Love's Masquerade

A Dramatic Story of Love and Romance
By Leah McGone Gibson

ON THE BRINK

As John Davis sat waiting for Doris Glendening—she was dressing to accompany him to the hospital where her husband was lying between life and death—the telephone rang. Being the only person near he took up the receiver.

"Is Mr. Davis there?"
"Yes," he answered eagerly. "This is Davis, Jim," for he recognized Clavering's voice. "Is Harry conscious yet?" he asked eagerly. "You called the turn, old man. Doris blames it all on herself and is preparing to go and see him. I am expecting her any minute."
"Don't let her come, Dave. She can do no good and the sight would only hurt her."

"What do you mean? Glendening was shot in the lungs, was he not? He isn't disfigured, is he?"
"No, but he has come out of the coma and is delirious. It is very hard to keep him in bed. He talks incessantly, continually calling for Margaret Earle."
"Right now, while I am talking to you, I hear his high-strained voice saying:

"Don't leave me, Margaret. I have never loved anyone but you. Dear, I could never be anything without you. Don't leave me—don't leave me."
"He repeats this over and over in the most imploring, heart-breaking voice you have ever heard, Dave. That's one reason Doris shouldn't come."

"If you are not careful, Jim," said Davis from his end of the wire, "some smart reporter will listen in on this and bring Margaret's name into the mess."

"That is what I am very much afraid of. One of the nurses asked me a little while ago if Margaret was Harry's wife. I had to tell her it was not."

"What did she say to that?" asked Davis, excitedly.
"Nothing. She, like every other woman, has become very much interested in Harry. Even when he is out of his head he makes a greater appeal to most women than a sane man would."

"But I called you up to tell you, Dave, that I have just had a phone from Milt. Like a fool I let out the fact that Harry was calling for Margaret to come to him. From what I could gather from my end of the wire, Milt went up in the air. He insisted that he was coming right

over to see Harry. He says there is no reason for him to be delirious if the doctors have diagnosed his case correctly. He thinks Harry must have hurt his head when he fell.

"I wonder if I told you that there is a slight bruise near the base of his brain," Milt says that the doctors must know that a prolonged delirium would not follow a wounded lung. I am waiting for Milt now."

"Please keep Doris away until Milton has been here and given his opinion on Harry's condition."
"All right, Jim, I'll do my best, but you never can tell what a woman will do in a case like this." Then he hung up.

"What woman and what case?" queried the room. "What has happened Doris Glendening as she enquired? Harry!" She exclaimed. "He's not worse, is he? Oh, John, do not tell me my husband is dead," and she grasped Davis' arm convulsively.

"No, Doris, Harry is still alive, but of course you have known from the first that his life hangs by a thread. I have just had a telephone message from the hospital telling me that no one, not even you, Doris, may see him right now."

"Dr. Milton, at Jim Clavering's request, is going to look Harry over. They are afraid of complications."

"Although Milton was badly burned at the fire last night he is getting up from his bed against the advice of nurses and doctors, and going over to see Harry. At least until after that visit you must possess your soul in patience."

"But, John, don't you think that it would help if he knew that I did not mean it when I told him that I would never live with him again? Perhaps if he knew I had forgiven him and was ready to begin over again it would make him want to live. You know, wanting to live has a great deal to do with one's living."

"That's just it, my dear Doris. Your presence would only excite him. First he would want to know if you came to forgive him, and then he would want to talk more than he should."

"Oh, John! I can't stay here. I wish I knew whether Margaret Earle was in town. She seemed to like Harry. If I knew where she was I would go to her. She would understand."

"Great Heavens! I must keep Doris out of that hospital room," thought Davis as he answered, "Mrs. Earle is in Europe."

"Tomorrow—Doris' Emotions.

as follows: 30s, 11 1/2c; 40s, 9 1/2c; 50s, 8 1/2c; 60s, 8c; 70s, 7 1/2c; 80s, 6 1/2c; 90c, 5 1/2c.

These prices are justified, it was stated, since a considerable tonnage has already been sold and the market for Oregon prunes continues to be strong.

YOUNG BOYS EXPERT JOCKEYS

Mongolian Youths at Home in the Saddle at an Astonishingly Tender Age.

If a daring traveler braves the dangers of a trip into Mongolia he is fascinated by the natives at the time of their summer festivals. Then every Mongolian family puts on its best bibs and trowsers and goes to the fair, much in the same way the people in our own country sections go to the county fair. However, at the Mongolian county fair one does not "hit the baby" and get a five-cent cigar, or throw rings at cans to obtain a prize, but one does see horse races.

