One Night Only Wed., Jan. 25

SHED LIGHT ON WORLD'S AGE

Discovery by Humble Englishman Proved a Most Valuable Contribution to Scientific Knowledge.

A village grocer in Kent, England, some years ago came upon some peculiar stones around his house. He studied them intently and as a result succeeded in establishing the age of mankind!

As most people know, our primitive ancestors used tools and weapons which are known under the names of ecolithic, neolithic and palaeolithic instruments.

The grocer who made the discovery, Benjamin Harrison, came to the conclusion that these stones would perhaps throw some light on the subject.

For 50 years he made collections of samples, and by devoting himself to their study managed to prove that man existed at least 200,000 years ago. The stones he had collected were relics of ancient implements.

Mr. Harrison was content to spend his life in his native place, seldom traveling more than twenty miles away. When only twelve years of age he started his researches among the chalk hills of the Downs and on the site of the old Roman camp at Oldbury.

In 1919 his name was included in the civil list for "devotion to scientific work." It was stated that few men whose scientific discoveries are of real importance were so little known to the community outside the select circle of specialists.

At the time of his death he had collected 5,000 specimens of ancient stones.

HIS LIFE NOT A "FAILURE"

More Worldly Success Not the Only Thing That Has, or Should Have, Value.

"He is a little mild-eyed, gray man who never has amounted to anything. He is just another of life's failures." Thus wrote one business man to another.

Let's see. What is a failure?

A good many years ago the heart of a boy leaped with the surging impulses of ambition. All the golden dreams of youth, finer by far than any realities, were his.

But he never quite managed to make things turn out the way he had planned. Ridding the high winds of great accomplishment was not for him. His was the colorless monotony of grocery bills, rent, half-soled shoes and a silver watch.

He wanted to be a diamond, but he only turned out to be a piece of coal.

One of life's unfulfillments, that's all. But not a failure, because no man who is a good husband or a good father or a good citizen is ever a failure.

If he is, there's something wrong with the whole scheme of human destiny.—Thrift Magazine.

Meaning of the Carat Mark.

When you buy a watch or a ring or any other article of jewelry you generally find the mark "14k" on it. If it is made of gold of that proportion. But as to just how much gold there is in a 14k gold ring, few people know. Some gold is 18k and some 22k.

Just as the name "sterling" stamps silverware as being made of solid silver, so the carat marks on goldware indicate the amount of gold used in making it. Gold is divided into twenty-four carats, the "k" mark meaning "carat." Pure gold contains twenty-four carats. The mark "14k" on an object made of gold means that there are fourteen parts of gold and ten parts of alloy, generally copper. In its makeup. Articles made of pure gold would not retain their shape, so the alloy is added, 14-carat gold being most generally used in the manufacture of jewelry.

Curve-Ball Pitchers Will Stop Hitting

(By HENRY L. FARRELL.)
(United Press Staff Correspondent.)
NEW YORK, Jan. 24.—Return to the pitching standards of the old days is predicted in the major leagues next season.

Skill of the big time hurling stars decreased noticeably due to legislation against the use of foreign substances on the ball and the lively ball that brought about such a vogue of hard hitting last season.

When the rule makers of the game legislated against the use of resin and emery they more than took away an ally from the pitcher because it increased the morale of batters who went to the plate more confidently and consequently met with more success.

It is admitted by high officials of the game that the ball was lively last season, but not through any pre-arranged plan. It is said that the ball was constructed along the standard specifications but that the better quality of wool and rubber available since the war added to the life of the sphere.

Use of curve balls is looked upon as the curb for unusually hard hitting. Success of the Giant pitchers against the Yanks in the world's series was attributed by Johnny Evers, one of the smartest men connected with the game, to the skillful use of curve balls.

John Heydler, president of the National League has the same theory about the success of his league in the fall classic.

Heydler maintains that conclusive proof was given that control of a good curve ball with a change of pace makes a pitcher just as effective against heavy hitters as the former addicts of the shine-ball, the emery-ball and those few remaining of the spit-ball gentry.

"Pitching is bound to improve because minor league managers are encouraging young pitchers to use curve balls," Heydler said. "When the spit-ball was in vogue and when the freak deliveries were permitted, youngsters tried to acquire those 'arts' in preference to the old orthodox methods of hurling. Now they are coming back to curves."

