### This is My Big Yield Tool

"YOU can control the yield more by the work you do before planting than by any work you may do afterward. The Culti-Packer, following good plowing and discing, puts the land in just the right condition to encourage quick germination and rapid growth. It does work that no other tool will do. I've proved this every year since I started to use the Culti-Packer behind my Fordson Tractor."

That's an experience typical of thousands of users in this community and elsewhere.
