Walthal Discusses Ibsen Drama

Mr. Henry B. Walthal, America's great screen personality, who is now touring the United States in Henrik Ibsen's "Ghosts," and who appears at the Antlers tonight, has the following to say regarding the Norwegian's dramas:

"Ibsen makes an appeal to the actor's imagination, to his brain, to his soul. He is a constant mental stimulus to the player. The author of what we call a story book play makes no such demand on the actor and affords no stimulus.

"Ibsen has revolutionized the drama in every country in the whole world. People do not realize this be-

Henry B. Walthal.

cause they see very little of Ibsen and a great deal of the Ibsen delusions. Ibsen's mastery in the creation of character has no equal. In time, perhaps those who imitate him will come to a better understanding of his purposes and methods and may bring forth more tolerable imitations, and no doubt there will be creative work of much merit inspired by his example. It may take time, of course, but these things will come about. There are already strong indications of this. As for Ibsen works they will not probably become popular literature, for they must be read often to be fully understood and appreciated, but their progress on the stage is a different matter. Most people who read Ibsen for the first time wonder how he can be acted at all, but the truth is that he is essentially a dramatist, not a literature.

Mr. Walthal believes Ibsen is the apostle of absolute truth and that his dramas mean something that is human. His opinion is not one to be expressed for effect. He is too great an artist to employ such methods.
