## More Room to be Provided For Bank

The long contemplated extension and improvement of the Roseburg National Bank was started this morning when workmen started installing a new front in the adjoining store room, and tearing out the partition between the bank and that room. The adjoining store room was built originally with the intention of ultimately making it a part of the bank when business conditions would warrant. It was occupied until a few months ago by the Bubar Brothers jewelry store, and since their removal into their own building has been used as a storeroom. The bank has become so crowded and cramped that additional space is now necessary and workmen have been employed to make the changes necessary to open up the room into the bank's present quarters.

## Americans Live Too Hard and Fast

(Continued from page one.)

females. The most striking thing about these figures is the great improvement in our death rate during the early years of life and the lack of improvement after fifty years of age—in fact, after fifty the conditions in regard to certain diseases have become worse instead of better.

"The American lives too hard and too fast. It is poor economy to educate and train business men and women only to lose their services to the community and state just about middle life, when they should be at their best.

"This is the problem which confronts physicians and sanitarians at the present day and one which demands the closest consideration not only from professional persons but from the community at large."

## Improvements Are Almost Done

The improvements to the building occupied by the G. A. Lockwood Motor company and which has been remodeled and extended are almost completed and the company is rearranging its repair and service department and placing its equipment to better enable the employees to handle the work coming to that department. During the time repairs were being made the company has been greatly inconvenienced in handling the large volume of work, but is now in a position to accomplish results much more readily. When all of the machinery which has been obtained is installed the Lockwood company will have one of the most thoroughly equipped repair and service departments in Southern Oregon.

Mr. Lockwood is now engaged in preparing a new labor schedule which is expected to reduce the cost of making repairs.

The spare parts and accessory department will also be rearranged. When the improvements are completed they will almost double the floor space and will give the company more room in which to conduct the business. Mr. Lockwood is arranging to have a man in charge of each department in order to facilitate service.

# WHY

Why did the Moline Plow Company sell more plows in February, 1922, than in any other February since they began business?

Because the QUALITY is right, the SELLING METHOD IS RIGHT, and the PRICE is right.

Don't ask US about the quality. We might want to sell you one. Don't ask our competitors, they might want to sell you some other kind.

Ask the man who has used them. He knows.

When you buy a Moline implement you do not have to pay for credit, bad debts, dead stocks, or exorbitant profits. You buy from a company that is dealing as directly with the farmer as they can. This all goes to make the
