ROSEBURG, OREGON, AUGUST 18, 1921.

THE INSIDE WORKS.

How much consideration have you ever given to that mysterious something hidden somewhere on the inside of you? That something which unconsciously takes possession of you and keeps the old works moving right along after all the rest of the body has gone on strike and laid down its burdens. That something in which dreams, air castles, hope, faith and everything worth while finds its origin. What is it that says, "Come on, let's get out of this rut"? What is it that says, "Come on, old bag of tricks let's combine our forces and put this thing across"? When you pick up your pencil and pad, where do you go for counsel, who and what is this great counsellor that puts the words on paper for you? What is this inside power which gives you courage, will power, man power and every other kind of comfort and strength but the inner self which is capable of guiding you safely and surely along your course into any position you may desire if you will submerge self and accept it as your pilot. Our bodies are but Marionettes, something or somebody must pull the strings. If we take this pleasure away from a willing, anxious and waiting inner self and delegate the job to some other body with an active, subconscious mind, we surrender a God-given endowment, to be bound, worried and driven from its true course of sailing. Whose fault is it that many of us are underlings? Try and be guided more by what your inner self tells you is right, than by the immediate advantage which too often passes the outer guard with a false pass word.

Reports to the effect as many as 60,000 former school teachers, most of whom gave up their calling for the purpose of participating in war work of some character, are now ready to assume their old duties, as taken to mean the little red schoolhouse as well as the city schools will not longer suffer from a shortage of instructors. This return to school teaching has been added to a great extent by the action of the executive departments and bureaus and commissions in Washington in dismissing thousands of war workers. A surprising percentage of those who located at Washington for work of a clerical character during the war were teachers. This renewed interest in the public schools, which means a new vigor and devotion to their work on the part of the teachers, is certain, in the opinion of school executives, federal state and local, to result in good for the cause of education.

The problem of having running water in the house, as well as on the farm, is one which farmers everywhere are struggling to meet. The county agent of Cabarrus county, N. C., employed by the United States department of agriculture and the state agricultural college, was able to persuade one of his demonstrators to dig out a basin on the side of a hill near his house and line it with cement instead of building a tower. The elevation was about 20 feet above the top of his house, which gave sufficient pressure. The outlay for placing water in both his and his brother's house was \$400. The basin holds about 2000 gallons and keeps the water at a more uniform temperature than would a tank in a tower, which would have cost twice as much.

A young man living in Roseburg hired out to work in the fields the other day. The boss went out in the afternoon of the first day to see how the boy was making it. He found him lying in the shade of a tree, smoking a cigarette. "Tired?" asked the boss. "Nope!" answered the young man. "Hain't done nothin' to make me tired. Just a layin' here waitin' for quittin' time 'cause I c'me to supper." For the past two years a great many young and old men have tried to earn a living that same way.

The recent local murder mystery, which has occupied prominent front page space in all the leading newspapers of the nation for the past five weeks is just about ready to fade into oblivion, for the time being, at least. A new angle will have to "break" if there is going to be anything doing of real news value before the alleged murderer is placed on trial in this city.

There are two reasons why the ladies have given up the idea of carrying their money in their socks. Their petitions are so short that there's no room at the top, and their hostility is so thin that the nasty porch climber can see whether the bank has money enough in it to pay for robbing it. Outside of that, the banks are in good condition.

After five weeks of excitement we can now get down to business and help harvest the bumper fruit crop of this country.

AROUND THE TOWN

Here On Business

L. S. Jones of Park arrived here this morning after spending the past few days here on business.

To Grants Pass

Leslie Meredith left for Grants Pass this morning, where he will make his permanent home.

From Winchester

Mrs. Wayne Gillam of Winchester arrived here this morning to spend the day attending to matters of shopping.

Here From Salem

Mr. and Mrs. Oliver Locke of Salem are spending a week in this city visiting with friends. Mr. and Mrs. Locke motored down.

Arrive From Oakland

Kisses Birdie and Nellie Easty also GOODYEAR solids in stock at

WITH THE FUNNY MEN

CORNED, AS IT WERE

"An important moment?"
A long-distance telephone call. That's another annoyance due to the progress of science."

"Yes?"

"When a man, returning you for names you can lose or ignore the telegram, but you have to make some kind of answer when he gets you into a telephone booth."

Just Another Good Man—
"Break the crystal in my watch last night."

"Where were you?"
"Over to Grace's house."

"Thought so."

"Why?"

"Break mine on the same stone beach."—Washington, says Lew Mack.

The Whole Story

Mrs. Peeler—I see the neighbors had to give up their apartment, a wonder thing.

Her Husband—Keeping domestic animals in it, I reckon. According to the neighbors he's a joker, his wife's a cat, his son a puppy and his daughter a bird.

The Reason Why

George—Tug the wire—on! When does one?

Jack—No, I got disgusted. She has such a coarse laugh.

George—I never noticed that.

Jack—You could if you'd been within hearing when I proposed to her.

Executive Demands

"Do you subscribe to the poetic theory that love is all in art?"

