

WILL McADOO BE PRESIDENTIAL CANDIDATE?

William Gibbs McAdoo is coming into the limelight more strongly than ever as a probable candidate for the presidency on the Democratic ticket. The son-in-law of Woodrow Wilson, the former secretary of the treasury and railway administrator, is now living in California, but he recently visited Washington at the same time as William Jennings Bryan for a series of conferences with Democratic leaders. He is shown here with United States Senators Carter Glass, David Walsh and Pat Harrison.

to classifying lambs. If the breeder do not believe this, just ship a car or two of thin, scrawny, long-tailed lambs to the market. There will be no difficulty in getting them properly classified. That kind of knowledge will be entirely too costly, don't do it. The only wise thing to do is to produce a lamb good breeders would not be ashamed of in any market.

Now to examine into the things that go to make up one of these lambs that everybody wants. The start of every lamb is the buck and ewe. What kind of buck and ewe is best for the foundation of the lamb? This can be answered by saying the best the breeder can afford. The other particulars are up to the individual breeders. They should have decided this matter six months ago, and the arrival of the lamb will indicate without fail the wisdom and care of the mother. If the breeder has not given the mother all the care possible, he should repent and give her the best he can afford while she is suckling her lamb. Remember that 75 per cent of that 70-pound lamb is made while suckling its mother.

The writer assumes that the breeder is raising lambs for every penny there is in this industry. Here let us show the breeders where they can collect about one hundred pennies for five minutes' work. If the lambs hold out he will be able to collect just one hundred and twenty dollars in ten hours. This is the solution: Dock and alter all buck lambs. The packer will dock the shipments at least one dollar for all long-tailed buck lambs a breeder tries to sell him. Avoid this character of docking if possible as this dollar saved would pay the taxes on about fifteen head of ewes.

Coulter county produces about 50,000 lambs each year; 50 per cent of this would be \$25,000 at a dollar per head dock. This sum will start a first national bank in almost any state. The breeder may not be allowed to manage the bank, but he contributes quite liberally to the fund.

Many people suffer attacks by this arch-villain "nerve inflammation." The first warning is usually a sharp stabbing pain, which may "come and go" or hurt constantly. You may feel it in the shoulder, neck, forearm, small of the back or down the thigh and leg to the heel. It is sometimes mistaken for sciatica, rheumatism or neuralgia, which often end in neuritis.

No matter where you have nerve pains or what caused them, you get quick relief without using narcotics or poison. Apply Tysol over the part that hurts, and the pain will be gone. Tysol is absorbed through the pores of the skin. It has a soothing, healing effect upon the diseased nerves, gradually helping to restore them to healthy condition.

For more information, write to W. F. Chapman, druggist, Tysol Company, Mfg. Chemists, 409 Sutter St., San Francisco.

High winds and snows resulted in a break in the California-Oregon power line between Prospect and Springfield, it was reported. As the power line is still new breaks are to be expected until all flaws in the wire have been discovered and the right of way is cleared for a sufficient distance back from the line to prevent falling limbs from causing breakage. A constant patrol is maintained on the line and the interruptions are of only short duration.

Break up a cold in six hours; nothing gives quicker relief in coughs and colds than Hyomel. Goes right to the spot and kills the germs. Money back if it fails. W. F. Chapman.

C. C. Griffin, Missionary of the S. S. Union, has just closed a week of meetings in the Gilliam schoolhouse in Glendale. There was a great deal of interest manifested and one profession of faith was received. Mr. Griffin won the love and respect of all by his earnest presentation of the Gospel. We will be glad to have him come again. C. C. P.

During Dr. Price's meeting there will be regular drill every Monday night but will be in the form of lectures and instruction, which will be held in the Boy Scouts' room in the basement. All National Guardsmen are to be at all drills.

I have bought the White Front Restaurant on Sheridan st. Anyone holding bills against the restaurant are requested to call and they will be settled. LEE SING

Washington, D. C.—"Lydia E. Pinkham's Vegetable Compound saved me from an operation which a physician said I would have to have for a very bad case of female trouble. My system was all run down for two years after my little girl was born. Then I read of your wonderful medicine and decided to try it. I could hardly drag one foot after the other, and after taking six bottles of the Vegetable Compound I felt like a new woman. I now do all my housework, also washing and ironing, and do not know what real trouble is. My health is fine, and I weigh 140 pounds. When I started taking it I weighed 97 pounds. I gladly recommend Lydia E. Pinkham's Vegetable Compound to any one who is suffering from female trouble or is run down. You may use this testimonial for I am only too glad to let suffering women know what the Vegetable Compound did for me."—Mrs. IDA HEWITT, 1529 Penna. Ave. S.E., Washington, D.C.

