HIDE JEWELS IN SANDWICHES

Jermsans Resort to All Sorts of Devices to Get Treasure Out of the Country.

Sandwiches spread with gold pieces or diamonds and eggs spiced with uncut gems have been successfully used by international smugglers to get such valuables out of Germany until in two recent cases the customs officials became suspicious of these travel lunches and discovered the deception. Now all "snacks" are carefully examined at the frontier.

A German merchant, whose lunch basket attracted the attention of the Polish customs officials at the frontier station of Konitz, was found to have a layer of gold coins interlarded between the layers of every sandwich and covered with a thick coating of butter, while each egg nested a valuable diamond. The total of his confiscated hoard was estimated at 18,000,000 Polish marks.

His fellow smuggler, a Dutch merchant, was intercepted at about the same time at the Holland frontier.

While the officials were vainly searching his baggage, they were struck by the fact that he was ostentatiously but rather nervously devoting himself to a huge sandwich. They found interbedded in the bread and butter three diamond rings, a diamond brooch and a number of loose diamonds. Further search disclosed 44 unset diamonds concealed in a cigar lighter.—Milwaukee Journal.
