Gardiner Seniors Entertain at Party

The Senior class of the Gardiner High School entertained the lower classes of the school and friends with a Halloween party, Friday, Oct. 29th, at the Hansen home. The house was attractively decorated with autumn leaves, jack-o-lanterns and Halloween symbols. Each member of the class acted out the following parts: Margaret Sagerberg was the witch crouching over the punch bowl; Nelson Perkins was the ghost who conducted the guests through the intricacies of the mysterious lane; Roy Gerhardt, another ghost gave out the fortunes incensed in golden note; Gladys Westphal was the spook who presided over the table of black cats and Viona Pyritz was the spirit who was in charge of the mystic shrine. The evening was spent in playing games telling ghost stories and singing of songs. Later delicious refreshments were served after which the guests departed praising the Seniors as royal entertainers.

APPLE MARKET SWAMPED

HOOD RIVER, Nov. 9.—A cablegram was received today by the Apple Growers Association from Liverpool announcing that the reimposition of price control of apples in England, scheduled to take effect on November 14, has been indefinitely postponed.

Exporters, however do not expect the postponement to result in any material benefit. Shipments of barrelled apples are already swamping England. Because of the serious strike situation, already thousands of boxes of pears and apples have rotted and have been dumped, it is said.

French Dead Are Being Transferred

PARIS, France, Nov. 10.—France's 1,000,000 war dead are soon to be transferred to permanent military cemeteries or re-interred in private ones at the option of the relatives. It may be many months before the work is well under way, but the start is to be made soon under authority of laws passed at the last session of parliament and now made effective by decree.

A separate monument of a design not yet adopted will be at the head of each grave and the care of the military grounds will devolve upon the government in perpetuity. Sanitation and lack of transportation has delayed the assembling of the bodies but it has been decided that by careful planning the work may now be done without danger to health or industry.

GLENDALE NEWS

As we fully appreciate our victory achieved by the efforts of the voters of each sex, in their united action, we most cordially congratulate our winners from our president elect to the extent of the law. We are resting after a strenuous campaign. On election day, we noted all day the quiet dignity and silent expression on the faces of our new voters and could see that they all understood and all made good in their part of the great victory, and while we have elected good men the present incumbents of our county offices are all renewed by their official records. We wrote in the name of George W. Brown for Justice of the Supreme Court, for we confidently know him.

And for attorney general just as confidently we wrote in the name of O. P. Cashow, as we know him also.

We would like to write a line or two for each and every one of you, but space forbids, and to each one, we tender our loyal greetings with our brightest hope for our own

Old Trunk Contained Big Sum

PHILADELPHIA, Nov. 10.—An old trunk, for which she paid \$1.00 to a junk dealer in Scranton, Pa., before she moved to this city recently added \$295 in gold to the capital of Mrs. Alfred Bitterlin of Collingdale, Pa.

Believing the trunk had outlived its usefulness, Mrs. Bitterlin started to burn it. A single attracted her attention, the fire was extinguished, and Mrs. Bitterlin extracted the gold pieces from the lining of the trunk.

CUT OUT THE EAVESDROPPER
 New Device is Expected to Eliminate "Listening in" on Wireless Messages.

Successful demonstrations of a new wireless invention, which marks a step toward the secrecy of wireless telephone and telegraph messages, have taken place in Great Britain and Signor Marconi is at present conducting further tests at sea in his yacht Electra with a view to its wider application.

Details of the invention are secret, but it may be stated that, according to the Continental edition of the London Daily Mail, an apparatus has been devised which, by what experts call an "electrical method of concentration," propagates the electric wireless wave in a "beam" in any desired direction and in that direction only. Hitherto the electrical waves sent out from wireless stations have spread out in all directions and all who "listened in" could hear. The new invention will mark the end of the wireless "eavesdropper." When it is perfected a wireless station will be able to send out Morse or spoken messages which will be heard only by those for whom they are intended.

The new apparatus which is being worked at an experiment station in Great Britain with a short wave length, has recently been demonstrated by a number of experts who expressed the greatest interest in the discovery.

It is known that German wireless research has been lately closely directed to this problem of the "eavesdropper," for the Germans realized that we were able to pick up with our listening sets much valuable information about Zeppelin movements during the war.

 "Is Mrs. Wizard really a kleptomaniac?"
 "No, she can't belong to none of those new-fangled sects. She's a good old hardshell Baptist."