"So," said Mr. Grossman. "And furthermore, I believe the valuation placed on the broken heart in the average break-of-heart case is the rankliest kind of profit-making."

Cheering Thought

He (optimistically)—"I think it's an awfully good idea to have an avocation to me."

She—"Don't worry, dear. He has a still greater avocation to paying my bills."

Still Going Thru It

With—You said you would go through fire and water for me.

Hub—Well, haven't I? The rain continued like a fire, and goodness knows you've kept me going through that.

SUCH IS LIFE

He—I've spent fifteen unhappy years with you.

She—Yes, but you've never spent many unhappy dollars on me.

The Lamp

A narrow lamp on a narrow shelf. She doesn't like it much, though she has but little room. Still, she doesn't need much.

A Discouraging Impression

"People don't need Dickens as much as they used to,"

"People," said Miss Dayson. "The institutions in most Dickens publications discourage a reader of the sort. They show people whose clothes are as tattered out of style."

No Self-Flattery

"Are you a woman of the people?"

"Yes," replied Senator Sargeant. "I don't feel that way about it. While I enjoy a fair measure of confidence and success, nobody thinks of taking the responsibility from over me that is made over a good servant."

Making Her Master

"The doctor says my husband must exercise, but he positively refuses to take any. What shall I do?"

"Why not get him a hat that will keep off sun or windy days?"

A Choice Container

"Your nosebooks talked of giving me a lasting one."

"They did better than that," replied Senator Sargeant. "They came across with large elegant campaign barrels."

I Know

I used to think I knew; now I don't know. The more I know, the less I know. I know I know the less.

The Drawback

"There is only one reason I know of who a woman doesn't have a key to something good."

"What is that?"

"It's her husband."

Preparatory Training

"Gymnastics" said the teacher respectfully. "You occupied most of the time in your composition."

"Yeah, I'm going to be a dancer when I grow up."

A Common Failing

Muggins—Don't be so hard on Schism. He has lots of good in him.

Engage—He had to break his nose.

Wise—He's a good dancer.

THE KITCHEN CABINET

622½ Roseburg Avenue, Oregon.

Please send good box for you and me. We'll heat this summer yet, you see. Then it's just just one, two, three full seasons of the dragon's lair. One each for the sun and the moon and when the winter comes to us. Come on, then sleep it through. These masses are set to get the better of us.

MEATS THAT ARE DIFFERENT

Large chops may be raised with a swelling resulting from a diet quite different.

Choose the large chops and have them cut quite thin.

Remove the surplus fat and skin them from the edge in to the bone, mincing a pocket to hold the stuffing. Make the stuffing, saute onions, add salt and pepper and place them in a sauteed pan to bake for 20 minutes in a hot oven. Make a gravy from the fat in the pan and serve with the chops. A most succulent may be observed.

Calf Liver is a favorite—Cut a pound of calf liver into thin slices, add two onions cut in rings, a dash of paprika, salt and pepper and place them in a sauteed pan to bake for 20 minutes in a hot oven. Make a gravy from the fat in the pan and serve with the chops.

CHICAGO—L. L. Winters, the marketing expert, in an analysis of the new grain pooling contracts, warns against the risk of financial loss to farmers. Several months ago the Committee of Trade and other exchanges are to be analyzed by the Chicago Board of Trade, and other exchanges as essential in assuring farmers full value for grain. The new system, after inquiries from many farmers who had studied his previous analysis, he advised them to re-examine the contracts with their attorneys before binding themselves to co-operative marketing under a plan that might allow unlimited charges as "cost of handling." He called particular attention to contract section twelve.

Mr. Winters who has devoted years to study of grain marketing found the plan "economically unsound" and characterized existing facilities of the Chicago Board of Trade and other exchanges as "dangerous defects." Later some of these were remedied.

The pooling contracts, the expert states, are designed to permit deductions from the selling price

EXPERT WARNS OF LEGAL PERILS LURKING IN GRAIN POOLING PLAN

NEW CROP CAN'T WAIT

"to provide special funds for carrying out of the purposes" of the new marketing organization. He believes this would permit any charge, from exorbitant salaries to be taxed against the farmer's grain.

Mr. Winters made the analysis after inquiries from many farmers who had studied his previous analysis. He advised them to re-examine the contracts with their attorneys before binding themselves to co-operative marketing under a plan that might allow unlimited charges as "cost of handling." He called particular attention to contract section twelve.

The pooling contracts, the expert states, are designed to permit deductions from the selling price

Moving to Eugene

Mrs. Irene Furtach has purchased the St. Francis Apartment house at Eugene and will move to that city this week to take up her permanent residence. The transaction was made through the A. T. Lawrence agency.

Tiller Man Pays Fine

A. R. Peltier, living near Tiller, was yesterday taken before the justice of the peace at Pendleton by Ranger Costner for burning without a permit and allowing the fire to escape. Since no damage was done, the minimum fine under the state law of \$5 and costs was assessed by the justice of the peace.

CLARK'S PHOTO STUDIO
Roseburg National Bank Building.
