

tion Filed In Brumfield Case

(Continued from page one.)

1921, I received a warrant signed by the judge of the court of the State of Oregon, the county of Douglas, wherein the said Richard M. Brumfield was duly convicted of the crime of murder in the first degree, on the 31st day of October, 1921, sentenced by the said court to be confined in the penitentiary of the State of Oregon, and on the 13th day of January, 1922, that he be hanged by the neck until he be dead, as ordered by law; that on the 21st of December, 1921, said execution was ordered stayed pending the decision of an appeal in the case; that said Richard M. Brumfield was received at the Oregon State Penitentiary October 31st, and there kept confined awaiting execution until the 13th day of January, 1922, when the said Richard M. Brumfield committed suicide by hanging himself to a pipe in his cell by a cord from the mattress, that the coroner was immediately notified and investigation made, and that the body was turned over to Rigdon and Sons, makers of Salem, Oregon, and later claimed by the wife of Richard M. Brumfield; that I personally saw the said Richard M. Brumfield while he was hanging in the cell and later saw him at the undertaking parlor, that I am certain that he was the same Richard M. Brumfield who was received at the Oregon State Penitentiary on the 31st day of October, 1921, and that he was dead.

(Signed) J. W. Lewis,
Warden Oregon State Penitentiary.

The affidavit was subscribed and sworn before J. S. Murray, a notary public.

In addition to this the District Attorney submits a certified copy of death certificate, which is interesting in the fact that the person and statistical particulars were furnished by Howard Mozena, the companion of Mrs. Brumfield in her recent appearance in this city and who has accompanied her on her trip into California.

The certificate is signed by the Dr. Lloyd T. Rigdon who certifies that he made an inquiry into the case determining that death was by suicide and that the body of Richard M. Brumfield, a copy of the motion was served on the attorneys in this city and the original mailed to the clerk of the State Supreme Court.

DEATH NOTICE RECEIVED

Mrs. Lena Bicket, a native of Unplaville, died quite suddenly at her home, yesterday, following a two-day illness. Deceased was a daughter of Mrs. Oscar Lindsey of this city. News of her death reached here late last night, and was a distinct shock to them all.

County Judge Quine spent the day yesterday in the interest of his campaign for re-election.

TODAY'S MARKET REPORT

PRICES PAID FARMERS FOR PRODUCE

Butter, 35 cents a pound.
Eggs, 45 to 50 cents per dozen.
Poultry, 17 cents a pound.
Hens, light, 12 cents a pound.
Poultry, under 3 lbs., 20 cents a pound.

Chickens, 15 cents a pound.
Roosters, 10 cents a pound.
Wheat, \$1.10 at mill, sacks red.

Barley, \$2.50 a ton.
Oats, \$1.50 a ton.
Corn, dressed, 12 to 13 cents a pound.
Soybeans, dressed, 12 cents, 120 to 160 lbs. weight.

Beans, prime, 4 1/2 cents.
Peas, prime, 5 1/2 cents.
Tomatoes, 20 to 40 cents.
Potatoes, 80 cents per dozen.
Apples, local production, 20 cents a bushel.

Cascara bark, 1922, 6 1/2 cents a bushel.
Cascara bark, 1921, 7 1/2 cents a bushel.

RETAIL PRICES ON MILL PRODUCTS.

Wheat, \$1.20 to \$1.35 a sack of 80 lbs.
Rolled corn, \$2 a 100 lbs.
Rolled barley, \$1.55 a sack of 75 lbs.

Very seed oats, per bushel, 76c to 78c.
Seed oats, per 100, \$1.50.
Flour, soft wheat, \$1.65 a sack.
Flour, hard wheat, \$2.15 a sack.

Flour, soft wheat, \$1.65 a sack.
Flour, hard wheat, \$2.15 a sack.

Flour, soft wheat, \$1.65 a sack.
Flour, hard wheat, \$2.15 a sack.

Flour, soft wheat, \$1.65 a sack.

Prof. J. E. Weaver, principal of Sutherland Academy spent the forenoon in town, looking after business matters in connection with the institution. He reports an excellent attendance.

Harvest Festival.

(Oregon Grange Bulletin.)
What could be better than a harvest festival, or home coming day, for the social meeting of the Grange, sometime in October? At this season of the year most Granges need something to create new interest, as during the summer most of us are very busy, and have little time to give to things outside our own homes, and so we are asking that each Grange make a special effort along this line.

It is a good plan to send out invitations to all members, past and present, also prospective members, and any new people in your community you think might be interested. Hold an all-day session with dinner at noon, or have an evening meeting, with 6:30 dinner, whichever is most suitable and convenient for your Grange. There are many ways of entertaining the guests on this occasion—one might have a little Grange fair, exhibiting the best fruits, flowers and vegetables and giving small prizes for the best exhibits. Have a good program of music, readings, papers and addresses.

or spend the social hour in games. Have a roll call of all members, and present the charter members with flowers. Have something special for the children—they are the future Grangers. If you hold an evening session you might have a carnival with side-shows. Nothing will cause more fun for children, as well as the older ones. Plan several small booths around the hall, with curtains for the front. In one show you might have the snake charmer, someone with snakes made from old rubber hose with paper heads, and in another a boy with rings in his ears and nose, and face blackened, eating a chicken. (You can make the black-face from a black stocking, making openings for the eyes and mouth, and fasten the rings to the stocking.) This will be the flesh-eating cannibal.

