 Roseburg, Oregon, March 25, 1921.

WOMEN IN BUSINESS.

The success of many young women in business is due to their strong desire for society life and to the influence of men. It is natural to many girls to look forward to marriage as their future career, and a regard business as a mere stopgap, until the right man appears.

Some girls dwell so much on these desires, that it not merely prevents any business success, but they become unable to make satisfactory marriages. Meanwhile others who devote themselves with enthusiasm to a business career, and make good in it, will very frequently win the admiration and affection of some high class man.

Young women who want to succeed in office and mercantile occupations, should concentrate their thoughts on their work during business hours and make social success subordinate. They should try to throw themselves into their task just as if they expected to make it their life-long occupation. They should put their wits to work to learn the methods of their job, and try to make new friends for the business of which they are a part.

The complaints most commonly made by business men regarding their young women employees, relate first, to want of attention to work, second, to lack of general intelligence, third, to faults of spelling, grammar and arithmetic. Even common as these shortcomings are, young business women compare favorably with boys of the same age.

The business girl who wants to make good, will read the newspapers carefully, so as to be able to talk intelligently about public events and local interests. She will keep up her studies in points like spelling, letter writing, or arithmetic. The business girl who has ambition and a desire to improve her work will find her interest is rewarded in many ways. Opportunities will open to her that are closed to others.

RAILROAD DEVELOPMENT WORK.

Formerly the only way the railroads ever knew to increase their revenue, was to raise their rates. But during recent years many roads have tried to meet the difficulties of their business by increasing the resources of the territory through which they pass. If they can add to farm and manufacturing products, their revenue will increase correspondingly.

The Frisco system's work on this line should be an inspiration to every railroad in Oregon. They have been particularly successful in developing the Ozark mountain region. Formerly this section was known as "the land of rocks." Business men would go there and see no possibilities of any development. One man remarked that the only possible use in it was to hold the world together.

A visitor who recently passed thru remarked that the changes seemed a miracle. Where 10 years ago there was nothing but rocks and barren hillsides, now there are beautiful farms, rich in fertility, splendid homes, and every evidence of prosperity.

This remarkable development is largely attributed to the campaign conducted by the Frisco system, thru its bureau of agriculture. Years ago a railroad's only relation to the soil was to run trains over it. Now the railroads are realizing that their prosperity depends upon the full development of the territory from which they draw business.

The Frisco's agricultural bureau has educated the farmers up to a belief in the possibilities of their own lands. It taught the farmers to diversify their interests, to raise fruit, and it has promoted livestock and dairying. It conducted extensive work to eradicate cattle tick, and in every way worked for agricultural and business prosperity. No railroad enterprise is complete, unless it has an active bureau working to develop the resources of the region on which it depends for its prosperity.

ONE RESULT OF CROWDING.

One million people were married last year. They needed 500,000 houses to live in. But only 20,000 were built.

Meanwhile the plumbing supply industry had the biggest year in its history. One reason was that in many places, houses were so crowded that two families could live where one lived before. Many families had attics so fixed up that another family could be taken in.

Where families had previously spread over needless spaces, these changes have been merely a mere economy. But in other cases they have meant crowding, and congestion promotes disease. The reason why houses are not built, is that construction costs are too high. Those who place this objection, in the way of progress, by charging too much for either materials or labor, or who promote inefficiency by restricting production, may find their people on their job before long.

The makers of moving pictures took a very far-sighted step, when their national association took steps to prevent the production of questionable films. The film makers have probably come to the conclusion that it is cheaper to clean up their own films than to have the job attempted by a thousand different censorship commissions representing municipalities and states. There is a pronounced demand for some better regulation of the character of films. Moving pictures are going to be one of the greatest educational forces in the country. They ought to promote the same high standards of conduct which the people pay to have taught in their public schools. If the people are paying their millions of taxes to have high standards of conduct taught in the schools, while some film makers put out pictures that tend to lower these ideals, such of the good work of the schools is being undone.

One big strike has been averted. The packers and their employees have agreed to pull together, which is far better than weathering the effects of prolonged fight over disagreements that can be settled on a business basis.

When young Bergdoll, the prince of slackers, is returned to the United States from Germany he should have his neck twisted—or stretched—to take up the surplus slack.

It isn't too early to create a little enthusiasm about Roseburg's annual strawberry festival—the real big event of the year's happenings in his community.

The government seems to be anxious to know "what constitutes a fighting army. If you mean ships—hard to say. If you mean men—Americans.

Cheer up! We're not so poor after all. Europe owes us \$20,000,000,000. That's nearly \$200 apiece, or \$1,000 per family. And we've got to it to collect it.

A woman may be said to have passed the joy period of her life when she begins to worry about her weight.

The man who spends much time on the streets dodging automobiles does not need gymnasium work.

If girls must chew gum, they show the right spirit by putting a little pep into the operation.

Leave it to the Elks—some bunch or a good time.

MICKIE SAYS

THE OFFICE CAT

BY OLD MAN TOM.

Mike Devaney opines that the too early bird catches nothing but a cold.

His Crowded Crib.

