### The C. A. Lockwood Motor Company

FORD AND FORDSONS

Mrs. E. O. Eldridge, of Seaside, is spending several weeks in this city visiting with friends. Mrs. Eldridge is the house guest of Mrs. Charles S. Heinicke.

Mr. and Mrs. A. J. Hochradel and sister Miss Helm, left this morning for Madras, in Eastern Oregon, to visit with the latter's sister, Mrs. Freeman.

#### Creation of Life Puzzle Science

By RUSSELL BROWNING  
(United Press Staff Correspondent.)  
WASHINGTON, June 11.—If you are living a couple of hundred years hence don't be startled if you see a sign something like this "Smith, Jones & Co., Manufacturers of Rats, Birds and Humans. Name your species. Prices reasonable."

Professor Austin Clark, head of the biological department of the Smithsonian institute, declared today that scientists of the future will be able to "manufacture men."

Clark was asked to comment on the announced discovery by French savants of a method of creating organic life from certain quartz and meteoric stones.

"Maybe it's true, maybe not," said Clark. Many able scientists have been fooled into believing that they have created "life." Nearly every other salient mystery of biology has been solved except this one supreme puzzle. It is now possible to construct all the organisms of a living creature. They are chemically and anatomically perfect—but they won't work when it comes to "living." If this problem has not been solved, it will be some day.

"If a primitive form of life can be created, we now know that we could modify and develop that form to any form of higher animal life. The external circumstances that created the different species of life are now known and can be artificially applied. The reason that we cannot take the so-called simple forms of life now and develop them into higher animals is that there is no real primitive form of life left on the earth. The simplest organism has developed from the common starting point into a tremendously complex being. A hundred million years of heredity has fixed its life, form and traits until artificial modification is now very limited.

"This would not be true of newly created life. Such an organism would be tremendously impressionable. It would mould and develop under the stimulus of artificial conditions as artistic clay in the hands of the sculptor. Practically any form of life now existent could be created from this primitive cell.

"It would probably take a couple of million generations to produce an animal like a dog or man," said Clark, "but the length of life of each generation could be speeded up, and the whole transformation got through within say 500 years.

"No doubt a lot of monstrous freaks would be created by mistakes in administering the stimulus."

#### L. F. T. ENTERTAIN.

The L. F. T. dancing club will entertain with a picnic dinner and dance Monday evening at Riddle. Dinner will be enjoyed at 6:30 and will be followed by an evening of dancing which begins at 8:30.

This affair has been planned in honor of Mr. and Mrs. S. C. Bartrum, prominent members of the club, who intend leaving soon for Salem, where they will make their permanent residence. Invitations have been extended to many as guests from this city and Riddle, and the affair promises to be the most enjoyable of all dances this season.

#### AROUND THE TOWN

**From Riddle—**  
D. S. Beals, of Riddle, spent yesterday in this city attending to important business matters.

**Home From School—**  
Arthur Davis, and Clifford Sherrill arrived home Thursday evening from Oregon Agricultural college, to remain for the summer.
