Smith was telling how real quality needed no second introduction.

And that's 'the testimony so many people have given about Grape-Nuts. They didn't have to learn to like it.

Wheat and malted barley, skilfully blended, and slowly baked for 20 hours, in our great, sanitary food factories, are developed into a natural sweetness, richness and crispness that make an immediate appeal to the taste. The exceptional nourishment

which Nature places in these best of the food grains is perfected for complete and ready digestion and assimilation.

> Grape-Nuts builds for health and accomplishment.

A delightful breakfast or luncheon cereal, with cream or milk (ready to eat from the package); delicious when made into a pudding for dinner.

Ask your grocer to send you, or your waiter to serve you, this splendid food today.

Cotton Crop to Be Cut Down by Bankers' Order

By H. C. HAMILTON, (International News Service Correspondent).

ATLANTA, Feb. 23.—Assurance that there will be plenty of money for financing farmers who abandon canes and member institutions in the south are indisting upon liquidation of spot cotton held, by growers and merchants to pay present indebted-ness before more credit is extended. Mr. Wellborn declared that so far as his institution is concerned the pol-icy of the federal reserve bank is just the reverse.

inate a Nuisance,

The "London particular," the blinding, choking, solid, yellow fog, the Londoner's pride and the visitor's de-spair, has come back into its own. London's fog is not the soft, meist, gray mist that hangs over an American city in wet weather. It may be abso-intely dry or us wet as rain itself. It may envelop all of London, a blanket that recodes unwillingly, step by step, us a pedestrian advances.

It may envelop one or a dozen sec-tions, when it may be seen in the distance, and is stepped into as definitely as one steps into a doorway.

Whatever the real "London particu-lar's" character, it is a real fog; and when it comes trains stop or slow to a nervous crawl and street traffic is all but halted.

The London fog comes with the autumn and early winter, when fires are lighted in 2,000,000 fireplaces and the smalle is unable to pencirate the clouds. For several years there had not been much fog; last year there was almost none. This year it is back, and the Londoner, cursing it when it makes him an hour late for work, se-cretly, hugs it in his breast-be