(Metropolitan Magazine)
 Our only disappointment was that William Winkie, who was down with one of his eye attacks and was in bed with a doctor and a trained nurse.

Father: "And what is your reason for aspiring to my daughter?"
 Young man: "I have no reason; I'm in love."

Needs Repairs as Usual.

(Sharon (Pa.) Telegraph)
 Dr. R. W. Main, evangelistic preacher, will speak this evening in the United Presbyterian church on "The Worst Thing in Sharon."

One way to keep out of a scrap is to raise whiskers.

Some of our soldier boys are still in Germany. They're being kept there to receive the mail sent them during the war.

We understand we also have some soldiers in Siberia now and they can't be sent home because nobody in the war department knows where Siberia is.

Roy Bellows says that the man with plenty of sand, a wide horizon, and a cool head is a summer resort all to himself.

Johnnie was very much afraid of the dark, but his mother had assured him that the angels were watching over him and he need have no fear. He suddenly appeared in his night gown among the guests who were entertaining. "Why, what's the matter, Johnnie?" she asked.

"Oh, mamma, are you sure there are angels in my room?"
 "Yes, dear," answered his mother.
 "Are they in my bed, mamma?"
 "Yes, dear, the angels are in your bed," assured his mother.

"Well," said Johnnie, "they're biting me."

"There ought to be two cats from Kilmeny."

Each thought that was one cat too many.

So they scratched and they bit, and they growled and they bit, and the tips of their tails, and what was left of their cats wasn't enny."

Doc Miller says that by close observation he has found that it is easy to be a real philosopher if you don't have a personal interest in the thing that is going wrong.

Crazy Times.

Strike and the world strikes with you, work and you work alone; our souls are ablaze with the bolsheviks, the wildest that ever was known.

Grown and there'll be a chorus, smile and you make no hit for we've grown long hair and we preach despair, and show you a daily fit.

Spend and the gang will cheer you, because you have no friend; for we throw our backs to birds, and ducks borrow from all who will lend.

Knock and you'll be a winner, boost and you'll be a frost; for the old same ways of the prewar days are now from the program lost.

Strike and the world strikes with you, work and you work alone for we'd rather yell and raise blue hell than strive for an honest home.

Rant, and you are a leader, toil, and you are a nut; 'Twas a bitter day when we pulled away from their old every-day work rut.

Wait, and there'll be a blowup watch and there'll be a slump; and the fads and crimes of these crazy times will go to the nation's dump.

Call at the Ideal Bakery, Sheridan St., for Superior Bread and pastry.

At Death's Door

"I was talking with my neighbor, Mr. Webb, the other day, regarding the great trouble his stomach had given him. He said he suffered 7 or 8 years, and had been almost at death's door a number of times from acute indigestion and bloating of gas, which seemed to shut off his heart action. He said he wouldn't have lived much longer if he hadn't taken Mayr's Wonderful Remedy when he did, which made a well man of him."

It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded.

Druggists everywhere.

LEFT HANDED TWIRLERS ARE NUMEROUS

MYRTLEDALE SPRINGS, Cal. March 25.—Left handed pitchers probably will outnumber right-handed hurlers on the Oakland club of the Pacific Coast Baseball League, now training here.

Del Howard, manager of the Oakland club, is said, looks upon coast league hitters as the natural prey of southpaw hurlers, and hopes to eliminate the top of the percentage column by the use of the pitcher.

Howard is here with thirty-one players, probably the largest squad taken to a training camp by a Pacific Coast League team this year. He is so pleased with Myrtledeale that he is planning to come here every year. The hotels here have agreed to erect a dormitory and

MENTAL DEFECT SURVEY COMPLETE

U. of O. Finishes the Task of Making Survey of Dependency in State.

REPORT IS SUBMITTED

Work Was Undertaken at Request of Legislature—Information Was Desired as Basis for Future Legislation Matters.

EUGENE, Mar. 24.—The Oregon State Survey of Mental Defect, Delinquency and Dependency, conducted by the Extension division of the University of Oregon at the request of the Legislature under the supervision of the United States Public Health Service, has been successfully completed by the voluntary assistance of hundreds of loyal Oregonians, without the expenditure of any special state appropriations and the report has been transmitted to the members of the Thirty-first legislature. Oregon has thus blazed a new trail for co-operative community betterment in the fields of mental, physical and social hygiene.

The survey has reviewed over 65,000 socially inadequate individuals in partial dependency; 20,141 were delinquents. Excluding two thirds of each type as minor cases, there remain about 20,000, of whom approximately 10 percent are mental defectives. Total known insane and mental defectives, 7,656, a ratio of one thousand of the general population. Rejections in the army draft in Oregon for such causes were 11,26 per thousand, so the survey is very largely conservative. Special duties with adult criminals showed 51 percent mentally dull or defective while 22 percent of the adult criminals have the mind of a child of twelve years or less and are distinctly mentally defective. The same element of mental defect holds true for the juvenile delinquents. Of the 451 dependent inmates of poor farms, 1 showed mental defect.