Instead of sitting in a grand stand and watching the entire race, as you do here, you see only the start or finish. For the races in Mongolia are 30 miles long.

The Mongolians are great horsemen, and learn to ride at a very early age. Their lives are spent with and on horses. The women ride as well as the men, and by the time a boy has reached the age of ten he is an expert horseman. In fact, the jockeys are ten-year-old boys.

These little fellows are mounted on the very fast Mongolian ponies, without saddles. Their only trappings are a bridle, a whip and a handkerchief.

They start on their wild ride over the steppes with the courage and spirit of men, whipping their horses fiercely, but often reaching over kindly to wipe the dust from the eyes and nostrils of their ponies.

GREAT SOUTH AMERICAN HERO

Memory of Simon Bolivar Worthily Honored by the Nations He Served So Well.

Simon Bolivar lived during that period in the history of mankind when political revolution was the order of the day. He was born in Caracas, Venezuela, July 24, 1783. The American War of Independence had just then come to an end, and while visiting Paris Bolivar had an opportunity to witness the closing scenes of the French Revolution. By this time the Spanish colonies in South America were beginning to make their various struggles for political independence, and when Bolivar returned to his native land he soon found himself allied with the agitators who were struggling to free their country from the domination of Spain. He rapidly rose to a position of great prominence, both as a statesman and a soldier, and he was again and again appointed as dictator until such time as political independence would be assured. He achieved the political independence of three states: Colombia (in 1819), composed of Colombia, Venezuela and Ecuador (from which the last two withdrew in 1830); Peru (1824); and Bolivia, named after Bolivar (1825). When he died, December 17, 1830, he did not have any public money in his possession, although he had had complete control of the treasures of these republics.

Animal Folklore From India.

Chaucer and "Uncle Remus" obtained inspiration for their stories from the same source—India—according to a theory advanced by Prof. J. M. McBryde of Tulane university. Professor McBryde says the stories probably came from India, on the one hand to England by the way of the Crusaders, forming part of the great wave of animal folklore which spread over Europe, and on the other hand, through Buddhist missionaries into Africa, whence they were brought by the negroes to Southern plantation homes. Stories of the fox outwitting the wolf in the well episode as told by an English poet a century before Chaucer, and by "Uncle Remus" to "the little boys," both paralleling an ancient tale of India, and the "far baby" theme of one of the tales of Buddha's 550 transmutations, are among those cited by Professor McBryde to prove his point.

Good American Word.

Despite its Latin appearance, the word "caucus" never saw Rome in the person of a Latin ancestor. The term is a memorial of the Revolutionary war, and first saw the light in Boston. In a dispute with some British soldiers, the ropemakers and calkers hotly denounced the British government at a public meeting. Such meetings of protest, expressing open disloyalty to the Crown, came to be humorously characterized by the Tories as "calkers' meetings." From that term of contempt the transition of the word to its use in its present form as a part of our basic electoral machinery was short. It became firmly imbedded in the American language as distinct in several minor details from the language spoken in England.—Detroit News.

The Trial of a Lawyer.

A successful Chautauqua lecturer, a prominent attorney in his own city, has for years entertained large audiences with his lecture, "The Trial of Jesus From a Lawyer's Standpoint." Recently he listened to the following diverting introduction from the lips of a platform manager:
"I am very glad to introduce to you, ladies and gentlemen, Mr. B—, who will now entertain us with his celebrated lecture, 'The Trial of Jesus From a Lawyer's Standpoint.' I can only imagine one lecture which might prove more interesting to this audience than the one announced. That would be 'The Trial of a Lawyer From Jesus' Standpoint.'—Everybody's Magazine.

Customers Make a Business

Not dealers. We wish to thank the customers who have made our last three months' business bigger and better than ever. We are working for their interests, and their's alone. We hope to make our prices, quality and service so satisfactory that they will make our next three months' business bigger yet. Our prices are as low as possible—our goods are as good as possible, and you can tell about the service better than we can. See us for

A Child's First Teeth

should not be neglected. They form the supporting structure upon which the dental arch is built and should be kept in the mouth until they are forced out by the permanent teeth.

The science of dentistry has so improved during the last century that if a dentist was consulted soon enough in childhood a person's teeth could be protected and kept whole during the course of their life. If tooth structure is completely broken down it can be restored to its former efficiency.
