A Daily Column of Questions and Answers Conducted by a Woman Who Knows. Address your Letters to Mrs. Elisbury Care Roseburg News-Review.

A. Two hundred and seventy-two; 46 were officers.

Dear Mrg. Ellsbury: I am a boy 18 years old. Should a boy of my age go with girls or should he stay at home most of the time? JACK.

A. A boy of your age may occasionally go out with girls whom he has met in a conventional way. You are too young, however, to pay marked attention to any one girl, and should not permit girls to be your chief interest. You should be devoting most of your time to improving your education and preparing for your future work.

devoting most of your time to improving your education and preparing for your future work.

Dear Mrs. Ellsbury: What is the speed of the fastest train in the United States, what road runs it, and in what state or states does it run?

A. The "Twentieth Century Limited" of the New York Central runs between New York and Chicago. The mileage from New York to Chicago is 978.73, and the scheduled time for the "Twentieth Century" is 10 hours, and its speed is 51.51 miles per hour.

Dear Mrs. Ellsbury: Who invented the wagon wheel? T. C.

A. It is an evolution from the wheels roughly made from solid blocks of wood and attached to carts which were used centuries before the Roman conquest.

Dear Mrs. Ellsbury: I often go home with my girl chum to spend the evening. She has a brother two years older than I am and I like him very much. He always seemed friendly to me until lately. Now if I go to their home he soon makes some excuse to leave. I don't know of anything I have done to offend him. What shall I do about this?

SWEET SIXTEEN.

A. It may be that you are mistaken, and that your chum's brother.
