A bit of highway is just being completed between Cleveland and Akron, Ohio, which is fine example of what a road ought to be.

The contractors call it their "heavy-duty" road, and it is built from the ground up and down for just such service.

Seventeen miles long, eighteen feet wide, the road will cost about \$825,000, or better than \$45,000 a mile.

This is the sort of road that pays the more that taxpayers are beginning to demand and learning to pay for willingly.
