ROSEBURG NEWS REV IEW, AUGUST 18, 19. RAILWAY WAGE CONFERENCE.

President Harding said on May 23, 1921: "In our effort at

establishing industrial justice we must see that the wage earner is placed in an economically sound position. His lowest wage must be enough for comfort, enough to make his house a home, enough to insure that the struggle for existence shall not crowd out the things truly worth living for. There must be provision for education, for recreation, and a margin for saving." The United States department of labor has stated that \$1400 is the lowest su ma family of five may decently live upon, according to present purchasing power of a dollar. The second industrial conference summed up the situation thus: "If the fundamen tal that the basic wage of all employes should be adequate to maintain the employe and his family in reasonable comfort and with adequate opportunity for the education of his children. When the wages of any group fall below this standard for any length of time, the situation becomes dangerous to the wellbeing of the state." In the face of these statements the United States railway labor board has decreed that 23 cents per hour is a sufficient basic wage for one group of railway employes. The scale advances upward for other groups. The 23 cent rate is equivalent to less than \$600 per year on a basis of six days labor a week. All the machinery of the government has been brought to bear upon the strikers to compel them to accept this scale. The labor board has no power to compel any group of men to accept a certain wage. Congress never conferred compulsory authority in the matter, but that sort of propaganda has been broadcasted and many good people deceived into the belief that the strikers are defying the government. However, if Mr. Harding was correct in his analysis of the wage situation, no group of men should be asked to accept a wage that will not comfortably support each individual and his family, affording education for the children, comforts for the home, decent clothing and surroundings that will make for higher citizenry. The question that now comes is: Will 23 cents per hour do this thing? President Harding and other eminent gentlemen in the government service say it will not. The rail labor board, however, has sought to enforce its ruling, and big interests have thrown all their powerful influence to the side of the railway managers to enable them to compel the men to submit. If congress has power to establish a wage scale for one group of employes, it also follows that it has the authority to decree what the doctor shall charge for his professional service, what the lawyer may collect from his client, or what the grocer may demand for sugar and flour. Such a course would be socialism and not to be desired, yet the government must do this very thing if it attempts to say how many dollars per year a railway låborer shall receive. The News-Review stated some days ago that the men are entitled to a fair wage, and that no state can prosper where the producers are ground down to the verge of destitution by greedy corporations. This paper believes that President Harding and the rail labor board can settle this nationwide controversy in a few hours if they will but live up to what the executive himself has said was a "sound position," and what the industrial council has declared is "fundamental to public interest." Less than \$600 per annum will not do it. Leaving the question of who is to blame for the industrial strife out of the discussion, it is a foregone conclusion that the great American public desires that employes be well paid by corporations. Such a condition means business prosperity for all classes. The farmer of the products of the product question of who is to blame for the industrial strife out of the gets better pay for his products, the merchant has no trouble over delinquent bills owing by impoverished patrons, bank deposits grow, building is stimulated, homes are bought, railway freight is augmented, and every man has that extra dollar that the president has alleged it positively necessary for "recreation and a margin for saving."

Here is an item that appeared in this paper thirty-one years ago: "Judge Riddle has had the court house yard broken and set out to ornamental trees. He has made a varied selection, including the American horse chestnut, beach, soft and hard shell almonds, white and English elm, Russian mulberry, two varieties of birch, mountain ash, blue ash, sugar maple, red bud or Judas and yellow poplar. In a few years the square will present a handsome appearance." Now if we could get another start like the judge inaugurated in pioneer days wonder what the result would be thirty-one years in the future? We hope nothing like the present condition of our court house yard would result. It would be interesting, if Mr. Riddle could remember, of what disposition was made of his efforts to beautify the courthouse grounds. Presend day natives have a recollection of a number of tall poplar trees only-protected by an iron fence-and the pasture-like appearance of the grounds as they appear today.

"Pop" Gates, of Medford, says he is not going to pop over to the democratic ranks, regardless of all rumors to the contrary, and that he is going to support the regular republican nominee, He didn't say, however, that he was going to "vote 'er straight."

Looks like we are slowly getting back to normalcy when thirteen pounds of sugar are offered for a dollar. But it will take seven more pounds added to the thirteen to bring back memories of our boyhood days.

Charles Hall, late of recent recount fame, puts Governor Olcott in the category as an "alleged nominee." This is a parting allegation that may become a campaign slogan before election day closes.

