

the BEST OIL made is refined from WESTERN CRUDE

The motorist who pays fancy prices for oil, often pays for something he does not get.

Zerolene costs less because it is produced in California from selected California naphthenic crude, which, of all the crudes so far discovered, yields the most efficient lubricating oils.

Zerolene lubricates better. It forms from 25% to 50% less carbon. It has greater adhesiveness and penetration than oils made from any other crude.
