Efficiency Depends on a Perfectly Balanced Nerve Force

This is impossible if the eyes are demanding more than their quota in order to maintain proper vision. In case of

ILLNESS

when nervous energy is depleted and the eyes are denied the extra enervation needed to correct defective vision, people say:

"IT SETTLED IN MY EYES"

Don't add the straw that breaks the camel's back.

An Ideal

STANDS THE STRAIN:—Thousands of Woodstock Typewriters that have been in use for years are turning out a class of work excelled by no other make. The reason is simple: Woodstock Typewriters are built to render service, not to sell at a price. The first idea in Woodstock construction is to build a machine that will serve and continue to serve. Many typists ask why it is that they can do more and better work on a Woodstock than on any other machine. The answer is built into the machine itself. The ease, harmony and precision of action are due to the same intrinsic qualities which make the Woodstock last longer and serve better.

We will be glad to give you a demonstration.
