NO LONGER OLD AT THIRTY
Women Have Proved Conclusively That Age Is Not at All a Matter of Years.

Perhaps women who are not at all sensitive about their age are still in a minority. But their number is growing. In almost any gathering where women chatter pleasantly and with some intimacy about things which interest them you find at least one woman who cheerfully admits that she is not thirty-five, but forty-five, or that it is a very long time since she was thirty.

One of the tragic convictions which have helped to wreck women's lives is this stupid tradition that at any given age a woman gets old. Years ago most women celebrated their thirtieth birthdays with a sense of depression. With greater common sense, women at least began to see that even after thirty they might enjoy life, and that the games and amusements and joys which are possible at twenty are no less possible at forty.

Today there lingers this ancient superstition that if you have reached a certain age you must not admit the fact. But it will not endure long. Now that we hear of a woman of ninety playing really capable golf, of women past fifty banding themselves together in cheery fashion as golfing veterans, of women of every and any age enjoying life, it will become unfashionable to conceal one's age.—From the Continental Edition of the London Mail.

Aid For Stock Raisers to be Meeting Topic
(News-Review Washington Bureau.)

WASHINGTON, June 14.—Senator Stanfield will attend a conference of financiers in Chicago tomorrow at which time it is expected private bankers and financial men will furnish \$50,000,000 to relieve the livestock and agricultural situation.

Eugene Mayer, of the war finance corporation, representatives of the J. P. Morgan company and his associates also will attend.

The conference is the direct result of the bill introduced by Senator Stanfield asking that congress appropriate \$50,000,000 from the treasury to be used through the war finance corporation to relieve the livestock men in the financial crisis which has come upon them.

Bankers Spurred On.
Until the bill was introduced, however, there was no move on the part of the bankers of the country to relieve the livestock men. During the last few days, however, a group of financiers headed by Mr. Morgan have had conferences with Secretary Mellon, Senator Stanfield, Senator Gooding of Idaho and others, looking to the handling of this particular situation without legislation through the treasury and the war finance corporation.

As a result of the conferences, Mr. Morgan and his associates have agreed to handle \$25,000,000 of this \$50,000,000 advance if western bankers and associates will take care of the other \$25,000,000.

There seems to be encouragement for the belief that this can be arranged; and a number of western bankers, including President Mills of the First National bank of Portland, Ore., Thomas M. Marlow, of Helena, Mont., and other well known bankers of the west, have been invited to participate.

Government Interested.

This financial crisis, the livestock has been called in Chicago, Eugene Mayer of the war finance corporation, Senator Stanfield and other prominent government and representatives of the war finance group will be present and try to include arrangements for the financing of the livestock situation.

In addition to this it is known that the White House has representatives of the treasury department and the Federal reserve are now in the west seeking leading bankers and business men as a result of which representatives of the agricultural section of the Middle West will be called in conference in Chicago to discuss and formulate a policy for the present adjustment and financing of the livestock problem.