Some of the "boys" you read about in the "Ye Olden Days" column of the News-Review are still mighty lively citizens in the community. It's a great climate where old age is so slow edging out youth.

It's better to be on your way, even if you don't know where its you're going, than to stand still and never go anywhere.

### In Ye Olden Days

(From the Roseburg Review, June 4, 1891.)

Twenty-three encines run in and out of Roseburg on Monday night and wooded-up and changed crows here. This will give some idea of the importance of the station when it is known that there are only 42 chapines on the entire cast side division of the Southern Pacific road. There are four stalls in the count have for the accommodation of all of these cogines. No wonder the company have made up their minds to do some building here this year.

Smith Balley and camily have re-urned from Bandon where they have been for several weeks.

Oakland News; Miss Katle Dear pupil with Mrs. E. H. Henderson, We expect soon to hear Miss Katle play well, as she is being instructed by one of the best teachers.

Teams get through occasionally from Coos county on the old road. A four-horse team came over one day last week bringing a few hundred pounds. If we can't have a railroad right away, why not have a respectable wagon road?

The W. R. C. will give an ice ream social and strawberry festival at Slocum's hall Saturday night for the benefit of the brass band.

The Redstocking baseball club was organized here Tuesday, and the fol-owing players were signed; L. Sanctuary, manager; R. C. Morris, cap-tain; E. McBroom, secretary; H. T. McClallen, Fred Tolles, G. J. Hill, B. W. Strong, R. H. Honston, A. P. Brandt, S. C. Flint, R. P. Dear, C. W. Parks, George Carp. The reporter is informed that the boys are ready to play all comers, and are spoiling for a match. The team is certainly a solid one, and will no doubt earn a reputation for Romburg on the national diamond.

County Clerk Taylor has purchased ane of those single buggles from Moore and Evans.

Mr. Sievens, of Edenbower, has already marketed 1,000 boxes of strawberries in Roseburg getting 25 cents a box for the first he brought in. Many other farmers have done almost equally as well. They are now retailed at 10 cents a box.

Four wagons leaded with immi grants and their effects passed thru here Monday morning. They have just arrived from Kansas, having

ECONOMY IN DELIVERY.

The Salem system of delivering cods to the customer from the stores goods to the customer from the stores and markets of Albany, is being advocated as in the interest of economy and better service. The plan is to charge each individual for the delivery of goods of any kind. It is said that merchants and those making their own sellivey of goods purchased are being intrinced on by those who follow the opposite plan. To illustrate, some families make several purchases during "Keep Smiling" is another one

YOUR HEALTH-IN IODINE There is nothing essentially start-ing in the exposure that resourceful bootleggers are coloring moonshine whiskey with lodine. Business presses and they are forced to devices that give immediate results. If cyanide were equal to lodine as a tinting fluid for fortyrod, doubtless they would employ it, price permitting. Customers of the mirthful moonshiner, wise gentifemen who always know a place where they can get it, should not quarterly be the formers. rel with the formula. Both it and they

e outlawed are outlawed.

A pretty fiction always arises, however, from the fumes of revelations such as this. It is the claim that, before a baneful and unrighteous law snatched the bottle away, all liquor was pure. That happens to be one of the pretentions of the trade that are not so. Adulterated whiskey was common enough before the lead went div mon enough before the land went dry. Whiskey that was whiskey by cour-tesy only, and actually the creation of a chemical formula, was by no means unknown. A peculiarity of liquor is that it lends itself readily to the ways. of deception. Thirsty men ask few questions of it. But the whiskey ques-

demands in point of service by the tions them shrewdly. It demands of them a reason why they should survive it.-Oregonian.

CULTIVATING LAWLESSNESS

America is the most lawless civilized country in the world. This characterization is not that of a foreign critice cager to disparage, but is the conclusion of the committee on law enforcement of the American Bar association. The members of this assembly speak as expert authority and dite the 9500 murders that occurred in the United States during 1921, or an average of more than 26 a day. It was the finding of the committee that during the last decade more than \$5,000 murders had been committed, and that burglaries had been in-creased by 1200 per cent.

Of these tendencies, which are so marked that they might as well be accepted as habit, Judge Kavanaugh said before the association, that "the prison which cajoles its immates by the excellence of the food and wealth of entertainment belittles the law and weakens the fear of it. Sing Sing has become a popular winter resort and our prison attitude consti-tutes an apology to the offender for holding him. He thinks he is half a hero and all martyr."— Oregonian.
