ROSEBURG, OREGON, SATURDAY, OCTOBER 7, 1922.

ANOTHER OPPOSITION DAILY ON THE ROCKS.

The Southwestern Oregon Daily News, published at Marshfield, is again on the verge of suspending publication, according to announcement made today. Earl W. Murphy, of Portland, who for the past year has been trying to put the paper on its feet, has given up the management with the statement that the plant has been running at a loss of $500 per month for the past year. The Daily News was started in opposition to the Coos Bay Times, an old established daily newspaper, and has had a mighty checkered career since the enterprise was launched. A year ago the paper suspended, with liabilities of some $16,000 and at that time went into the hands of a receiver. Later several prominent business men took hold of the plant with the result that it has been a losing proposition ever since and now faces suspension. Mr. Murphy, who has just resigned, made a faithful effort to establish the paper and issued a very newsy publication, but financing a daily newspapers is no boy's job in these days of high cost of labor and ever-mounting overhead expenses. The modern newspaper has passed from a playing to a legitimate business enterprise requiring more than ordinary tact and business ability to make self-sustaining, and the fellow who thinks differently can get all the experience he wants by taking a swing in the newspaper arena.

Within the past three years not less than five daily newspapers have been started in this state in opposition to already sound established plants and each one of them has drifted into shallow water and eventually landed on the rocks, with a loss of many thousand dollars to their promoters.

But, regardless of this fact and the proven experience of able newspaper men, there seems to be a surplus of wiseacres who are willing to attempt to finance a proposition though they well know the ultimate results. The only cure seems to be a little practical experience in the game. This usually cures them.

NEW ERA FOR THE BABY AND THE STORK.

The baby is coming into his own and the stork, whose duty from time immemorial has been to bring tiny bundles of happiness and cheer safely to earth, is glad.

While the stork always has been ready to do his part, however, others have been a bit lax in taking up where he leaves off, with the result that many—far too many—of his precious little bundles are lost. What brings cheer to the heart of the stork now is the fact that a great national gathering of men and women, trained in their work and representing every section of the country, is to meet in Washington this month to focus the attention of an all-too-busy world on the question of carrying on what he, the stork, has begun.

In Continental Memorial Hall, in Washington, made famous by a recent conference which sought to abolish weapons of warfare and death among men, the American Child Hygiene Association will hold its annual meeting this month as a step toward bringing about the abolition of a menace far more dangerous to mankind than warships or poison gas—the ignorance which allows thousands of little children and their mothers to die, when they might be saved.

The average American baby—delivered C. O. D. at the door—has just about ninety-three chances out of a hundred of growing into a fat, rosy-cheeked, lisping youngster a year old. His mother, who plays an important part in the stork performance, has ninety-nine and a fraction out of a hundred chances of living to care for him. That is one way to look at it. But every year there are approximately 2,500,000 babies born, and of this number, about 195,000 die before the yare a year old, while 20,000 mothers perish with them.

At the close of the teachers' institute yesterday which has been in session in this city for the last three days, strong resolutions were passed endorsing State Superintendent of Schools J. H. Churchill. The teachers were a unit in giving their support to Mr. Churchill, who, they state, has served the educational interests of the state in a very faithful manner and is responsible for the present high standing of Oregon schools. Mr. Churchill is a candidate for reelection in November.

After the usual baseball discussion in this sanctum this morning with J. W. Perkins leaning on the counter, in an effort to build up the strength of the New York Giants, the office force finally took up their daily routine but were immediately interrupted by the results of the first inning. Just one thing after another in this old world.

The News-Review invites its subscribers to discuss all issues before the people in the coming campaign through the columns of this paper under the head of "Letters From the People." Keep within reason in regard to length of your communications, which should not exceed 300 words.

The Portland 1925 fair has been postponed to 1927. By that time most people will have forgotten that a world's fair had ever been proposed.

Well, things ought to start sizzling a little in the political arena. About four weeks more and the big thing will be over.

The only thing the average citizen is sure of it that no matter who is in power, there will be taxes.

Lots of people who are "getting ahead in the world," are falling behind in the next.

XMAS HINTS.

Take a can of shellac and a brush and a few of last year's Xmas presents. Touch them up here and there, affix ribbons, etc., and you will save much in the purchase of your gifts this season.

The national guard fellers don't have to humiliate themselves on the main drag any more by explaining to their best dame just why they saluted their capt. There is no humiliation in saluting officers, we think, but its derned embarrasing to salute a Y. M. C. A. worker or a field clerk by mistake.

John Scott, the old man who staged a comeback yesterday and by his superior pitching shutout the New York Yanks, is the talk of the world today and its just human nature to want to see the under-dog get the best of it.