"The pitching in the major leagues was bad last year, but one thing that impressed me was the number of promising curve ball pitchers that came up. With such material being developed I feel sure that in time the game will have pitching of the old standard when six or seven hits was considered a rather loose game."

CALIFORNIA HOOPER WINS

PULLMAN, Wash., Jan. 24.—The University of California basketball team defeated Washington State College here last night, 21 to 15.

The Bears won through their superior basket shooting. The Cougars appeared to have the edge on the visitors in passing and guarding, but until the last five minutes of play they were unable to locate the basket. Although the Cougars kept the ball in their own territory the greater part of the time, the first half ended with the score of 11 to 2 for California.

The second half started with a rush and during the first few minutes of play the Bears converted several shots, increasing their lead. During the last five minutes of play the Cougars caged 10 points. The teams met again tonight.

WILL TAKE THE JUMP OUT OF BASEBALLS

CHICAGO, Jan. 24.—(United Press.)—The war has been blamed for almost everything, but this is the first time it has been held responsible for the lively ball in the major leagues last season.

That, however, was exactly what Stan Johnson, American league president, declared, in denying reports that magnates had ordered manufac-

turers to make less active baseballs in 1922.

The order wasn't needed. Preparations already had been made to take the zip of the baseball, he announced. During the war, Johnson asserted, manufacturers were only able to secure an inferior brand of wool yarn with which to wrap the horsehides. Last season, when superior Australian yarn was available manufacturers failed to make allowances for the greater resiliency. This is what put the unusual number of extra base knocks in the batting records, according to Johnson.

Also rubber centers were found to be uneven, he declared, which added considerably to the liveliness of the ball.

AMBITIOUS PLANS FOR FOOTBALL SERIES

URBANA, Ill., Jan. 24.—(United Press.)—Transcontinental football games, during the regular playing season, is the plan of Robert Zuppke, University of Illinois coach.

"Within the next few years," he said, "I hope to take my team from coast to coast during the regular season for games with representative teams in each section."

California already has been listed for a series starting in 1923, and an eastern team may be booked for the same season.

"Provincialism and commercialism are the game's greatest dangers," Zuppke asserted. "Transcontinental games will break down the antagonistic sectional barriers, and will develop a spirit of sportsmanship and unity, which will assure increased popularity, not only among colleges, but with the general public."

Zuppke also believes that brains, not brawn, make the player.

"In these days of open plays and trick formations, victories are won by outmaneuvering the other team. And this requires intelligent, alert men. Brains will win every time."

Fast Basketball Game Next Friday

A fast game of basketball is expected Friday evening when the Cottage Grove boys in a double-header. The Cottage Grove boys, according to reports, are fast, heavy and rough and will give the local players their first real fight of the season. The team has had no chance to show its strength as yet, having played teams from only a few of the smaller schools so far this season.

Coach Hargraves of Cottage Grove states that the team there is in fine trim and is working hard for the trip to the state conference. The Cottage Grove girls have one of the strongest girls teams in the valley and are confident of defeating the Roseburg girls.

According to early indications Roseburg has an exceptionally strong boys team this year. Although the team is light it is exceedingly fast and the boys are showing up well in signal practice. Coach King is working them overtime on strategy and this will doubtless aid the team in winning victories.

The girls are profiting by the weaknesses shown by the Grants Pass girls and a general speeding up is in progress. The team was slow and awkward in that game but a great improvement has been made.

James Eaman, football and basketball coach at Grants Pass has been engaged as referee. Mr. Eaman was formerly basketball coach at Pocatello, and is now refereeing nearly all of the southern Oregon contests.

Eddie Durno of the University of Oregon will referee the other games in this city. These two referees make it possible for the local team to assure all visiting aggregations of fair treatment. The schedule for the season is as follows:

January 27th, Friday, Cottage Grove at Roseburg, girls and boys.

February 3rd, Friday, Eugene at Eugene.

February 4th, Saturday, University

Few people realize the bloody warfare that was waged on the western plains during the late nineties between the cattlemen and the sheepherders. It was a real war, one that resulted in real bloodshed, and many lives were lost before the two factions settled their difficulties.

This warfare furnishes the theme for one of the most thrilling dramas of the west that the Majestic theatre has ever shown. "Black Sheep," Neal Hart's newest starring vehicle. The picture has been adapted from "Baa, Baa, Black Sheep" which appeared in a recent issue of "Short Stories Magazine" by its author, W. C. Tuttle, who has won considerable fame as a writer of western fiction. The feature plays for the last time tonight.

