Efficiency Depends on a Perfectly Balanced Nerve Force

This is impossible if the eyes are demanding more than their quota in order to maintain proper vision. In case of

ILLNESS

when nervous energy is depleted and the eyes are denied the extra exertion needed to correct defective vision, people say:

"IT SETTLED IN MY EYES"

Don't add the straw that breaks the camel's back.

PRODUCERS FOR STANFIELD

A Republican Senate Is Vital Protective Tariff An Absolute Necessity.

(Editorial from Polk County Observer, Oct. 14, 1920.)

Republicans who do not give Mr. Stanfield their votes are certainly not going to vote their political convictions. A vote for Harding and Coolidge is a vote for a protective tariff and the conservative administration always given by the republicans. A vote for George Chamberlain is a vote for a low tariff and the radical policy of the democratic party. If Chamberlain is elected he may have the deciding vote as to whether the republicans can or cannot carry out their policies and put the business of the country on a substantial basis. In fact, all real republicans would much prefer to lose the state for president than for United States senator, for the latter, under existing circumstances, is much more important.

Stanfield is the kind of man who will make a good senator. He has made his own business success raising sheep, and has suffered from every ill of which the farmers complain. He has been compelled to sell

ducing wool, he has been trimmed by speculators just as have all other producers. And he has the knowledge and the ability to put the facts before the national legislators in a manner that will get results.

Senator Chamberlain, the democratic nominee, but who is subject to no party, was in town during the past week. He has the advantage of personal acquaintance. But Chamberlain has spent his entire life in holding office. He is not familiar with the difficulties of the farmers and producers. He must act with the democrats on the tariff question, allowing the wheat growers of the United States to remain in competition with those of the remainder of the world. You have seen how this resulted when Canada dumped a large amount of wheat onto the American market. The price was broken. He must also stand for a low tariff on all other products of this section that come into competition with the remainder of the world.

If you believe in the republican protective tariff, it is folly to vote for Chamberlain, for he will be compelled to vote against your interest if he is elected.

An Ideal

STANDS THE STRAIN—Thousands of Woodstock Typewriters that have been in use for years are turning out a class of work excelled by no other make. The reason is simple: Woodstock Typewriters are built to render service, not to sell at a price. The first idea in Woodstock construction is to build a machine that will serve and continue to serve. Many typists ask why it is that they can do more and better work on a Woodstock than on any other machine. The answer is built into the machine itself. The ease, harmony and precision of action are due to the same intrinsic qualities which make the Woodstock last longer and serve better.

We will be glad to give you a demonstration.
