9 DEATHS IN GRADE MISHAPS

SALT LAKE CITY, Utah, March 14.—Grade crossing accidents in Utah in 1922 numbered 157 and resulted in nine deaths and serious injury to forty-eight persons, according to reports compiled by the state

government. During 1921 there were only 72 grade crossing mishaps, but fourteen people met death and sixty-seven were seriously hurt.

Miss Lucille Bentz, vocal teacher at Moore Music Studio, Home Phone 546-R, or Moore Studio, 502.

Half cash balance one and two years or liberal discount for all cash. I. S. Smith, Box 526, Marshfield, Oregon.

ATTEMPT CHANGE IN CHINESE ALPHABET

Mergenthaler Company to Try Introduction of Phonetic System in Place of Present Chinese Alphabet.

SAN FRANCISCO, Calif., March 14.—The complete reorganization of the language of 400,000 persons, approximately one-third of the world's population, by the substitution of a new phonetic alphabet of forty symbols to replace the 40,000 chaotic ideographs now used, and the wiping out of precedents more than 5,000 years old, is the gigantic task being undertaken by an American firm in order to open up a new and limitless field for its business.

The country is China and the American firm is the Mergenthaler Linotype company, which found it impossible to adopt the 40,000 Chinese ideographs to the linotype machine.

No over-night conversion of China is anticipated by the American organization, according to F. C. Van Schalk, managing agent of the San Francisco office of the Mergenthaler company who has just returned from an extensive trip through China in connection with the new phonetic alphabet.

"The young Chinese are being taught the new phonetic alphabet in the schools under government control and in the mission institutions," said Mr. Van Schalk. "The name of the new phonetic system is Chu Yin Tzu-mu, and it is through the teaching of this system to the younger generation we hope to arrive at our goal. The new alphabet today is the recognized medium of intercourse in the Mandarin-speaking provinces.

"The idea is not original with the Mergenthaler company. Individual altruists have blazed the trail for the last three or four decades. When China became a republic in 1912, a body was convened in Peking, upon government initiative, to consider the subject of a phonetic alphabet of the Chinese language to the end that a common pronunciation might further education. While written or printed Chinese means the same anywhere to any Chinaman who can read, Chinese is spoken in one province may be unintelligible in another.

"We have been largely instrumental in keeping this work alive, and Miss R. Hoare, in our Brooklyn N. Y. headquarters, has worked exclusively on the simplification of the Chinese language for the last five years.

"Dr. Sun Yat-sen, deposed president of South China, who has just returned to Canton to again assume charge of the southern republic's affairs, is one of the strongest advocates of the new phonetic alphabet. Dr. Sun originally planned to bring the five provinces of South China together for the universal adoption of Chu Yin Tzu-mu, and when he has regained full control in South China he says he will carry out this plan as one of his first measures.

"In the meantime we must educate the young Chinese and teach him the new alphabet. Then, in a comparatively few years the press of China may be printed with the use of 40 characters instead of 40,000, and if the older Chinese cannot read it, the younger generation will be able to read it to them."

NO HEALTH IF STOMACH WRONG. M-O-Na makes your stomach feel fine, stops belching, heart burn and all discomfort in a few minutes. Guaranteed by W. F. Chapman.

VETS TO MAKE RIVER TRIP BY STEAMER

SAN FRANCISCO, Calif., March 14.—Disabled American veterans of the World War here plan to charter a river steamer, with accommodations for 100, for the round trip to Sacramento, to attend the annual state convention of their organization, May 23-25.

Any coal at Page's and be comfortable and sweet-smelling.

DEATH CLAIMS CHIEF CARRY. THE KETTLE AT INDIAN HEAD

(By Associated Press.) REGINA, Sask., March 14.—Death recently at Indian Head of Chief Carry-The-Kettle, head-chief of the Assiniboine tribe, at the age of 107 years, marks the passing into the Happy Hunting Ground of one of the oldest and most renowned Indian chieftains on the American continent. Following the time-honored custom of the tribe, the chief was buried on the reserve at high noon, February 19. The service was conducted according to Christian rites by Rev. M. Brong, hall of the Presbyterian Indian Mission, the aged Indian having embraced the Christian faith more than forty years ago.

Chief Carry-The-Kettle was famous in his youth as a runner, many wonderful feats of endurance being placed to his credit. He was born along the Assiniboine river in Saskatchewan in 1816, holds a prominent place in all the official history of the early west. He was the oldest pre-frontier chief still ruling his people north or south of the border in the Northwest country. He was leading the Assiniboines to war while sitting Bull and Poundmaker were still in their infancy.

