Living Comfort in Winter

The Buick "Model 45" Six Cylinder—

As complete as has been the development of the enclosed car, Buick designers have not neglected to improve the open type car, adding to its measure of comfort, convenience and weather protection surpassed only by the more expensive closed vehicle.

Protection against wind and snow is assured by the snug-fitting top curtains that open with the doors. The Buick design of convertible top that of any closed car, while windshield wiper and other fine windshield, adjustable from within, make driving safe and comfortable.

Added to this, and equally important in winter driving, is the Buick's performance that a Buick car always produces—its steady, responsive power—its roadability and perfect balance and unquestioned dependability.

Under all weather driving there is no superior to the Buick open cars.

APPOINTMENT IS GIVEN M. S. HAMM.

M. S. Hamm, city superintendent of the Roseburg schools, was appointed chairman of the committee on psychology and education at the Oregon State Teachers' Association meeting, held in Portland. Mr. Hamm has been very active in this work during the past year and was the author of a system of rating cards which have been very effective in increasing the efficiency of the teachers of the Roseburg schools and which are rapidly being adopted in other schools of the state. Mr. Hamm will be a very active worker on this committee and doubtless will have some interesting features to present at the next meeting of the organization. Dr. C. A. Gregory of the University of Oregon is secretary of the committee.
