## DO YOU KNOW

That Roseburg has some of the finest music studios in the state, and as good music teachers as can be found anywhere, and that we have as fine a music store as can be found between Portland and Frisco, and me good Pianos as money can buy, with prices far below Portland prices. This is an oppor-

tunity that you should not neglect for your children's education. If you haven't a piano let us talk it over with you. A very small payment will put a piano in your home, and your children can start in with the other students the 1st of September. We handle pianos of all grades from the cheapest to the best. Also 2nd hand pianos and organs.

## **CULL "SLACKER" FOWLS IN FLOCK**

Poultry Methods Greatly Improved by Campaigns in Communities in Idaho and Iowa.

#### FARMERS' WIVES GET \$177.22

Many New Poultry Houses Have Beer onstructed and Others Repaired and Cleaned-Breeding Eliminates Nonlayers

(Prepared by the United States Depart-ment of Agriculture.) Cuiling campaigns in Iowa and Idaho have greatly improved poultry methods in the communities where they were carried on. The home dem onstration agent, co-operatively em-ployed in Marshall county, Iowa, by ployed in Marshall county, Iowa, by the State Agricultural college and the United States Department of Agriculture, states that many new poultry houses have been built and many oth ers repaired and cleaned. In one with the assistance of a spe cialist from the State Agricultural college, 66 demonstrations of culling were given, 950 persons attended and 7,326 birds were handled from which there were 3,003 culled out. Tuberculosi was found in 43 flocks and choler:

Thirteen egg records were kept for two weeks before and after the dem onstration. The owners found that 2,219 birds laid 5,492 eggs before cullthreshing now days.
Prince Dinley and family and Olie
Macalem and wife have gone to ing and that after culling 1,527 birds laid 5.379 eggs, which meant that 692 were not producing. The "slackers" were sold for 25 cents per pound, and netted \$177.22 for the farmers' wives In another county in Iown during

Macalem and Mrs. Wm. Cheaver and son Arnold and Mrs. W. H. Levins went to Albany last week by auto. Mr. Luse will soon take charge of the telephone office.

Wall Freyer is threshing in Kellogg at present.

Elkton has two doctors here now. No chance for a sick man.

P. M. one month 62 demonstrations were held in the cuiling of home poultry flocks by the home demonstration agent in which 6,833 birds were handled and 2,000 culled out, at a say

Demonstration Agent Culling Slacker" Hens.

ing of \$3,322 on feed. About \$1,200 was realized from the sale of these nonproducing birds.

Big Saving in Idaho.

Six home demonstration agents in Idaho counties report poultry culling with the result of saving \$51,366. Interesting reports from the countles include the building of 25 standard-type poultry houses, a tuberculosis eradica-tion campaign, two poultry excursions with an attendance of 170 interested people, and a community breeding circle to demonstrate that systematic breeding tends to eliminate nonlaying hens. Two counties conducted fall culling campaigns followed by co-operative marketing in carload lots, Defi nite poultry records are being kept by demonstrators in each of the six coun-

#### PRODUCE MUTTON FOR TABLE

There Are Many Areas Where Few Sheep Could Be Kept at Advantage-Thrive on Brush.

Sheep are not very generally kept on farms for supplying the family with There are muny areas, especially in hilly or mountainous regions, United States Department of Akriculture specialists point out, where nearly every farm could keep a few mut-ton sheep to advantage. Boys and girls clubs in some parts of the coun-try have done much to foster home production of mutton.

Sheep naturally graze over rather wide areas and seek a variety of plants. This habit adapts them to being kept in large numbers on lands of sparse vegetation or which furnish a variety of grasses or other plants. They do better on short and fine grass than on coarse or high feed. They will eat much brush and, if confined to small areas, will do a fair job of cleaning up land. When used in this way or on land producing brush only, they cannot be expected to prove very satisfactory in producing good lambs or good weed. Useful information for

### **CAPS ADVANTAGEOUS** IN PROTECTING HAY

Would Obviate Much Difficulty With Alfalfa Crop.