He was one of the few survivors

MEASLES may be followed by serious cold trouble use nightly—VICKS VAPORUB Over 17 Million Jars Used Yearly

of the historic smallest epidemic of 1833, which all but wiped out the powerful Assiniboine tribe, having reduced them from 1,200 to 400 lodges.

DIVERT AUTOMOBILES TO NEW HIGHWAYS

COLORADO SPRINGS, Colo., March 14.—As a forerunner of the approaching tourist season, local professional and business men have formed the "Rocky Mountain Motors, Inc." the purpose of which is to divert cross country motorists from the main east and west highways to those of less prominence, leading to points of interest north and south of the trans-continental routes. The organization plans to erect signs at the points from which side trips may be taken.

Tourists are unaware of many points of interest not touched by the main arteries of travel and, therefore, miss the opportunity of viewing some readily accessible but little known scenery. The leaders of the movement state. Other western states will follow the example of the local organization, according to the members of the R. M. M. Inc.

NOTICE TO OLD SOLDIER AND SOLDIERS' WIDOWS

All claims for Soldiers' Exemption MUST be filed with the Assessor in the month of MARCH. FRANK L. CALKINS, Assessor.

FARM NEWS

SPRAYING FOR CONTROL OF SCAB ON APPLES AND PEARS

(By County Agent Cooney) The first real scab spray for apples and pears starts with the delayed dormant. This stage can be recognized when the fruit buds are well defined in the bud cluster. The leaves are just starting out. The material to use is standard lime-sulphur 3 1/2 gallons per 100. If aphids are present add 3-4 pound blackleaf to each 100 gallons.

This application is followed by three others for control of scab. Second application when pink is showing on apples and white on pears. Third when calyx is still open and petals have mostly fallen. Fourth fifteen twenty days later.

An effort will be made to give timely notice of each spray and materials to use on each variety of fruit. Spray programs for the year can be had by calling on or writing to the county agent.

Monia Blight and Brown Rot in cherries and apricots. Spray all cherry and apricot trees now with 6-6-50 Bordeaux mixture. See that every limb and twig is given a thorough coating of spray.

This is important as either of these diseases can blight the entire crop of fruit.

COUNTY AGENT WILL DIS-TRIBUTE SQUIRREL POISON IN ALL INFESTED SECTIONS

The season for poisoning the grey diner is close at hand and every farmer should secure his supply and be ready for this pest when he comes forth to do his annual destruction.

Watch the press for communities and dates where poisoned bait can be purchased from the county agent. Distribution will be made at Deal Food Store, March 19th, Comstock school house, March 19th, Yoncalla March 20th, at Davis Feed store.

DON'T FORGET

We are making portraits of babies free for a short time. Come early. Roseburg Studio, Bell Sisters Building, Phone 462.

FARM REMINDERS

(From O. A. C. Experiment station) A good sow should be retained as long as she is useful. If she raises a litter of eight good pigs she is valuable property. Some of her best pigs should be saved for breeding purposes.

A few hogs will go a long way toward paying the bills on any farm; but too many eat up all the profit. Base the number of hogs to be kept on the amount of farm waste available for hog food.

Good livestock cannot be raised without good fires. One half of the success of the livestock business depends on breeding and raising. The rest depends on care of the stock.

Worms which infest currants and gooseberries occur at this time in the soil about the base of the bushes. Spading and working over the soil immediately beneath and adjacent to the bushes will do much to lessen the percentage of wormy fruit.

Have all those young lambs been docked, and the buck lambs castrated? A loss may result if this is not done early. Castrating the buck market lamb will make a better carcass, and a satisfied consumer of the meat.

Washing eggs to be used for hatching purposes does not necessarily decrease hatchability, but increases the evaporation because the pores are opened. Excess evaporation causes small chicks which do not hatch properly.

A little care in selecting eggs of standard size and color for hatching purposes will bring the reward in offspring which tend to produce the same kind.

Whole Grain Products Healthful. Eating whole grain products in cereals and breadstuffs is a healthful food practice. Grains in their natural state contain considerable amounts of minerals, vitamins, and roughage, besides energy and protein, all daily food essentials. Present day milling of wheat especially removes the bran

The Original Food-Drink for All Ages—Quick Lunches Home Offices, Restaurants, Rich Milk, Malted Grain Extract in Powder & Tablet Form. Nourishing—Non-cooking—Avoid Imitations and Substitutes

Vegetables Promote Health. Vegetables eaten freely promote health. They are an excellent source of mineral elements, and roughage. Some protein and energy are also supplied. These materials are necessary for the successful nutrition of both children and adults. Raw vegetables carefully cleaned and thoroughly chewed have a higher mineral and vitamin content than cooked vegetables. Overcooking vegetables in too much water results in loss of flavor and food value.