Such letters from women in every section of this country prove beyond question the merit of Lydia E. Pinkham's Vegetable Compound.

Word has been received here by Robert Blankenship to the effect that his sister-in-law, Mrs. A. L. Blankenship died at Ridgefield, Wash., Feb. 10, 1923. Her former home, for Bremerton, her former home, for burial. She is survived by her husband and two small children. Mrs. Blankenship spent the holidays at the Robert Blankenship home and was in poor health at the time but her sudden death came as a shock to her many friends.

Mrs. E. L. Rice is reported to be quite ill at her home on Rose Creek.

COUNTRY BILLIONS

Boll Weevil Alone Has Cost Cotton Growers of the South Enough to Have Paid off the Entire National Debt.

WASHINGTON, Feb. 13.—Dope peddlers, bootleggers and diamond smugglers have odd schemes to fool Uncle Sam's sharp eyed men. But their evil ways do not cost the taxpayer nearly so much as the plant pests that slip into the country. The figures show that the tax-payer is paying tribute to plant pests at the rate of about two billion dollars a year, the American Nature Association says, therefore it will be seen just how important the Plant Police-man's job is.

Just as the metropolitan police departments tabulate all the "dope" on a law breaker, there is a "rogue's gallery" of the plant world. The Atlantic States know what the chestnut blight and the white pine blister rust have done. The country knows the South's experience with the boll weevil. One of the original enemies to be brought to this land from Europe was the Hessian fly which came in straw the soldiers used to bed their horses. That fly still costs the country the price of the Revolutionary War every year because of what it does to wheat.

Introduced from Mexico, the boll weevil has cost the cotton growers of the South enough to pay off the national debt. One hundred million acre corn crop is annually exposed to a dozen destructive diseases, most of which wormed their way into America from foreign fields. The last to appear is the European corn borer. Thus far science has made no headway in exterminating this pest. The best it can do is to strive to limit the area attacked.

The bootlegger's most approved system of marketing his wares cannot possibly "cover the territory" as the gypsy moth has done. A professor at Harvard University some time years ago was experimenting with all kinds of silk worms and cultures of gypsy moths, trying to develop a variety of silk worms which would resist this noxious disease. A gust of wind blew several cultures through his laboratory window. Shortly thereafter, the gypsy moth became a destructive pest in Massachusetts and now extends its depredations over more than 20,000 square miles of American area. The American Nature Association says this pest accomplishes almost as much economic damage as the annual fires which constitute one of the most serious menaces with which we have to contend.

The dope peddler does nothing more clever than the brown-tail moth, which came from Holland or France in shipments of roses. The Japanese beetle came to our shores on import. San Jose scale has rendered fruit production prohibitive in some parts of the United States and costs more than \$10,000,000 a year.

All fruit, seed or plant products that are found to be diseased are either destroyed or else rendered practically sterile by thorough fumigation. Along the Mexican border Uncle Sam maintains great fumigators large enough for several freight cars to run inside at a time. In this way all the cotton and cotton seed that comes in from Mexico is rendered harmless so far as the distribution of objectionable cotton diseases is concerned.

"The rogue's gallery" list of pests now includes more than 75 economically important crop destroyers, the American Nature Association asserts. They include such crop criminals as the codling moth, asparagus beetle, alfalfa moth, hop plant louse, horn fly, common cabbage worm, sugar cane borer, pear midge, wheat louse, oyster shell bark louse, pea weevil, cotton bug, 23 injurious scale insects and many others. Thirty-seven of these pests have been imported from Europe. At such important ports of entry as New York, Boston, Seattle and San Francisco, plant pest policemen now examine all seed and plant material as well as other agricultural products which might be infested with foreign disease germs.

"BULLDOG" DRAWS CROWDS AT SHOW

Local Physician Owns Same Type of Studebaker That Won Praise at the Portland Auto Show Last Week.

From the standpoint of beauty the Studebaker "Bulldog" display in the southeast corner of the lower floor of the auditorium was pronounced by many as the prize winner at the automobile show, which closed Saturday, and many went so far as to pronounce the exhibit the most beautiful ever shown in Portland, says the Oregonian.

The Studebaker "bulldog" this year consisted of a "big six" sport touring model with special upholstery and equipment, in a handsome setting of oriental rugs and furnishings. The Studebaker car, which was the center of the exhibit, attracted unusual attention, and its handsome appearance was commented upon by many. The car was a standard sport touring car of the "big six" series, but was considerably fixed up for the occasion by F. M. Leeston-Smith, sales manager for the John K. Leander company, Studebaker distributors. A handsome set of seat covers in heavy tan leather and corduroy was provided. The top was of khaki, trimmed in the same kind of tan leather as the seat covers, while many of the interior parts were decorated with the same leather. Much of the equipment was nicked and a large quantity of additional equipment in the way of accessories was added. The color of the car was an unusually deep shade of maroon, with black trimmings.