Old Methods Used in Curing Mixed Timothy and Clover Not Always Adequate for Good Grade of

Prepared by the United States Depart-ment of Agriculture.) Hay caps can be used to advantage on many farms in the eastern half of the United States, to keep rain from wetting hay in cocks, it is pointed out in Farmers' Bulletin 977 of the United

States Department of Agriculture.
In the corn belt, where thousands of farmers are growing small acreages of

Alfalfa Hay, Showing Cocks Covered

alfalfa, and beginning to realize the great value of this crop, the use of hay caps would largely obviate the difficulty now experienced in curing the first and the last cuttings. The old methods used in curing mixed timothyquate for alfalfa, and in many intances a good grade of sifalfa hay might be assured by the use of hav

In the South, where the weather is rainy a large part of the time during the long having senson, the hay cap the long haying season, the hay cap is an especially valuable addition to hay making equipment. Alfalfa, also alfalfa and Johnson grass mixed hay are cut from three to five times a year in the South, and a great deal of hay of inferior quality is made as a result of trying to cure by ordinary methods. In this section hay caps have been used to good advantage, especially with legume hay grown for market.

#### ESTIMATE OF LUMBER WASTE

Saved and Short Pieces Can Be Used in Odd Places.

Don't forget to estimate the waste in buying your lumber for building a poultry house, barn or other structure. In figuring on common sheathing add one-tenth for waste, and one-fourth for matched flooring and all kinds of siding. By careful cutting you can save much of the waste; and there are many places in a building where the short places can be used.

Don't buy too many nails. If you do they are almost certain to be scattered around the place, especially if there are children. Some specialists in the United States Department of Agriculture prefer wire unils as they are easier to use than cut nails, all though the latter kind have greater binding power. Use 10 to 20-d nails for framing; 8 to 10-d for sheathing; 6-d finish or easing pails for clap boarding, and S-d for siding. Four penny nails are 1% inches long, 6-d are 2 inches, and 8-d nails are 2% inches. It takes about four pounds of 3-d nails to 1,000 shingles; 18 pounds of 6-d for 1,000 square feet, board measure, of beveled siding; 20 pounds of 8-d, and 25 pounds of 10-d for 1,000 square feet of sheathing; 30 pounds of 8-d for 1,000 square feet of flooring, and 15 pounds of 10-d, or 25 pounds of 20-d for 1,000 feet of stud-

#### FEEDING CATTLE IN SUMMER

Animala Have Seldom Been Marked There is a Surplus.

The increase of chores in summe «IU operate against a great increase of cattle feeding during the season of field work, for the average farmer does not care to feed cattle night and morning in summer when tired out with the long day's work on the land But if one cares to investigate, he will find that summer-fed cattle seldom have to be marked down when marketed because there is a surplus of stuff in the terminal markets.

The ideal ration is made up of rich.

as compared with dry-lot feeding in winter. Counting all the factors in the game, the risk in summer feeding for market is far less than in winter.

### MINERAL MIXTURE FOR HOGS

Charcoal or Slack Coal, Wood Ashes, Air Slaked Lime and Copperas Are of Importance.

or slack coal one bushel, wood ashes one bushel, air-slaked itme four pounds, sait four pounds, copperas one and one-fourth pounds, before anyone, undertaking the raising of your hogs at all times. The copperas-sheep will be found in Farmer's Bul-letin \$40, while slaughtering and methods of cooking and curing the er they are mixed. This mixture helps mest are discussed in Farmers' Bulletin to keep down worms and makes the hogs have a better appetite. ---

### Young Men and Women Who Seek Success Should Read This Letter

June 30, 1921

Er. Mattice's report does not tell us whether Miss Rhoades and Miss Tells are at the present time students in your school. Please advise us on this point. In any event your school can new claim the most successful showing of having made the best test of any school in the United States. Four of your students, all graduates, have now been winners.

It is needless for me to tell you, Er. Walker how proud we are of this record. We congratulate you, Er. Wiese and each of these winners. When our accuracy map is revised showing four Behnke-Walker farss in Oregon it is going to look sighty good to us, and, we know, it is going to look even better to you.

Will you please be good enough there Miss and Miss Wells send me a brief biography of training and experience, if any; also photowhich may be used in revising our map?

With very best wishes and anticipating sine from you at an early date, I am

271 Gold Medal Winners

Why Behnke-Walker makes the best

showing of any business college in the United States
