Look to Your Paint

Is It Giving You Protection?

IF CHECKED or cracked, new paint is needed, and it will be cheaper to paint now— for deterioration costs more than good paint.

A well painted house brings several hundred dollars more on sale and more in rent. Keep it painted and it stays new for years.

The best paint spreads more easily— saves labor cost. It covers more square yards— you buy more gallons of cheap paint.

The best paint then protects the house, if properly applied, from five to ten years longer.

There is no question as to which costs less. Don't allow surfaces to rot. It costs less to paint them.

The best paints are scientific in formula and preparation.

We've made them for 72 years—to meet weather conditions in the West.

The best materials— PIONEER WHITE LEAD, pure linseed oil, zinc and color—are combined in Fuller Paints in scientifically exact proportions with long-time skill.

Our process super-purifies and "whitens" the lead base. It must be fine enough to pass through a silk screen with 40,000 mesh holes to the square inch. Fine lead means easier spreading and a more elastic, tougher protective coat. The "Whiter" lead base means more beauty in the colors.

Such paint will, if properly applied last from five to ten years longer than cheap paint, and look better through the years.