Dr. Wade, of this city, boasts of the ownership of one of these matchless "Bulldog" Studebaker cars, which the local distributors, W. A. Burr and Sons, sold him last week. It is the only car of that model in Southern Oregon, and has attracted a lot of attention in Roseburg for its completeness. That this car was considered by the thousands who visited the auto show last week the finest on display, is evidence that the Studebaker people will keep up their reputation for sterling worth and beauty, and that this is really a "Studebaker Year."

SISTER-IN-LAW OF LOCAL MAN DIES IN WASHINGTON

PLAY SELECTED BY SENIOR CLASS

"A Punch for Judy" is Title of the Comedy Selected by Students for Presentation During the Month of March.

"A Punch for Judy," is the title of the play selected last week by the senior class of the local high school for presentation sometime in March. The date has not been definitely set as yet.

"A Punch for Judy," is a bubbling, sparkling, scintillating three-act comedy, with all the whir of humor that can possibly be imagined. It was written by Philip Barry, one of the leading and most popular theater men of New York. Mr. Barry, known to all who keep up with modern plays as a writer of real comedies, wrote this particular play while a student at Harvard. He was one of the most brilliant students in the famous "47 Workshop," the Harvard play-writing class conducted by Professor Baker, noted instructor at that University. Although the play was not published in printed form it gained popularity immediately after it left the author's pen. This came about through the fact that the Alumni of Radcliffe and Harvard selected "A Punch for Judy" as the play to be given, in the boosting of their endowment campaign. These alumni chose this play

How Do You Pay Your Hired Man?

Do you let him take whatever he thinks you will stand for out of the cream check or prune money? Or do you know beforehand what you will have to pay him? When you buy from a regular dealer you are hiring him to buy stuff and keep it handy for you and letting him fix his own wages. You don't even know what wages he charges you, but you can guess it will be all he can get. When you deal with your own business you know what wages you are paying, and if they seem too high, you have a chance to find out why. Don't guess—trade with us and know how much you pay your hired man.

"See Us First—We Can Save You Money" Farm Bureau Cooperative Exchange Roseburg and Oakland

Daughters of Isabella, will entertain with cards, luncheon and dancing at their Pre-Lenten party at Macraeb's Hall, Tuesday evening. An invitation is extended to those who wish to enjoy a pleasant evening; cards promptly at 8, dancing at 10. Good music. Admission 35 cents.

from among a great horde of manuscripts submitted, and it made a huge hit. It showed to a packed house in Boston, and caused comment for weeks followed by dramatic critics.

The Senior class considers itself extremely lucky in getting "A Punch for Judy" in spite of the fact that a heavy royalty is being paid for it. These class members who have read it assert that the play is fully worth the money.

Miss Rosa B. Parrott, class advisor, who will coach the production, is highly enthusiastic and says that, "It is the best play for amateurs that has been published." Miss Parrott is of the opinion that there is fully enough histrionic talent in the present senior class to make "A Punch for Judy" the most successful high school play, or any other home talent play, ever presented in Roseburg.

The various parts of the actors are being typewritten now and put in manuscript form, and tryouts for the cast will be held during the latter part of this week. As soon as the cast can be selected actual work will immediately begin and no effort will be spared between now and March when the play will be given.

The signally successful play which was given by the Juniors of the high school is assurance to the Seniors that Roseburg is still behind her high school in boosting her dramatic activities, and if the Seniors of this year receive the support which has been accorded previous graduating classes in this vicinity there can be no doubt of a marvelous success.

Over 2000 Chevrolet motor cars are produced and sold every day. Glenn H. Taylor, local dealer.

WILBUR NEWS ITEMS

A very exciting basketball game was played last Friday evening at Wilbur between the Roseburg high school second team and the Wilbur high school team. The Roseburg team was victorious, the score being 32 to 9.

Even at that we are proud of our men, though they played a losing game. A charming little birthday party was given by Mrs. Clifford McKay in honor of her daughter, Lois, on the afternoon of Saturday, Feb. 10, 1923. Many games were played and clothes pin dolls dressed. Delicious lunch was served after which the guests reluctantly departed. Those invited were: Alpha, Belle and Maxine Grube, Lois Irving, Fay Turner, the Hill twins, Lois Wright, Mildred Grue, Eleanor Statton, Leota Miller, Elizabeth Hart, Lucille Hart, Esther Thompson and Juanita Pinkston.