A New York girl has sued a popular song writer for $100,000 remuneration she asks for being the "inspiration" which impelled him to compose the song. If the song was one of those current at the dance halls this summer the "inspiration" lady must have the figure of a river barge and the facial pulchritude of a Chinese Gargoyle.

AN EARNEST SEEKER FOR TRUTHFUL STATISTICS

According to the Howell County (Mo.) Gazett, the following letter from an incipient distiller to a company offering electric washing machines for sale, might indicate that venders of washing machines are overlooking a fertile field.

"Puritan, Mo. Dear Sir: Your masheen she look good to me. How many galons will she hold and how much money will it cost to put pipe for cooling? Does she work on wheat or barley or corn? You work great bluff on wash macheen. I laf. You let me know what it take to fix me up."

In Ye Olden Days

(From Roseburg Review Jan. 24, 1899.)

The first news that the supreme court had affirmed the decision of the lower court in the Olberman murder case came to Roseburg yesterday afternoon in a special telegram to the Review from Salem. When the paper came out, Sheriff Stephens carried a copy to the prisoner, who read the article over carefully. He gave no outward sign of emotion over the outcome of his appeal. He asserted, however, that his conscience was clear, and that he did not feel like a murderer. Heretofore Olberman has steadily maintained that he would not ask for a commutation of the sentence of life imprisonment and even took little interest in the appeal proceedings. He considered his life wrecked and he cared not how soon the final act came.

IMMENSE POWER OF MUSIC

There is Almost No Limit to its Influence on the Human Soul.

Music! The dictionary defines it as "The science of harmonious sounds; melody or harmony." The tide of battle has been turned by the "science of harmonious sounds," and to hear some old familiar melody has often resulted in soothing the troubled heart.

Music can call the patriot to the defense of his country; can enthuse anew the worshiper at the shrine; can call the lover to his beloved; can fan into flame the dying embers of the fire in the enthusiast's breast. There is no limit to the power of music over the human soul.

The world needs music—music of the soul; music of the heart; music of the voice; music of the spirit. There are people who can't sing, yet they can be moved to tears or laughter by the words of some simple melody. Some people sing their way through life, and such people have a wonderful influence on the lives of others.

Music can have an almost magical effect in producing the desired results. In fact, the imagination fails to picture a world without music.

Mind Conquers Matter.

Have you heard the latest Coue story? A man with bandy legs called to see the great practitioner of healing by suggestion.

After an examination, the doctor said: "Yes, they can be cured. Massage them every night and before you go to sleep say, 'My legs are getting less and less bandy' a hundred and fifty times."

Full of hope, the man went home. That night he carried out the massage treatment, but he could not remember just how many times he had to repeat the magic words. He knew it was something and fifty, so, to make sure, he recited the phrase three hundred and fifty times.

Next morning he found that he was knock-kneed!

NUT HAS HIGH FOOD VALUE

Seed of Pinon Is Not as Fully Appreciated in This Country as Its Qualities Deserve.

Few easterners are familiar with the Indian nut, a tiny but wonderfully flavored and nourishing pine tree seed. This nut, which finds high favor on New York's lower east side, is much misunderstood. It is called an Indian nut and mountain nut, but most people believe it comes from China.

It is found only in North and South America and is the seed of the pinon pine. It is about the size of a navy bean, is autumnal brown in color, with dapples and striations of a deeper brown, making it beautiful to look at. It is highly charged with oil and is most delicious. It is the principal food of mountain squirrels or chipmunks.

The wood of the tree which produces this seed is the best firewood in the world. It burns slowly, produces beautiful colors of flame and great heat. It abounds most profusely in the temperate zone Rockies. The Colorado Rockies produce it in great quantities.

Another peculiar fact relative to the pinon nut is that it finds no favor in its native country excepting among the squirrels. There is little sale for pinon nuts in the West, but the western mountaineers make much pin money gathering the nuts for the markets of the big eastern cities.

Fur Animals Increase in Kentucky.

Fur-bearing animals are on the increase in Kentucky as a result of the protection afforded by the state game law. The raccoon, opossum, mink, weasel, otter and muskrat are reported in larger numbers by trappers who in the open season collect the skins in paying quantities. Until adequate protection was afforded by the drastic game law some of the species had almost disappeared from Kentucky, but under the new order the stock seems to have been appreciably replenished all over the state. The beaver still is found in some sections of the state and only recently a large colony was discovered in a western county, where the animals had dammed a creek.

SHEIKH UL ISLAM

Here is the real head of the Mohammedan church. His full title is Sheikh Ul Islam Haidary Zade Ibrahim Effendi, and in this photograph he is shown wearing priestly robes, richly embroidered. This leader of the followers of Allah is absolute ruler, spiritually, and in the mosque his word is law.
