UNOFFICIAL RETURNS FAIL CHANGE HOUSE CONTROL

WASHINGTON, Nov. 10.—On the basis of practically complete but unofficial returns from Tuesday's election the exact lineup by party in the sixty-eighth congress will be:

House—Republicans 225; democrats 207; socialist 1; independent farmer-labor 1.

Senate—Republicans 53; democrats 42; farmer-labor 1.

The republican total in the senate is predicted upon a victory that party in the senatorial contest in North Dakota. Should first returns show the election of J. T. O'Connor, the democratic candidate, the republicans would have 54 and the democrats 43. In the event the republicans have members and the democrats 36, republican majority of 24.

In the house of republicans, on the basis of the unofficial returns will have a majority of 15 over combined strength which could be mustered against them by the democrats and others, and a plurality of 18 over the democrats as party unit. In the present house republicans have a majority of 10 over all, and plurality of 166 over the democrats.

PROHIBITION TO BE CHIEF FACTOR IN 1924 ELECTION

WASHINGTON, Nov. 10.—Politicians of all shades of opinion in Washington, peering into the future trying to discern the probable issues of 1924, were just about agreed today that prohibition is in a fair way to become the chief argument two years hence.

Despite the remarkable victories chalked up by the wets in Tuesday's election, it seemed improbable today that anything can be done in the next congress toward modification of the Volstead law. The wet victories were notable and their numbers increased greatly in congress, but even the "liberals" themselves admitted today they will fall somewhat short of actual majority.

What the far-sighted liberals see as a result of Tuesday's gains is a renewal of the agitation throughout the next two years, keeping the issue constantly before the public, so that in 1924 the time will be ripe to strike for actual control of both branches of congress.

It is not inconceivable, according to some liberals, that two years hence the modification element will be so strong as to compel both major parties to adopt a moist plank in their platform. At any rate such a plank will be an issue before both national conventions in 1924. That much seems already assured.

The association opposed to the prohibition amendment claimed today that revised figures on Tuesday's election give the liberals actual control of the next house of representatives by a narrow margin of a few votes.

Wayne B. Wheeler, generalissimo of the dry forces, conceded that there will be in the next congress 140 men opposed to prohibition, but he disputed the control claimed by the wets. To offset the wet claims of controlling the house he pointed to the fact that the senate has remained overwhelmingly dry.

The '23 class put their new pennant on the wall of the high school room Tuesday morning and the rest of the school honored them with a yell. They are justly proud of it for it is very pretty. It is purple with a white field.

The P. T. A. meets at the school house Friday, Nov. 10, to elect their new officers for the year. After the business meeting slides from the university will be shown.

RETARDING ADVANCEMENT—Many rural communities are having their advancement retarded by the attitude of their officials toward transient motorists. Abandon the idea that they are outsiders and therefore trespassers or criminals to be held up and persecuted on the slightest provocation. It is a detriment to the local business men. Harrassing the automobilist drives potential investments away. Every community owes its growth to the outsider who visits it. Close your town to visitors and you die of dry rot. —Topics of the Day.