Potato Blossom End Best. The blossom end cutting of potatoes proved satisfactory in most instances where tried last year and those farmers who saved the blossom end cuts for planting on disease free ground in most cases greatly reduced the amount of wilt. It is believed that by following the Station method of examining the stem ends for wilt and saving the blossom ends for special seed patches and careful summer roguing that the wilt troubles may be to a considerable extent eliminated.

Vegetables Follow Vegetables. Early planting of hardy vegetables such as spinach, peas, radishes, onion sets, and early cabbage, means a corresponding earlier maturity of those vegetables which will then come off the ground in very dry or warm weather. This early planting of hardy vegetables makes possible the planting of a succession crop such as peas followed by late cabbage or fall cauliflower, or onions from sets followed by late beans or fall lettuce.

A large tonnage of apples was lost in the northwest during the last year because of a lack of storage facilities. Common or air-cooled storage houses can be constructed at a reasonable cost and would do much to reduce losses.

Letting Set Out Now. The earliest head lettuce is grown to a state of solid heading in a cold frame. This crop, usually called the spring and late fall. The plants invariably make fine solid heads. The time of setting the young plants in the field is usually late in February. The crop will begin to mature on about April 15.

Cultivation Saves Moisture. The fact that moisture can be conserved when summer arrives by a thorough working of the soil in the spring has been learned by the most successful vegetable growers of the state. A fine top surface of the garden makes it easier for the feeder to operate and produce a uniform germination and later an even stand of plants. A fine surface soil also acts as a good dry mulch and is valuable when fertilizer is broadcasted before seeding or transplanting. The successful growth of many vegetables such as cabbage, cauliflower, broccoli, and tomatoes can invariably be traced to the thorough spring preparation of the soil as an important factor.

ENGLAND INCURRING HEAVY LIABILITIES IN IRELAND. LONDON, March 12.—The British government has a liability to pay the Irish loyalists in southern Ireland whose property has been destroyed nearly \$150,000,000, according to the claims made by a meeting of Irish loyalists held in London recently. Lord Carson, the leader of the Irish Unionists, was the principal speaker. Sir William Dawson, member of Parliament president.

The chairman was responsible for the estimate of damages suffered. He said that before the freeze the claims amounted to ten million pounds, but they had since risen to thirty millions, "and as villages are now being sent into the air wholesale, no doubt these claims are rapidly increasing."

Lord Carson gave examples of the ruin in Ireland. The Great Southern and Western railway had lost practically all its capital, amounting to millions of pounds, and all the people who held shares were ruined. He cited numerous cases of individual suffering, told of Irish ladies recently rich who had been reduced to working in England as servants, and declared these were examples from thousands.

Why not plant a few walnut trees this Spring? They are likewise serviceable for shade and ornamentation. For full particulars on best varieties, locations, soils, etc., write to J. C. Warkley or the OREGON NURSERY CO. Horticultural Specialists OREGON, OREGON

AMERICAN WALNUTS FOR AMERICAN PEOPLE. The safest crop to raise is the one having the greatest public demand. Take Walnuts, for instance. In 1911—there were 22 million pounds of Walnuts imported into this country. In 1921—there were 45 million pounds imported. An increase of 13 million pounds. American people "want" more American Walnuts. But "we're not supplying their 'wants'."

Our home-grown Walnuts are far superior to any imported, and an unlimited demand for them exists. Why not plant a few walnut trees this Spring? They are likewise serviceable for shade and ornamentation. For full particulars on best varieties, locations, soils, etc., write to J. C. Warkley or the OREGON NURSERY CO. Horticultural Specialists OREGON, OREGON

SOVIETS DEEM MORE TERROR NECESSARY IMPRESS PEOPLE (By Associated Press.) VLADIVOSTOK, March 14.—There has been a great change among the political representatives of the government. Practically all the old commissioners have been removed and a new set, with stricter ideas, have been sent here from Moscow. One of the late arrivals said the government decreed this measure necessary in order to bring a little of the terror into the district and to impress the people with the strength of the government.

They think necessary as the working classes of the district have not had to undergo all the hardships which their fellow countrymen in Russia have lived through and are therefore inclined to be more independent.