In addition the survey shows a referendum to the teachers in the public schools covering 32,480 pupils in the state. Of these 3,742 were too old for the school grade they were in, owing to their failure to advance in school work in accordance with normal expectation. The causes of this retardation in over-age grade children are parental, economic, environmental, temperamental, physical and mental. Among environmental causes, the teachers found the use of a foreign language in the home of a child was the sole cause of the child's school difficulties in 3 1/2 percent of all cases of retardation reviewed. The survey found among these 9,742 retarded school children in Oregon 523 who by reason of various physical handicaps appeared to be entitled to relief under the crippled children's law. Inadequate school progress reveals potential social adequacy in the next generations of adult citizens. The welfare of the child of today is the welfare of the race of tomorrow. Unless the handicapped child is given such care, treatment and training as the case demands, potential inadequacy becomes in future years actual inadequacy and the case then appears upon our public records as a non-constructive, inefficient citizen.

The report of this survey, soon to be published by the University of Oregon, demonstrates the fundamental causes of failure, unhappiness, delinquency and dependency in an citizen life as well as the reason for much of the rural village, municipal and state tax expenditure. It answers the request of the legislature for information upon which may be built such plans for future improvement in social legislation as the citizens of Oregon or their representatives in the legislature may deem just and wise for protecting the interest both of the handicapped individuals and of the state.

A poultry demonstration was held this afternoon at the Heakett Baker poultry farm in Edenbower. Prof. I. E. Cosby, of the Oregon Agricultural college, was present and conducted the demonstration which was sold under the auspices of the Douglas County Farm Bureau. A large number of Roseburg poultry enthusiasts were present and a great deal of valuable information was gained. Well attended meetings were held yesterday at Canyonville, where he "chickens" reels of motion pictures were shown last night.

Huron Clough was in the city today from Canyonville attending to business matters.

fence in the diamond, if the Oaks come back.

GOLF SCHOOL ESTABLISHED.

LOS ANGELES, Cal., March 25.—A golf school has been established on the roof of the Los Angeles Athletic Club, a seven story building in the downtown district. Willie Dunn, prominent golfer, will be in charge of classes. The school will comprise ten or more courts. There will be putting "greens" with a variety of holes. Removable canvas roofing will cover the "greens" to permit practice in all weather.

RECORD IS SET.

The farm bureau team at Yoncalla has set a state record by signing up 101 members in four days' work. This is a record which has not been equaled in any county for four days work, and J. H. Hale, the solicitor, who has worked in eight counties, states that he has never worked with a better team than the one operating in the Yoncalla community. The team there is captained by John Kruse.

Robbery Suspect Makes Escape

A mulatto, charged with robbing a store at Goshen, escaped from the officers last night after he was surrounded. Word was received in this city late last night that the suspect was headed this way, and the local officers, together with two Cottage Grove policemen, visited the railroad yards in the hope of apprehending him. He was finally found leaning against the dispatchers' office and the officers quickly surrounded the building, but as they closed in on the boy, who is an expert runner, he took to his heels and escaped into the darkness. He and a companion were charged with having entered a store at Goshen, appropriating shoes, clothing and small change. The companion was arrested, but the mulatto escaped after a thrilling chase at Cottage Grove and made his way south.

Large Crowds Attend Revivals

(By C. H. Hilton).
 Probably the largest week night audience yet in attendance was present last night at the Christian church. Many expressed themselves saying, "It was a fine service." There were some fine musical features. Mr. Curtis sang a special solo, and he and his wife also gave a duet. The people greatly commend the work of these singing evangelists, and the leading of Mr. Curtis in general singing is also highly received. Mr. Stivers spoke last night on "The Treasure in Earthen Vessels." Mr. Stivers spoke of the necessity of the care of the body, which was the temple of the Holy Spirit, and plead with people not to misuse or abuse the body. He showed how to receive the Holy Spirit, and what the Holy Spirit did for people when he came into their lives. Gave some examples of the wonderful transformation wrought in lives and in homes by the indwelling power. Tonight the evangelist will speak on the theme, "Running From God, But Too Honest to Steal a Ride." The children's chorus will sing this evening. The following short program will be given in the Bible school: Song, primary department; recitation, Troas Church; duet, Garnet Wilcox and Alma Jackson; recitation, Jessie Gibbs; object lesson, Evangelist John F. Stivers. The singers will lead in stirring song service. A special program of music will be given both at the morning and evening services, and the special Easter sermon will be given at the morning hour, while in the evening the sermon will be, "Amusing Expenses." The school set a mark of 300 in attendance Sunday morning and expects to reach it.

Poultry Meeting at Edenbower

A poultry demonstration was held this afternoon at the Heakett Baker poultry farm in Edenbower. Prof. I. E. Cosby, of the Oregon Agricultural college, was present and conducted the demonstration which was sold under the auspices of the Douglas County Farm Bureau. A large number of Roseburg poultry enthusiasts were present and a great deal of valuable information was gained. Well attended meetings were held yesterday at Canyonville, where he "chickens" reels of motion pictures were shown last night.

Huron Clough was in the city today from Canyonville attending to business matters.
