Industry Awakes In Holy Land

JERUSALEM, Feb. 2.—Palestine is beginning to rouse from its long industrial slumber. Manufacturing industries are springing up rapidly in this country which could not boast of a single industry for hundreds of years under the Turkish regime. Now the new industries are beginning to compete strongly with foreign manufactures.

This change is attributed here to Zionist capital and enterprise. Carpet weaving perhaps ranks first in importance among the new industries. The Pro-Zionist society has a number of looms which turn out some remarkably beautiful work. Jewish colonists from Persia have also set up a number of factories which make carpet patterns for foreign consumption. The United States is their chief buyer for the present.

The manufacture of house and office furniture is making rapid strides. Two large Zionist factories are now busy producing all the wooden requisites of office and home for Palestine as well as for Egypt. Cigarette making, pearl button manufacture, wine producing, candy, brush and basket-making are among the many other enterprises which are being developed. Their promoters say they are more than satisfied with results, despite the general depression in trade prevailing the world over.

Two existing handicaps, however, seem to arrest the rapid growth. The first is lack of electricity to run the machinery in factories and the second the lack of suitable harbors, piers and sheds to facilitate the handling of the sudden increase in imports and exports.

The Rutenbergs scheme for generating electricity from the river Jordan, which has already been approved by the government in London and on which work is to start soon, is expected to eliminate these handicaps.

The administration is bending its utmost efforts to promote more enterprises. An exhibition of home industries, the first of its kind in Palestine, is being arranged for the first week in April.

FARM NEWS

START EGGPLANT IN WARM, SUNNY PLACE

Rich Soil and Good Cultivation Is Necessary.

Occasional Applications of Very Weak Liquid Manure Is Beneficial—Little Flies Beesle Is Most Troublesome.

Eggplant, so called because the great fruits are about the size and shape of an ostrich egg, is closely related to the tomato and pepper and requires very much the same treatment as do peppers, say garden specialists of the United States Department of Agriculture. The eggplant is very easily injured by cold and the plants must be started indoors throughout the greater part of the country. Start the seed in the house by sowing in a small box filled with good soil. The small plants should

be transplanted to pots or to a shallow box or tray filled with soil and kept in a warm, sunny place until the weather is quite warm. Eggplant requires a rich soil and good cultivation. Occasional applications of very weak liquid manure also benefit the plants greatly.

Eggplant is attacked by several kinds of insects, the most troublesome of these being the little flea beetle which works upon the leaves, biting them full of small round holes. As a remedy, dust the plants thoroughly with alcohol dust or very fine tobacco dust. By removing the fruits of the eggplant as soon as they attain good size the plants can be kept fruiting well killed by frost. Black beauty and improved large purple are among the leading varieties.

OX-WARBLE IS COSTLY PEST

Loss Caused by Decrease in Milk Flow, Destruction of Hides and Meat Wastage.

"The little ox-warble means an actual cash loss of \$50,000,000 to the United States each year," stated F. C. Bishop, of Dallas, Tex., in an address

before the American Association for the Advancement of Science, at their meeting in Toronto, recently.

"The loss comes," he said, "through a falling off in the milk flow, illness among the cattle, due to irritation and worry, destruction of hides and wastage of meat when the beast finally goes to the block."

"When the grubs reach the back of the animal," said the speaker, "they make their presence apparent by the lump or swelling their body causes. Gradually they make their way out through the back of the animal and drop off, to begin all over again their life history. The only hope of dealing with the pest lies in energetic action by cattle owners in working out and destroying the warbles from the backs of their stock. The herd should be gone over systematically every 30 days, the grubs squeezed out and destroyed. Of course, even then, there is loss because of the holes left in the hide; five punctures of the back or sides by warbles reduce any hide to No. 2 grade."

CLEANING AND GRADING SEED

No Other Single Farm Operation Which Gives Larger Returns in Producing Crops.

There is no single farm operation so easily and cheaply done, which gives larger returns than the thorough cleaning and grading of all seed sown. Besides cleaning out the weed seeds, the light weight seeds are taken out when the job is properly done, thus preventing the reproduction of the poorer plants. This practice carried on year after year permits the increase of the best and kills out the poorest. Thorough cleaning and grading of all seeds planted is the first step toward a successful crop. There is no time like the present to put the seed in proper shape for planting.

HIGH PRICE FOR CORN CROP

Much Depends Upon Kind of Stock It Is Given to—Purchased Make Best Returns.

Despite the low corn prices, there are many farmers disposing of all they raised at good prices, while others are getting less than market prices. It all depends upon the kind of stock that eats it. Purchased stock insures the best returns.

Intelligence of Elephants

Elephants are extraordinarily intelligent, even in their wild state, but it is an astonishing fact that with all this intelligence the animal will invariably permit the approach of human beings (on the right side of the wind) to within 20 or 30 yards with the utmost unconcern. It is on this account many hunters believe that they are blind to anything at close quarters. This opinion, however, is discounted by the fact that the females, particularly if they are with young, are very curious, and more often than not investigate matters, and if they do, do so with trunk aloft, head and ears back, and a "get-out-of-the-way" expression, which warns anyone in the jungle.
