 Roseburg, Ore., February 28, 1921

THE NEW OSLERISM.

Dr. Osler was doubtless right in his opinion that men seldom have any original ideas, and therefore seldom contribute anything original to the world, after the age of 40. Thomas A. Edison, in a talk on his 74th birthday, went considerably beyond Osler. When asked for a word of advice for young men starting in business, he said:

"I cannot give any advice on this subject. If a young man has reached 21 and is dead mentally, no amount of advice, experience or money will ever change him in the slightest. If between 12 and 16 he can be interested in a subject and become enthusiastic, he will become a high type of man. If not, his mental machinery will atrophy gradually and he will be a mental dead end."

This is a revolutionary, but is it not true? Mr. Edison has got his theories of mental development not from books but from life—his own rare powers of observation, trained upon young men as he has seen them, and checked up by a practical intellect of the highest capacity. He deliberately reduces the mental "dead line" from 40 years to 21 or less. And who can disprove it, as a general proposition?

Popular thought has instinctively recognized the same truth in the saying, "As the twig is bent, the tree's inclined." Edison reared his juvenile twig as having its plastic quality somewhere between 16 and 21. And while disbelieving any idea of divine discipline, he has repeatedly suggested what is probably the soundest advice that any educator could offer.

"If between 12 and 16 the boy can be interested in a subject and become enthusiastic, he will become a high type of man." There is the key to educational development, provided by what is probably the master-intellect of the age.

Most boys, perhaps, in that four-year formative period, voluntarily acquire such an interest in some pursuit or other as develops their latent power of enthusiasm and gives them a useful direction and purpose in life. For those who do not, the interest must be supplied. This is the work of teachers and parents in these crucial years.

It will be observed that the period corresponds roughly to the high school age, including perhaps the last year of grammar school. The responsibility of eighth grade teachers and high school teachers is therefore especially great.

DREAMING OF REVENGE.

Although it is inconceivable that the German masses have not had enough of war, there are some persons in Germany who have dreams of more wars. A book, "Three Future Wars: Political and Military Forecasts," is reported to have foreseen much more spilling of blood, though in the end Germany will be the most powerful and "cultured" nation in the world. He is kind enough to let the United States exist under such conditions. In that day Germany will dominate Europe, while the United States will rule the western hemisphere and a few Asiatic nations that nobody cares about. The final war will be between the white and yellow races, with the former victorious. When the era arrives in which the United States and Germany divide the earth between them, Germany will hold the supremacy because of "superiority of genius and intellect."

While one is at first inclined to pronounce the author crazy, it should not be forgotten that crazy men may have followers. The Kaiser had. There need be no worry about the fulfillment of the prophecy but much precaution of the idea by wild-brained men trying in time produce an effort to try to bring it about. So long as there are Germans who have visions of regaining by war their lost estate rather than in the practice of the arts of peace, so long will there be a menace to Germany, even though represented in small numbers, the alarm of France at her situation is not astonishing.

LETTERS FROM THE PEOPLE

OUR OFFICIAL FLOWER

Editor, News-Review:
 As I stood on Mt. Nebo and looked down on the beautiful scene before me, I was transfixed.

It made me think of a pansy. That beautiful flower. Words cannot describe its richness and beauty. It says "Think of me" so I thought as I looked at Roseburg, the more you look, the more entranced you become at God's handiwork, and think, "Oh, how lovely." You never forget the scene. It is nature talking to all who look, saying, "Think of Me."

The pansy grows fine here. Why not the pansy?
 MRS. F. NICHOLS,
 Civil War Veteran's Wife.

business like administration ever recorded during the state's history. This is, indeed, commendable, and sets a good precedent for future sessions of the legislature.

Governor Olcott is carefully scrutinizing all bills passed by the recent session of the Oregon legislature. The governor "throws a wicked axe" but in the main can be counted quite reliable when it comes to exercising his veto power. It is evidence he has his thumb on the pulse of all measures affecting the welfare of the state.

Don't forget to add that little slogan, "See Crater Lake First—Roseburg," the logical stopover between Portland and Crater Lake National Park, to that order for printed envelopes. It will help to put over a big tourist travel for Roseburg the coming summer.

The "high cost of living" in Douglas county—is, in round figures, five thousand dollars. Pretty expensive luxury during these days of financial depression—but probably a reasonable compensation for quality and service.

The Oregon State Retail Shoe Dealers Association held their meeting at Salem last week to hold their next convention at Roseburg. We'll show these fellows a good time—and "boot 'em" all over the Umpqua Valley.

The suggestion that more farmers be sent to congress should be accompanied by the one that more congressmen be sent to the farms.

Next thing we know, winning political parties will be demanding a few billions of reparation money from the losers.

Everybody is yelling for more credit, when the chief thing that is wrong with the country is too much credit!

When former Mexican bandits read what is going on in the United States they must feel like mere pikers.

The vigilance committee in the once wild and woolly west usually found its man when it went out after him.

Any man who allows himself to be robbed of more than \$10 at a time does not show the right appreciation of banks.

There will be a measure of readjustment when bacon again becomes the poor man's meat.

The man who tries to dodge his income taxes may hit his head on a stone wall.

It looks as though folks who talked about hanging profiteers lost their nerve.

Lost you forget, have you joined the Chamber of Commerce?

It is easy to find fault, but it is so real use after you have found it.

Few persons realized that deflation would be so painful.
