Careful Crossing Campaign Started

The American Railway Association will inaugurate on June 1st, 1922, and continue to September 30th, a "Careful Crossing Campaign," having for its slogan "Cross Crossings Cautiously," and its purpose is the prevention or reduction of the number of highway accidents involving railroad trains, vehicles and pedestrians throughout the United States.

This is something on the order of the non-accident campaign conducted a few years ago, and the Southern Pacific company employees are endeavoring to create and maintain a record, which other roads can work to, in this campaign as they did in the previous campaign. They hope that each and every employee will consider himself a committee of one to eliminate not only these crossing accidents but any other unsafe practices which come to their attention.

Firemen and engineers are making extra effort to be particular to give due warning with their whistles and bells at crossings. It is hoped a record toward the elimination of crossing accidents through the cooperation of the public and the employees will be established. It will go a long way toward the elimination of these unfortunate occurrences which often leave people permanently crippled if not killed outright. The public should cooperate with the employees in this laudible effort to help them make a satisfactory showing.

Local Cannery to Start Work Soon

Frank Norton of the local cannery announced today that the cannery association now being formed will be perfected next week. The stock sale is progressing nicely and the finances of the cannery are rapidly rounding into satisfactory shape. As soon as organization is completed work will be started in overhauling the machinery and preparing for work on cherries and loganberries. Mr. Norton expects that a big run will be made on cherries and on berries, and on apples and pears especially. Contracts have been offered far in excess of what the cannery can handle, the Umpqua valley fruit and berries being eagerly sought by eastern brokers who know that the quality of the fruit and the pack itself are the best to be found.
