yakut will wash down this quantity of fish with a quart or two of train-oil, and take as dessert a dozen tallow candles.

A famous naturalist, who cooked part of a boomerang, declared that it tasted very much like real. On another occasion he tested crocodile and pronounced the flesh excellent.

Frobisher and Settle both commented on the way the inhabitants around Hudson's Bay used to eat grass. "Such grass," says Settle, "as the country produces, they pick up and eat, not daintily or salad-wise, but like brute beasts."

Humboldt tells of men living on the banks of the Orinoco who eat earth. They knead the earth into balls of from four to six inches in diameter, and bake them before a slow fire.

Palestine's Forests.

"What do you consider Palestine's greatest need?" Miss Nathan, a Red Cross worker, was asked by a prominent Zionist, says the American Forestry Magazine of Washington, D. C. Both were returning from the Holy Land, where their duties had taken them.

"Forests," was Miss Nathan's instant reply. "What, before the much-needed industries are brought in?" exclaimed the Zionist incredulously. "Don't you think industrial rehabilitation should come before reforestation?"

"Doesn't the country's industrial life depend paramountly upon reforestation?" countered the Red Cross woman. "Palestine, without forests, means Palestine over the prey of floods and famine; doomed to un-arable lands and to poverty. Even the industries must be assured fuel and power, and without means to produce these they must languish."

Uncovered Ancient Grave.

While excavations were being made on a small conical-shaped hill near Dolphin station, England, in preparation for the foundation for a monument, the workmen came upon an irregularly shaped stone measuring about four feet four inches square and six inches thick, which was found to be covering ancient human remains in their place of sepulcher. Flintstones about four inches thick line the grave, which measures three feet nine inches by two feet by two feet. The stones are recognized as having been quarried locally. The grave was situated only about two feet six inches from the surface, and the deceased person had evidently been interred with legs drawn up. The stones have been replaced.

Purpose of Fly's Existence.

The fly is the Julius of animal creation, hated, loathed, destroyed, the very reason for its existence questioned by querulous mankind. Yet the fly, despised insect that it is, must serve a purpose, for nature makes few mistakes in her creation. That purpose is not hard to find. The fly is nature's agent to remove filth. Filth breeds the fly, so nature decrees it a sign, in order to provide for the removal of that filth. The fly, like the headcheese, is a result, not a cause. Where there are flies there is filth, remove the filth and the fly will cease to exist.

Nothing Left to Eat.

"A telegram from your husband. What's the matter?" "Nothing much. He simply wired me: 'Come home. I've run out of sardines.'"

CITY NEWS

Arundel, piano tuner. Phone 189L.

Be sure to see J. A. Walker B 4 U buy that farm.

Fires destroy lives, property and food. Be careful with fire.

Insure against loss—equip your tractors so they won't set fires.