One might have any number of shows, such as Dirty Dora—the bearded lady, skirt dancer, show for men only, such as a pair of suspenders or a shirt, Mr. and Mrs. Tom Thumb, or anything you might think of. There really is no end of the fun. One might have a wild animal show, making heads from cardboard and covering with burlap. We held a one-ring circus with side-shows and clowns in our Grange sometime ago and charred admission, and I think it was the most successful of anything our Grange ever did, both financially and socially, and will long be remembered by all who attended.

In holding evening meetings it is

sometimes a problem what to serve for refreshments. If you do not care to serve the 6:30 dinner, but want something hot and appetizing, try serving chicken with noodles, or chili beans, chicken Spanish, or oyster stew. Serve any one of these with bread and butter, sandwiches, and coffee, and you will have a meal good enough for anyone, and there is very little work in preparing it and few dishes to wash.

If you have not held any homecoming day in your Grange this fall, please plan to do so very soon, for by so doing you may awake new interest in the old members and get new ones at the same time.

TRUTH MUST BE KNOWN

About the Food Which Both Adults and Children Eat.

(Oregon Grange Bulletin.)
"The time has come, the Aggies said.

To talk of many things,
Of what to eat, of calories,
Of calbages and kings;
Of vitamins and sausages,
And whether costs have wings."

In the good old days before germs and microbes stalked the earth, and started periodically on their pestilential careers, and when foods grew elementally, and a potato was a potato and an apple an apple full of juicy flavor, and butter was simply the fat extracted from milk—all according to our best knowledge, instead of being a storehouse

of vitamins or other equally "abstruse" organisms, and we know not what to come—many of us lived to eat, and ended our days before our time by not taking thought.

I know of no phase of Home Economics that approaches in importance the phase, "What shall we eat?" It has been well said, "Tell us what a man eats and I will tell you what he is." We have learned to a great extent about calories, and how much we must eat of proteins, carbohydrates and fats to balance our diets correctly, but one important factor whose home and habitat is wholly on the farm, is a stranger to far too many, both in city and country. We have all read of it, perhaps some of us have smiled, but none of us give sufficient attention to the elusive vitamin.

When we look into the subject matter, and realize that the vitamin comes next to sun and air in influencing our lives, we shall then give it some of the attention it deserves.

Vitamins, as the word signifies, are the little life-giving principles in our food. Eating vitaminous food makes us stronger, physically, mentally and morally. Eating food low in vitamins leaves us "run down" as we express it in the spring, when our diet has been composed of meat, white bread, cakes and sweets, all low in vitamins. We can truly say that the lack of knowledge of the vitamin was one of the factors that helped us win the late war. Let me briefly explain:

The following account is taken from one of our scientific medical

journals, I am only giving a bare outline—The German raider, "Kronprinz Wilhelm," for 255 days roamed the Atlantic, sinking large numbers of merchant-ships of every kind and size, while, by virtue of her great speed, she frustrated all efforts to capture or sink her. But here ignorance was our ally, and the lack of knowledge of the life-giving vitamin sent her on Sunday night, April 11, 1915, into our Harbor of Newport News, with 110 of her crew completely prostrated, some dying and nearly all of the remaining 390 suffering in various ways. When the raider came into Newport News she was visited by our health officers, medical men and scientists, but to Alfred W. McCann, a food expert, is due the credit of solving the mystery.

Although the raider had captured countless bushels of whole wheat, the kernel containing many life-giving vitamins, also capturing many other foods containing this same vitamin, they were all sent to the bottom, and canned meats, other canned goods, tinned breads, crackers, cookies, etc., were eaten. Some of these foods, as crackers, canned goods and foods made of white flour, sugar and animal fats, contain almost no vitamins. This great raider, with its crew dying for the want of vitamins, surrendered to our authorities at Newport News, and Mr. McCann, recognizing the power of the vitamin, began feeding the victims with food rich in vitamins, and soon they were on the road to health.

It is well for us to know the prin-

cipal foods having vitamins: First, on the list is yeast, but we can get the results in a much pleasanter way by eating the following, which I shall try to give in order of vitamin value: Oranges, milk, butter, tomatoes, fresh vegetables, particularly carrots, lettuce and greens are rich in vitamins, potatoes (better baked), nearly all fruit juices, eggs, the outer coats of grains, cod liver oil and fresh meat to some extent.

I would like to tell of the effect of withholding vitaminous food from rabbits and Guinea pigs and when completely prostrated, bringing them to perfect health by feeding on food rich in vitamin, but I am limited for space so will urge you to bear the foregoing truths in mind.

Truth needs continual reiteration. It is human to forget. Some important fact is presented to our minds; we are impressed by it, and we resolve to bear it in mind for future use. Then other matters crowd upon our attention, the vividness of the first impression fades, and soon the truth that at first seemed so weighty and important becomes buried under a mass of mental lumber and is not acted upon.

But when we accept, as we must, the knowledge of those who have studied and experimented for years, and who have found that growth and life itself are dependent upon the numbers and kinds of vitamins in our food, it only remains for us to reach out and take these life-giving substances.—National Grange Monthly. KATH B. ELLIS, Fairfield, Maine.