Mack Sennett's newest picture comedy of more than two-reel length is "Home Talent," now showing at the Liberty theatre. It tells a story at once novel and spectacular. According to the plot of "Home Talent" a quartet of stranded vaudeville "artists" and the "home talent" variety seek a way out of their financial difficulties and in the adventures

that ensue precipitate everything short of an international crisis. They even involve ancient Rome.

It is a great story, well worked out and adorned with some of the most beautiful sequences of scenes ever screened. It will surprise the writer if it is not found that Mack Sennett, in motion picture art photography, has blazed a new path in the enticing realm of screenland.

Shirley Mason, the William Fox star, will appear here tonight in her latest Fox picture, "Queenie," at the Antlers theatre.

Who is the prettiest girl in Roseburg?

Delays That Were Fatal.
Former King Karl stopped for dinner at a time when he should have gone on; and all history suggests that such delays are nearly always fatal.

Hannibal lost Carthage, a possible triumph, when he stayed to eat many dinners in Capua, just as Prince Charlie lost his hope of the crown when he delayed on his march to London. Six weeks at Hollywood ruined the Stuart cause. "Had he at once marched south he might well have reached London, and had he reached London the face of history in this island might have been changed." So, too, with James II when William III landed in England; had he thrown off hesitation and moved at once to meet the invader the chances are that there would have been no "Glorious Revolution."

ACHES AND PAINS—SLOAN'S GETS 'EM!

AVOID the misery of racking pain. Have a bottle of Sloan's Liniment handy and apply when you first feel the ache or pain.

It quickly eases the pain and sends a feeling of warmth through the aching part. Sloan's Liniment penetrates without rubbing.

Fine, too, for rheumatism, neuralgia, sciatica, sprains and strains, stiff joints, lame back and sore muscles.

For forty years pain's enemy. Ask your neighbor.

At all druggists—35c, 70c, \$1.40.

Sloan's Liniment (Pain's enemy)

Clear Your Complexion of pimples, acne and other facial disfigurement.

Use freely Dr. Hobson's Eczema Ointment. Good for eczema, itching skin, and other skin troubles. One of Dr. Hobson's Family Remedies.

FORD RETAIL SALES GO OVER MILLION.

Show Increase of 105,000 Cars and Trucks Over Previous Year.

Retail sales of Ford cars, trucks and Fordson tractors have again exceeded the million mark for the year 1921, according to a statement given out today by the Ford Motor Company.

The Ford factory and assembling plant production figures reached a total of 1,050,740 cars, trucks and tractors for the year, with retail sales by dealers approximating 1,093,000, which in the United States alone surpassed the 1920 retail sales record by 103,213 Ford cars and trucks!

The Ford Company says the outlook for 1922 is decidedly optimistic. In fact, concrete evidences already exist in that car and truck retail sales for December, 1921, exceeded December, 1920, sales by almost 25 per cent, and Fordson tractor retail sales for the same periods show an increase of over 100 per cent for December, 1921, as well as an increase over the total tractor sales for the month of November.

These facts seem to indicate that not only are the farmers buying more freely, but that the general public is becoming more responsive and receptive.

Another point brought out by a comparison of production figures for the past two years shows that Ford enclosed cars are gaining in popularity, as 23 per cent of the 1921 production were Sedans and Coupes as against a total of 18 per cent for the years previous.

Recent reductions in Ford car and truck prices bought them to a new low level. The touring car now sells for \$248, the Runabout for \$219, the Coupe for \$280, the Sedan for \$245, the Chassis for \$225, and the Truck for \$430, all f. o. b. Detroit.

This is the fourth price cut in the past sixteen months. During that time the price of the Touring car alone has been cut from \$575 to \$248, a reduction of 40 per cent. Reductions on some of the other types have been even greater.

The Ford Company believes that this reduction, while not a large one, is especially important at this time as it should go a long way toward stabilizing market conditions.

Ford is giving employment at present to approximately 40,000 men in his main plant at Detroit.

The importance of which is emphasized when consideration is given to the fact that nearly 20 per cent of the city's population is directly dependent upon the Ford Motor Company.

A motion to make more definite certain portions of the complaint in the case of Preston E. Turnell against Elmer Giles, a suit for alienation of affection, was argued in the circuit court today. Attorney C. M. Idleman of Portland appeared for the plaintiff and Attorney B. L. Eddy for the defendant.
